TABLE OF CONTENTS

Student Paper Contest.....	xxxi
Foreword.....	xxxii

MA1a: Machine Learning for Communications I

MA1a.1: Multi-Modal Sensing and Communication for V2V Beam Tracking via Camera and GPS Fusion	1
<i>Mattia Fabiani, University of Bologna, Italy; Diego Silva, Asmaa Abdallah, Abdulkadir Celik, Ahmed M. Eltawil, King Abdullah University of Science and Technology (KAUST), Saudi Arabia</i>	
MA1a.2: Adaptive Control of MIMO UAVs for Prioritized Harvesting via Hierarchical Reinforcement Learning	7
<i>Bharath Keshavamurthy, Nicolo Michelusi, Arizona State University, United States</i>	
MA1a.3: Artificial Intelligence and Machine Learning Based Beam Prediction in 5G-Advanced and 6G Communications	12
<i>Qiaoyu Li, Qualcomm Wireless Communication Technologies (China) Limited, China; Philip Sisk, Arumugam Kannan, Tao Luo, Taesang Yoo, Hamed Pezeshki, Mahmoud Taherzadeh Boroujeni, Qualcomm Technologies Inc., United States</i>	
MA1a.4: Digital Twin Aided Compressive Sensing: Enabling Site-Specific MIMO Hybrid Precoding	17
<i>Hao Luo, Ahmed Alkhateeb, Arizona State University, United States</i>	

MA2a: Simultaneous Transmit Receive Systems

MA2a.1: Feasibility of 6G Sub-Band Full-Duplex: Cancellation Methods and Performance Results	22
<i>Vesa Lampu, Tampere University, Finland; Arne Fischer-Bühner, Nokia Bell Labs, Belgium; Lauri Anttila, Matias Turunen, Mikko Valkama, Tampere University, Finland</i>	
MA2a.2: Kernel-Based Signal Processing for Simultaneous Transmit-Receive Systems	27
<i>M. Hossein Attar, Technische Universität Berlin, Germany; Ramez Askar, Fraunhofer Institute for Telecommunications, Germany; Slawomir Stanczak, Technische Universität Berlin, Germany</i>	
MA2a.3: Near Range, Leakage Aware Object Localization Based on 5G NR-Compliant JCAS	32
<i>Andreas Meingassner, Oliver Lang, Moritz Tockner, Michael Hofstadler, Günther Lindorfer, Michael Lunglmayr, Mario Huemer, Johannes Kepler University, Austria</i>	
MA2a.4: Multi-Target Integrated Sensing and Communication with MIMO In-band Full-duplex Systems	39
<i>Yung-Chih Chih, Chung-An Shen, National Taiwan University of Science and Technology, Taiwan; Mohammed E. Fouda, Rain Neuromorphics Inc., United States; Ahmed M. Eltawil, King Abdullah University of Science and Technology, Saudi Arabia</i>	

MA3a: Topological Signal Processing and Learning

MA3a.1: Topological Trajectory Classification and Landmark Inference on Simplicial Complexes	44
<i>Vincent P. Grande, Josef Hoppe, Florian Frantzen, Michael T. Schaub, RWTH Aachen University, Germany</i>	
MA3a.2: Kalman Filtering for Simplicial Processes.....	49
<i>Rohan T. Money, Simula Metropolitan Centre for Digital Engineering, Norway; Mohammad Sabbaqi, TU Delft, Netherlands; Joshin Krishnan, Baltasar Beferull-Lonano, Simula Metropolitan Centre for Digital Engineering, Norway; Elvin Isufi, TU Delft, Netherlands</i>	
MA3a.3: Variational Self-Supervised Learning on Simplicial Complexes	54
<i>Ayushman Raghuvanshi, Sravanthi Gurugubelli, Hiren Madhu Mahendrakumar, Sundeep Prabhakar Chepuri, Indian Institute of Science, Bangalore, India</i>	
MA3a.4: Learning Sheaf Laplacian Optimizing Restriction Maps.....	59
<i>Leonardo Di Nino, Sergio Barbarossa, Paolo Di Lorenzo, Sapienza University of Rome, Italy</i>	

MA4a: Adaptive Filtering and Estimation I

- MA4a.1: Cascaded Polynomial Adaptive Filters for Nonlinearity Compensation in Circuits.....64
Shengsheng Wang, Chandrasekhar Radhakrishnan, University of Illinois, Urbana-Champaign, United States
- MA4a.3: A New Statistical Model for Waveguide Invariant-Based Range Estimation in69
Shallow Water
Junsu Jang, Florian Meyer, University of California, San Diego, United States
- MA4a.4: Multiple Target Tracking in Unknown and Time-Varying Measurement Noise74
Intensity
Yongho Seo, Antonia Papandreou-Suppappola, Arizona State University, United States

