CONTENTS

Energy innovations

- An assessment of battery trolley systems' performance in surface mines 3
H Bao, P Knights, M Kizil and M Nehring
- Deriving maximum value from mineral waste streams 21
D Osborne

Future skills and workforce evolution

- Experiences from developing a road map to attractive, inclusive and safe mining workplaces 25
L Abrahamsson
- Perspectives and initiatives for the future of mining 27
A Binder, P Foster, S Hazuria Anderson, L Liu, N Mojtabai, S Nowosad, S Raval, O J Restrepo Baena and R Webber-Youngman
- Systems thinking and its need in the workforce of tomorrow 29
D Brown and K Markovic
- The RockDataAcademy – a new open-access knowledge base covering the ins and outs of using sensors to scan ores 33
M Dalm
- Beyond the manufacturing mindset – adapting workforce skills for the tech driven mining industry 35
Y Lanwin
- Ten conditions that will change the work of managers in Mining 4.0 45
J Löw and J Johansson
- Empowering mining communities – the importance of local business hubs for skills development 47
L Mackinlay
- Are we there yet? Where the minerals industry is at, and where we are going with gender diversity, equity and inclusion 51
L H G McClean
- Effects of the green transition on miners' work, competencies and skills 61
A Pekkari, J Johansson, E Lund and J Löw
- Incorporating controls and automation into mining engineering curriculum 63
S J Schafrik and M Long
- Virtual mine geologist – who needs a real one when AI can do the job? 71
S Sullivan
- Future skills and workforce evolution – training and skills development for mining operation engineer and drill and blast engineer in surface mineral mine PT Indo Muro Kencana 73
H Utama and R Heryadi

Innovations

A day in the life of a mineworker in 2045 <i>J Bassan, C T Farrelly, G McCullough and P Knights</i>	93
Intersection traffic strategy of unmanned truck in open pit coalmines <i>Q X Cai, B Y Luan, Y Tian, X Lu and W Zhou</i>	107
In data, we trust – navigating through the age of AI in the mining industry <i>R Chandramhan, M Pyle and G Lane</i>	125
Using machine learning to make smarter screening media maintenance decisions <i>M Cutbush, J Herd, J Rowe and F Aziz</i>	131
Machine learning integration of hyperspectral and geophysical data for improved exploration targeting <i>R A Dutch, T Ostersen, B P Voutharoj and M Paknezhad</i>	139
Subtek™ 4D™ – Optimised blasting performance through the application of new underground bulk explosive technology <i>S Evans and B Taylor</i>	143
Digital mapping for rock mass discontinuities – opportunities and challenges <i>A Fereshtenejad, S Mehrishal, J Kim, J Leem and J Song</i>	155
Tactical medical mining rescue – closing the gap of professional medical attention in environments with difficult accessibility <i>A Fichtner, F Reuter, C Staak and H Mischo</i>	169
Application of multi-sensor and AI-based core logging for a reduction of decision-making time within mineral exploration field projects <i>C Garcia, I Luna-Berbesi and A Krishnan</i>	177
Increasing production systems availability through remote support discipline <i>S Glover, A Innis, A Bye and B McCarthy</i>	181
Practical applications of large language models in mining <i>B Gyngell and P Culvenor</i>	189
An autonomous IIoT-based monitoring systems for intelligent rock bolts in underground mines <i>P Hartlieb, M Varelija and M Noeger</i>	201
Annual survey of technological transformation in the mining and minerals exploration industry, 2023 <i>W J Haylock and K Wasieł</i>	203
Reducing the environmental and economic cost of metal extraction by optimal blast design <i>L Julian, W Hunt, R Pratama, D La Rosa and A Tsang</i>	213
Hyperspectral image processing and analysis for exploration in the mining industry <i>D Kumar, S Prakash and M Danish</i>	227
Unlocking mine productivity by changing-the-equation on the where, what and when of orebody characterisation <i>P Leckie, S Warden and T Neville</i>	233

