# TABLE OF CONTENTS

|                                                                                                                                        |    |
|----------------------------------------------------------------------------------------------------------------------------------------|----|
| AI-Driven Tennis Coaching.....                                                                                                         | 1  |
| <i>Yujun Ge, Jerry Ng</i>                                                                                                              |    |
| An Insight Platform for Clinicians to Identify Outbreaks of Antimicrobial Resistant Bacteria .....                                     | 5  |
| <i>Ajay Penugonda</i>                                                                                                                  |    |
| Tennis Match Outcome Prediction Using Machine Learning and In-Match Statistics .....                                                   | 9  |
| <i>Yash Gupta, Rida Assaf</i>                                                                                                          |    |
| AI Firefighter: A Physics Informed Decision-Making Neural Network for Optimized Firefighting<br>on Arbitrary Landscapes.....           | 12 |
| <i>Selma Emekci</i>                                                                                                                    |    |
| A Hybrid Approach for Drug Interaction Prediction Using Knowledge Graphs and Gradient<br>Classifiers .....                             | 17 |
| <i>Tarang Pande, Pranav Kulkarni</i>                                                                                                   |    |
| Sign2Speech: A Novel Approach to Real Time Sign Language to Speech Conversion with<br>Convolutional Neural Networks .....              | 22 |
| <i>Archith Raman, West Foster</i>                                                                                                      |    |
| DigiMate: Leveraging Large Language Model AI in Geriatric Behavioral Obesity Control Therapy .....                                     | 27 |
| <i>Ryka C. Chopra</i>                                                                                                                  |    |
| Advanced LSTM Neural Networks for Predicting Directional Changes in Sector-Specific ETFs<br>Using Machine Learning Techniques .....    | 32 |
| <i>Rifa Gowani, Zaryab Kanjani</i>                                                                                                     |    |
| Analyzing and Controlling Open SIS Epidemics in Dynamic Population Networks .....                                                      | 37 |
| <i>Sarah Liaw</i>                                                                                                                      |    |
| Measuring Repetitive Sequences: A Lempel-Ziv Compression-Based Approach with Transition-<br>Based Tokenization in Music Analysis ..... | 42 |
| <i>Anton Chen, Ross Greer</i>                                                                                                          |    |
| CleanSpeak: Energy-Efficient Pipeline for Detoxifying Online Comments .....                                                            | 47 |
| <i>Mihir Gupta, Ross Greer</i>                                                                                                         |    |
| Assisting Humans in Human-Robot Collaborative Assembly Contexts Through Deep Q-Learning .....                                          | 52 |
| <i>Garrett Modery, Weitian Wang</i>                                                                                                    |    |
| MInDS: Using Large Language Models to Screen for Depression .....                                                                      | 58 |
| <i>Chase Carstensen, Nicholas Small, Janya Bhaskar, Becks Lopez, Avantika Shrestha, Elke A.<br/>Rundensteiner</i>                      |    |
| Machine Learning-Based Detection for Cyber Attacks in Internet of Medical Things Devices.....                                          | 63 |
| <i>Taylor Clark, Mohamed Rahouti, Kaiqi Xiong</i>                                                                                      |    |
| Deep Learning Approach to Photometric Redshift Estimation.....                                                                         | 68 |
| <i>Krishna Chunduri, Mithun Mahesh</i>                                                                                                 |    |
| Home Decarbonizer: Greening Household Energy Consumption Using Temporal Shifting.....                                                  | 73 |
| <i>Mihir Shenoy, Walid A. Hanafy</i>                                                                                                   |    |

|                                                                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Optimizing the Hydro-Metallurgical Extraction of Supply-Chain Critical Metals from Emulated Spent Lithium-Ion Batteries .....                               | 78  |
| <i>Akshay Bhaskar</i>                                                                                                                                       |     |
| Identifying Potential Break-Ins with Acoustics .....                                                                                                        | 83  |
| <i>Esteban Rodriguez</i>                                                                                                                                    |     |
| An Explainable AI Framework with ML Model Stacking for House Price Prediction .....                                                                         | 88  |
| <i>Sanjay Ganapathy, Tingyu Li</i>                                                                                                                          |     |
| A Novel Approach to Eliminating Hallucinations in Large Language Model-Assisted Causal Discovery .....                                                      | 93  |
| <i>Grace Sng, Yanming Zhang, Klaus Mueller</i>                                                                                                              |     |
| An Assistive Activity Classification System to Passively Recognize and Monitor Medicine Intake Using Video Transformer .....                                | 99  |
| <i>Anthony Wang, Ross Greer</i>                                                                                                                             |     |
| Dynamic Prediction of Post-Wildfire Landslide Susceptibility: A Machine Learning Approach.....                                                              | 104 |
| <i>Joseph Tso, Harun Khan, Luke Sun</i>                                                                                                                     |     |
| Open-Vocabulary Segmentation for Remote Sensing.....                                                                                                        | 109 |
| <i>Vipin Gunda, JT Klenke, Arjun Mehta</i>                                                                                                                  |     |
| Fair Negotiation Model with Applications to Ethical Therapeutic Drug Pricing .....                                                                          | 114 |
| <i>Edward Lee, Shaiful Hossain, Ryley Zhang</i>                                                                                                             |     |
| Exploring Ultrasound-Activated Chlorin E6 for Enhanced Tumor-Targeted Therapy .....                                                                         | 119 |
| <i>Caitlin Johansen, Suhani Modha, Anita Patel, Emily Qin, Claire Zhu, Shuvanjan Halder</i>                                                                 |     |
| Optimizing Basketball Shot Trajectory Using Image Segmentation Techniques for Training Feedback.....                                                        | 125 |
| <i>Vasisht Kartik, Ross Greer</i>                                                                                                                           |     |
| Enhancement Framework for Vision Transformers in Data Limited Cancer Detection .....                                                                        | 131 |
| <i>John Patrick Capocyan</i>                                                                                                                                |     |
| Aligning the World's Largest Gas Electron Multipliers (GEMs) Rotator at Thomas Jefferson National Accelerator Facility .....                                | 136 |
| <i>Rockwell Li, Ryan Biraben, Chris Soova</i>                                                                                                               |     |
| 3D Polymer Composite of Porous Silicon Particles for Peripheral Nerve Regeneration with a BDNF Model.....                                                   | 141 |
| <i>Saanvi Dogra, Michael Sailor</i>                                                                                                                         |     |
| Growth, Genetic, and Phenotypic Responses of Chlamydomonas and Arabidopsis to Varying Concentrations of and Times of Exposure to Deoxynivalenol (DON) ..... | 146 |
| <i>H. Cantor</i>                                                                                                                                            |     |
| Computational Fluid Dynamics Analysis and Modeling of SpaceX's Starship and Raptor Engine .....                                                             | 151 |
| <i>Shloka Shriram, Jiya Patel, Gali Avni, Victoria Collemi, Dhruv Kotadia, Christopher Eden</i>                                                             |     |
| Finding Common Ground: A Two-Opinion Approach to Reducing Polarization in Networks .....                                                                    | 156 |
| <i>Sulekha Kishore, Anagha Satish</i>                                                                                                                       |     |
| Identifying User Requirements Using LLMs .....                                                                                                              | 162 |
| <i>Dustin O'Brien, Spencer Presley, Xiaohong Wang, Shuangquan Wang</i>                                                                                      |     |

|                                                                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Developing a Metric to Optimize LiDAR Scan Parameters: A Controlled Experimental Approach<br>Using Boston Dynamics' SPOT .....                                                        | 167 |