MA5a: Advances in Sparse Sensor Arrays and Waveforms

- MA5a.1: Efficient Use of Non-Central ULA Segments in the Coarrays of79
Weight-Constrained Sparse Arrays
Pranav Kulkarni, P. P. Vaidyanathan, California Institute of Technology, United States
- MA5a.2: Antenna Failure Resilience: Deep Learning-Enabled Robust DOA Estimation with84
Single Snapshot Sparse Arrays
Ruxin Zheng, Shunqiao Sun, Hongshan Liu, The University of Alabama, United States; Honglei Chen, Mathworks, United States; Mojtaba Soltanalian, University of Illinois Chicago, United States; Jian Li, University of Florida, United States
- MA5a.3: Sparse array sensor selection in ISAC with identifiability guarantees90
Robin Rajamäki, Aalto University, Finland; Piya Pal, University of California San Diego, United States
- MA5a.4: Non-Overlapping Identical Division of Integer Set.....95
Ajay Namboothiri, Md Waqeeb Chowdhury, Yimin D. Zhang, Temple University, United States

MA6a: Machine Learning Methods for Inverse Problems in Biomedical Imaging

- MA6a.2: Pruning Unrolled Networks (PUN) at Initialization for MRI Reconstruction100
Improves Generalization
Shijun Liang, Evan Bell, Avrajit Ghosh, Saiprasad Ravishankar, Michigan State University, United States
- MA6a.4: Towards a Sampling Theory for Implicit Neural Representations.....105
Mahrokh Najaf, Gregory Ongie, Marquette University, United States

MA7a: Semantics and Age of Information

- MA7a.1: Timely Remote Estimation with Memory at the Receiver111
Sirin Chakraborty, Yin Sun, Auburn University, United States
- MA7a.2: Timely and Energy-Efficient Multi-Step Update Processing116
Vishakha Ramani, Ivan Seskar, Roy Yates, WINLAB, Rutgers University, United States
- MA7a.3: Symbolic Logic and Category Theory for Reasoning-Enabled Semantic Communications.....121
Christo Kurisummoottil Thomas, Walid Saad, Virginia Tech, United States
- MA7a.4: Second-Order Analysis of CSMA Protocols for Age-of-Information Minimization.....126
Siqi Fan, I-Hong Hou, Texas A&M University, United States

MACa: Mathematics in Generative AI

MA1b: Underwater Communications

- MA1b.1: Re-Planning Versus Learning: Fair Scheduling for Underwater Acoustic Networks131
under Model Shift
Chen Peng, Urbashi Mitra, University of Southern California, United States
- MA1b.2: UWGS: Geometry-Based Enhanced Time Synchronization in Underwater Acoustic137
Mobile Networks
Matin Ghalkhani, Filippo Campagnaro, Jianyu Zhang, University of Padova, Italy; Michele Zorzi, Wireless and More s.r.l., Italy

MA1b.3: Universal Partitioning of a Large Array for Communications in Environments with Limited Spatial Coherence	142
<i>Yongjie Zhuang, Stony Brook University, United States; John Buck, University of Massachusetts Dartmouth, United States; Andrew Singer, Stony Brook University, United States</i>	
MA1b.4: Acoustic Communication in the High Doppler Regime: Synchronization Revisited.....	147
<i>Zhengnan Li, Diego Cui, Milica Stojanovic, Northeastern University, United States</i>	
MA2b: Signal Processing in Near-Field Communications	
MA2b.1: Estimation of Near-Field Line-of-Sight Channels: A Multidimensional Polynomial Phase Approach	152
<i>Heedong Do, Korea University, Republic of Korea; Angel Lozano, Univ. Pompeu Fabra, Spain; Namyoon Lee, Korea University, Republic of Korea</i>	
MA2b.2: Plane-Wave Analysis of Near-Field Communications	158
<i>Thomas Marzetta, New York University, United States</i>	
MA2b.3: Electromagnetic near-field codebook design for general antenna arrays	163
<i>Miguel Castellanos, North Carolina State University, United States; Robert Heath, University of California San Diego, United States</i>	
MA2b.4: Achieving Beamfocusing via Two Separated Uniform Linear Arrays.....	168
<i>Alva Kosasih, KTH Royal Institute, Sweden; Özlem Tugfe Demir, TOBB University of Economics and Technology, Turkey; Emil Björnson, KTH Royal Institute, Sweden</i>	
MA3b: Data-driven Optimization for Transportation Networks	
MA3b.1: A convex design for transportation networks based on sparsity and the Legendre transform	173
<i>Fernando Real-Rojas, Victor M. Tenorio, Antonio G. Marques, King Juan Carlos University, Spain</i>	
MA3b.3: Transportation Network Design Under Passenger Choice.....	178
<i>Pushpendra Singh, Dartmouth, United States; Fernando Real-Rojas, Universidad Rey Juan Carlos, Spain; Vikrant Vaze, Dartmouth, United States; Victor Tenorio, Universidad Rey Juan Carlos, Spain</i>	
MA4b: Trustworthy Learning I	
MA4b.1: Derivation of Information-Theoretically Optimal Adversarial Attacks with Applications to Robust Machine Learning	183
<i>Jirong Yi, Raghu Mudumbai, Weiyu Xu, University of Iowa, United States</i>	
MA4b.2: Adversarial Inverse Learning of Defense Policies Conditioned on Human Factor Models	188
<i>Amirhossein Ravari, Northeastern University, United States; Guangyu Jiang, Zuyuan Zhang, George Washington University, United States; Mahdi Imani, Northeastern University, United States; Robert H. Thomson, Aryn A. Pyke, Nathaniel D. Bastian, United States Military Academy, West Point, United States; Tian Lan, George Washington University, United States</i>	
MA4b.3: Learning Fair Robustness via Domain Mixup	196
<i>Meiyu Zhong, Ravi Tandon, University of Arizona, United States</i>	
MA4b.4: Causal Discovery with Unequal Edge Error Tolerance.....	203
<i>Joni Shaska, Urbashi Mitra, University of Southern California, United States</i>	
MA5b: MIMO Radar	
MA5b.1: MIMO Beampattern Synthesis using Adaptive Frequency Modulated Waveforms.....	208
<i>David Hague, Naval Undersea Warfare Center, United States</i>	
MA5b.2: Passive detection with a multi-rank beamformer of a random signal common to two sensors.....	213
<i>David Ramírez, Universidad Carlos III de Madrid, Spain; Ignacio Santamaria, Universidad de Cantabria, Spain; Louis L. Scharf, Colorado State University, United States</i>	
MA5b.3: Optimal Self-Calibration for Collaborative Sensing in mmWave Radar Networks.....	218
<i>Anirban Banik, Yasamin Mostofi, University of California, Santa Barbara, United States; Ashutosh Sabharwal, Rice University, United States; Upamanyu Madhow, University of California, Santa Barbara, United States</i>	

