CONTENTS

Best practice

Practical geometallurgy – and let there be light <i>D W Bennett and P D Munro</i>	3
Bean counting, how hard can it be? – common mistakes in metallurgical accounting <i>D Felipe and P Guernsey</i>	17
Design and delivery of a Professional Certificate in Metal Accounting <i>G B Gnoinski, K M McCaffery and J Jessop</i>	27
Mill relining automation – applying lessons learned <i>S Gwynn-Jones, T A Ogden, J Bohorquez, D Sims, M Turner, C Kramer and S Smith</i>	39
Optimising grinding circuit performance – a success story at Harmony Gold's Hidden Valley Mine with Rockwell Automation's Pavilion8™ MPC process optimisation technology <i>A Jain, T Tlhubo, L Silva and F Anis</i>	59
The effect of primary grind size on flotation recovery and the theoretical grade-recovery curve at Olympic Dam <i>Y Li, K Ehrig, V Liebezeit and S Barsby</i>	69
The journey of process improvement – Ok Tedi's vision <i>H Liang, L Brown and B Wong</i>	81
Applying geometallurgical principles for metallurgical sample selection <i>I T Lipton, P G Greenhill and L Torres</i>	95
The evolution of level control and its role in advanced control in the Northparkes flotation circuit <i>C P Lowes, M D Curtis and M J Garside</i>	107
Optimisation from mine to mill to mine at Newmont Lihir gold mine <i>J Moilanen, A Remes, G Peachey and J Kaartinen</i>	121
Strategic ore planning – using metallurgical performance data to drive mine planning for operational optimisation: case study 1 (oxides versus sulfides) <i>B Newcombe and G Newcombe</i>	133
Metallurgical test work – the beginning of the end or the end of the beginning? <i>A J H Newell, P D Munro and K Fiedler</i>	147
Practical considerations in the design of flotation process twins for set point decision automation at MMG Dugald River Mine <i>W Smith, A Malcolm, I Goode, G Bai and C Martin</i>	159

Operation updates

A review of operating data over 50 years of secondary crushing prior to AG/SAG mills <i>R Chandramohan and G Lane</i>	177
--	-----

Pioneering coarse particle flotation – transformative insights from five years of operation <i>C Haines, L Vollert, W Downie, I Heath and R Ghattas</i>	195
Gruyere Gold Mine Western Australia – Part 2 – ramp up to operations, a journey of comminution, optimisation and challenges <i>G Heard, J Stevens, M Becker and R Radford</i>	211
Mastering clay and oxide ores at St Ives Gold Mine – easing circuit constraints and bottlenecks with time-honoured comminution, leach CIP, and tailings circuit wizardry! <i>E Mort, M Simpson, B van Saarloos and R Radford</i>	231
Navigating the operational challenges at Campo Morado – a success story <i>R Whittering, A Bill, C Meinke, J Mendoza, A Villalvazo and R Chandramohan</i>	249
 Optimisation and improvement	
Managing froth tenacity at BHP Carrapateena <i>F Burns, J Reinhold, J Seppelt, S Assmann, and G Tsatouhas</i>	271
CSA mine new SAG mills optimisation using grindcurves <i>G D Figueroa Salguero, B Palmer, S Ntamuhanga and J Buckman</i>	299
Regrinding – a subtle mix of liberation and chemistry <i>C J Greet and B Shean</i>	313
Improved classification with the Cavex® DE hydrocyclone for mill circuit, coarse particle flotation, and tailings applications <i>J J Hanhiniemi, J Heo, N Weerasekara, E Wang, H Thanasekaran and A Kilcullen</i>	323
Improved cone crusher chamber design and operation using design and simulation tools <i>J J Hanhiniemi, N S Weerasekara and S Buaseng</i>	343
Grinding circuit expansion and optimisation at the B2Gold Masbate Project, Philippines <i>A Insalada, K Bartholomew, A J Marcera, E Occena, M Anghag, D Torres, N Avenido, J Rajala and R E McIvor</i>	359
Red Chris flotation circuit expansion – from piloting to full scale <i>K Li, D R Seaman, B A Seaman and J Baldock</i>	385
The optimisation of a vertical regrind mill at Renaissance Minerals, Okvau Mine <i>A Paz, A Siphanya and K Vansana</i>	401
Whiskey, puddings, shampoo and insanity – a taxonomy of circulating loads <i>J D Pease and P D Munro</i>	413
Rockmedia <i>M S Powell, A N Mainza, L M Tavares and S Kanchibotla</i>	427
Tooling up for future innovation – turning overlooked process opportunities to immediate and long-term benefit <i>M S Powell</i>	445
Modelling to prepare for and mitigate the impact of increasing ore hardness at Lihir <i>L Pyle, A Rice, P Griffin, B Seaman, W Valery, K Duffy and A Jankovic</i>	463

Optimisation of Jameson Cells to improve concentrate quality at BHP Carrapateena <i>J Reinhold, J Van Sliedregt, F Burns, A Price and J Seppelt</i>	475
Optimising flotation pulp conditions to improve recovery at Newmont Red Chris Mine <i>D R Seaman, J Johansson, J Baldock and B A Seaman</i>	495
Regrind test work review – analysis of procedures and results <i>J Thomson, B Foggatto, G Ballantyne and G Lane</i>	509
Continuous improvement of the Carrapateena grinding circuit <i>P Toor, J Seppelt, F Burns, J Reinhold, W Valery, L Brennan and K Duffy</i>	525
BRC copper processing – recovery improvements <i>I A Torok and J Begelhole</i>	541
Optimising ball mill grinding circuits – it's not just the mill <i>J Zela and B Cornish</i>	551
 Sustainability	
Plant design comparison of dry VRM milling plus magnetic separation with AG and ball milling plus magnetic separation for Grange Resources' Southdown ore <i>D David, D Olwagen, C Gerold, C Schmitz, S Baaken, C Stanton and M Everitt</i>	573
Redefining the battery limits of processing plants – improving sustainability through the deployment of sensing technologies <i>W Fletcher, D R Seaman and B Klein</i>	587
Scats – what are they good for? <i>T McCredden and C Fitzmaurice</i>	605
Author index	615
