CONTENTS

Challenges of reconciliation – lessons learnt

- Reconciliation system implementation for corporate governance reporting – a Minas-Rio case study 3
J Souza, R Hargreaves, C Morley and W Machado

Decision-making – the mine geologist's value

- From resource model to grade control – risks and work arounds 17
B C Afonseca, D Carvalho and A Chiquini
- An ever-evolving resource model as new pieces are added to the Avoca Tank puzzle, Tritton Operations 39
D Beckett, A Dimond, N Cox, O Gonzalez, A Jackson and B Cox
- Leveraging geological logging as pathfinders and proxies in machine learning resource and geometallurgical modelling – benefits, limitations, and pre-screening techniques 47
D M First, D Mogilny, Y H Rajcoomar and S Vedrik
- Adaptive mine planning in open pits – the role of near-real-time orebody characterisation in grade control modelling 67
S O'Brien and S Maguire
- Advancing mine geology through optimised sampling strategies – a case study from Porphyry Underground Mine, Western Australia 71
R Snell
- SBRE workflow development for Nickel West – enabling decisions under uncertainty 85
C Williams, I Minniakhmetov, G Merello and R Finch

Excellence in mine geology – delivering value

- Mineable Shape Optimiser and ore wireframing, analysis of tools for scheduling open pit mining at KCGM 93
J Ball
- Overcoming practical challenges to honour geological controls in short-term modelling of the Kamo-a-Kakula copper deposit 103
H Bananga, G Gilchrist and J Chitambala
- Remote sensing LiDAR for enhanced underground geology mapping – a Nova Mine case study 115
G Boyce
- Homogeneity and heterogeneity of crushed gold certified reference materials 131
J Carter and B J Armstrong
- Interrogating the space between surveys – an assessment of deep diamond drill hole survey intervals and the impact on resource confidence at Olympic Dam 143
A Chapman and D Clarke

Enhancing geometallurgical ore domaining through improved orebody knowledge – a case study from the Sotiel Cu-Pb-Zn-Ag Mine, Spain <i>R Dale, M Biven, A Claflin, J Gonzalez and M Puerto</i>	155
Dynamic production grade cut-off – integrating financial understanding into daily mine geology <i>M Darvall, G Sternadt and M Van Ryt</i>	173
Rapid drill hole planning for underground delineation drilling at the Platreef PGE-Cu-Ni deposit, South Africa <i>G Gilchrist and J Chitambala</i>	181
Use of near mine exploration resource estimates in assessing strategic growth at the Super Pit Kalgoorlie <i>J Ireland</i>	187
Mine-scale reflection of a multi-stage regional structural history in the orebody geometry of Cutters Ridge Open Pit at Mungari, Western Australia <i>R Lumaad Paras, R Gordon, R Gulay and J Strang</i>	201
Ore control based on value – experiences in design and execution <i>C Morley</i>	209
Hidden between the data, small but significant high-grade structural lodes <i>R Reid, D Magautu, M Lucien, L Gagau, M Mondo and E Mudinzwa</i>	221
Opening the geologists tool box – building a grade control system <i>C Rowett, P Rolley and D O’Rielly</i>	231
Cosmic-ray muon tomography – new developments in mining applications at BHP’s Leinster and Olympic Dam mines <i>D Schouten, J Townsend, E Western, M Owers, J Taylor and A Tunnadine</i>	243
Paving the way for future value – confidence in Olympic Dam’s structural models utilising digital workflows <i>J Sidabutar, J Taylor and M Goldman</i>	253
Strategies for enhancing ore control and production at Martabe Gold Mine Indonesia <i>A Triyunita, N Saala, N Khariyah, M I Hidayat and J Hertrijana</i>	263
Black rock cave flow model reconciliation and optimised draw strategy <i>M C Vermaak and C Curtis-Morar</i>	279
Technological solutions to remnant mining ore control at the Martha Underground Mine <i>A Whaanga, W Vigor-Brown, A Harvison and J Maxted</i>	289
 Futureproofing mine geology – planning ahead	
Copper mineralisation at Mt Isa – unseen insights from seismic surveys after a century of geoscientific study <i>S Bright, G Turner, A Brown and M Megebry</i>	301
Optimising workflows in post-pandemic operations – impacts and implications for mine geologists <i>S Edmond, S O’Brien, A Tod, D Yeates and M Ravella</i>	309

Machine learning-based silicate alteration – optimising spectrographic core imaging, multi-element geochemical, and dynamic rebound hardness data set to improve the objectivity of alteration domaining <i>M H Rahadi, A Wiguna, M Heriyanto and R Taube</i>	319
Implementation of the Chrysos PhotonAssay™ Method at Fosterville Gold Mine, Victoria <i>S P Hitchman, S Simbolon, D J Symons, J P Hoare and J B Carpenter</i>	341
Using representative elemental analysis on conveyed flows to complement grade control – a win-win for geologists and processors <i>H Kurth</i>	347
Directional change in underground drilling – a case study <i>V Mead, B Sharrock and M Ayris</i>	355
 Open to anything	
Exploring deep learning in resource estimation <i>N Battalgazy, R Valenta, P Gow, C Spier and G Forbes</i>	371
Author index	379