Ultra-wide band based collision avoidance for underground mines <i>B Li, K Zhao and H Gong</i>	243
Applications of multi-modal human activity recognition to enhance worker safety in underground mines <i>J Li, L Yao, B Li and C Sammut</i>	247
Enhancing the fairness in LoRa-Based linear wireless mesh networks in underground mining <i>Y Li, N Udugampola, X Ai, B Li and A Seneviratne</i>	251
Enhancing geoscience model confidence via digital twins – integrated modelling, simulation, and machine learning technologies <i>M Liang, C Putzmann and D Gokaydin</i>	259
Data-driven visualisation for the development of mining digital twin <i>R Liang, C Zhang, B Li, S Saydam and I Canbulat</i>	261
Predictive spatial modelling of rock mass properties using machine learning techniques <i>Y Liu, M Karakus and J Q Shi</i>	271
Artificial Intelligence (AI)-based predicting influence of technological innovation on stock price of iron ore mining companies <i>P Mugebe, M S Kizil, M Yahyaei and R Low</i>	277
Discrete vein modelling – implications of a novel geology driven resource estimation methodology for vein hosted mineral deposits <i>M Munro and J P van Dijk</i>	281
Enhancing dragline safety – a multi-layered proximity detection system <i>B Murphy</i>	287
A deep learning based approach for roof bolt recognition in 3D point cloud of underground mines <i>D Patra, B P Banerjee and S Raval</i>	291
Towards a mining metaverse – spatial computing meets digital twins for remote operations <i>J Qu, M S Kizil, M Yahyaei and P Knights</i>	295
Advancing slam in underground mines – a unique marker-based approach for enhanced navigation and mapping <i>P M Ranasinghe, B P Banerjee and S Raval</i>	301
Mining 4.0 initiatives – a pathway to a smarter mining fleet <i>K Rau</i>	303
Unlocking value chain optimisation with a digital mining system <i>N Sarkar, T Vink, S Battersby, S Gulati and L Okada</i>	305
Structural analysis and modelling in an evolving mineral resources operation <i>S Shahin, A Jani and N Arrys</i>	313
A new insight into standardisation of Mine IoT <i>A Shirbazo, B Li, S Saydam, S Ata and H L Ramandi</i>	317
Can robots break the drill and blast bottleneck in underground roadway development in hard rock? <i>N A Sifferlinger, M Berner and E Fimbinger</i>	321

Radar guided blasthole drilling improves product recovery <i>W Stasinowsky, B Zhou, M van de Werken, I Mason and J Hargreaves</i>	327
Robust flexibility – a methodology for agile systems engineering in mining <i>Z Tabor and D Brown</i>	331
Data augmentation for image-based rock fragment recognition using StyleGAN <i>Y Tang and G Si</i>	339
Automated characterisation of the dump materials <i>S Thiruchittampalam, B P Banerjee, N F Glenn and S Raval</i>	343
A practical model for LoRa propagation in underground mines <i>N Udugampola, X Ai, B Li and A Seneviratne</i>	347
Application study of UAV technology in tailings pond monitoring <i>K Wang, Z Zhang and T Zhao</i>	351
Unmanned aerial vehicle observation technology of coal mining-induced surface movement and fissures <i>B Wei, K Wang, T Zhao and J Zhang</i>	367
Advanced visual perception in mining – multimodal fusion and enhancement <i>C Xu and B Li</i>	379
Innovative approaches to dust pollution management in mining operations – a comprehensive image-based identification and evaluation system <i>J J Yin and S F Wang</i>	383
Lithology classification through machine learning models – assessing and enhancing the generalisability of single boreholes in north-western Bowen Basin, Australia <i>Z Yu, G Si, K Tang, V Salamakha, J Oh and X Wu</i>	393
Vibration energy harvesting for self-powered sensors at mine sites <i>H Zhang, B Li, M Karimi, M Hassan and S Saydam</i>	401
 Mining in extreme environments and unconventional deposits	
Estimating the thickness of the Martian subsurface layer based on the fault pattern <i>D Asahina, B Bradák, S Akdag and S Saydam</i>	413
Cabeus Crater lunar volatiles and their effect on human exposure limitations <i>N Barnett, J Oh, A G Dempster and S Saydam</i>	419
The challenges of producing high purity quartz <i>D Connelly</i>	427
High purity alumina and potash produced from feldspar <i>D Connelly</i>	437
Finding a social license on the deep seabed – risks and mitigation strategies for exploitation activities in the absence of exploitation regulations under UNCLOS <i>N Eastwood, D Whittle, I Samsonova and A Murphy</i>	451
Legacy tailings dams – asset or liability? A case study on sub-aqueous tailings reclamation <i>M Jones</i>	455

Applicability of TBM (tunnel boring machine) for deep lunar subsurface exploration <i>T Y Ko, J H Hwang, S J Park and Y S Kang</i>	467
Space mining – managing astronomical complexity <i>K Markovic, D Brown and Z Tabor</i>	473
Investigating the impact of royalties on commercial lunar ice mining <i>B McKeown, A G Dempster, S Saydam and J Coulton</i>	479
Key technology indicators that will influence mining method selection for future mines <i>S Nowosad and O Langefeld</i>	483
Real time assessment of water content in icy regolith by analysing drilling parameters <i>J Rostami, D Joshi and A Eustes</i>	489
Ice-drilling and ground characterisation on the moon for space mining <i>B H Ryu, J Lee, H Jin and H S Shin</i>	493
Multiphysics modelling and virtual motion simulation to optimise mining systems in extreme conditions – insights from Mars Science Laboratory (MSL) Curiosity Rover <i>C Tapia, S Padekar, S Harlikar, D Likhachev and D Sapkale</i>	503
Deep-sea mining considerations and environment impact – an overview <i>M Torok, S Akdag, S Saydam, I Canbulat, J Katupitiya and W Midgley</i>	525
Effects of sulfate and chloride ions in acidic environments on the micro properties of granite <i>H Yu, C Zhang, H Chen, I Canbulat and S Saydam</i>	529
 Sustainable mining	
Opportunities for rare earth element recovery from waste streams <i>J Al-Shdifat, K Clode and S Daykin</i>	535
Blue Mining, a holistic approach that integrates circular economy <i>F Apollo, A Binder, M Bothe-Fiebert, O Langefeld and S Nowosad</i>	539
PMAP – smart and sustainable in situ treatment of mine wastewater and critical metals recovery technology <i>M Barkh and F X Spachtholz</i>	543
Australia’s hydrogen export in the form of embedded mineral derivatives <i>G Burge, M Haider Ali Khan and R Daiyan</i>	553
Eco-efficiency of ANFO and bulk emulsion explosives application in Indonesian mining <i>R Heryadi and H Utama</i>	565
Life cycle GHG emission considerations in overland conveyor design <i>T Hicks</i>	571
Toward the green mining – utilisation of tailings on gold recovery in thiosulfate system <i>S Jeon, A Buronov, I Park, C B Tabelin, L Godirilwe, K Haga and A Shibayama</i>	585
Getting it right from the beginning – ESG in mineral exploration <i>L H G McClean</i>	589

Coalmine methane emission estimates – an evolving understanding <i>S Raval</i>	597
Catalysing lower-carbon mining supply in Australia <i>M Read and E O’Connell</i>	603
The hidden path to sustainable mining – an incentive for transforming scope 3 emissions across industries <i>N Shahbazi and K Sherry</i>	611
Advancing sustainability in pumping systems – a comprehensive methodology for calculating, monitoring and minimising power and water consumption <i>A Varghese, S Martins, E Lessing, G M Hassan and A Karrech</i>	613
Social responsibility solutions provided by WebGen™ wireless initiation system in open cut mines <i>W Vilas Boas, L Steffen, G Stevenson, C Braga, G Gontijo, L Muñoz, R Macedo and D Machado</i>	623
R&D roadmaps in mining and water management – a design-led approach to driving sustainability and innovation <i>M Yadav, K Clode and S Daykin</i>	629
Author index	633