MA5b.4: Performance Assessment of GLRT Statistics for Channel Matrix-based Cognitive Radar	223
<i>Touseef Ali, Arizona State University, United States; Christ Richmond, Duke University, United States</i>	
MA6b: Neural Signal Processing	
MA6b.1: Simultaneous localization of multiple oscillations using dynamic solutions to the inverse problem in E/MEG source analysis	228
<i>Mingjian He, Proloy Das, Stanford University, United States; Amanda Beck, Massachusetts Institute of Technology, United States; Gladia Hotan, A*STAR, United States; Patrick Purdon, Stanford University, United States</i>	
MA6b.2: An Instrumental Variable Approach to Functional Network Discovery from Optogenetic Experiments	234
<i>S Pardis Hajiseyedrazi, Behdash Babadi, University of Maryland, United States</i>	
MA6b.3: Canonical Parameterization of Neural Power Spectra for the Detection of Mild Traumatic Brain Injury	239
<i>Anderson Roy Phillips, Aila Teimouri, Behnaam Aazhang, Rice University, United States</i>	
MA6b.4: Variational Covariance Smoothing for Dynamic Functional Connectivity Analysis	245
<i>Ruwanthi Abeyssekara, Jonathan Simon, Behdash Babadi, University of Maryland, United States</i>	
MA7b: Tensor Models for Signal Processing and Machine Learning	
MA7b.1: Three-Dimensional Signal Processing: A New Approach in Dynamical Sampling via Tensor Products	250
<i>Yisen Wang, Michigan State University, United States; HanQin Cai, University of Central Florida, United States; Longxiu Huang, Michigan State University, United States</i>	
MA7b.2: Hyperspectral Band Selection Based on Generalized 3DTV and Tensor CUR Decomposition	255
<i>Katherine Henneberger, Jing Qin, University of Kentucky, United States</i>	
MA7b.3: Stratified Non-Negative Tensor Factorization	260
<i>Alexander Sietsema, Zerrin Vural, James Chapman, Yotam Yaniv, Deanna Needell, University of California, Los Angeles, United States</i>	
MA7b.4: AltGDmin for Accelerated L+S Dynamic MRI	265
<i>Silpa Babu, Namrata Vaswani, IOWA STATE UNIVERSITY, United States</i>	
MACb: Sequential Methods and Reinforcement Learning	
MA8b-1: Computer Arithmetic	
MA8b-1.1: Stable Single-Stage 2-way Merge Sorters	270
<i>Robert Kent, Marios Pattichis, University of New Mexico, United States</i>	
MA8b-1.2: Logarithmic Format for Quantization on Forward Passes with High Accuracy	293
<i>Kristalys Ruiz-Rohena, Johnatan Garcia, Mayra Robles, Martine Ceberio, Christoph Lauter, University of Texas at El Paso, United States</i>	
MA8b-1.3: Efficient Arithmetic and Logic Unit (ALU) Design Based on Recursive Multi-Function Circuits	314
<i>Sébastien Roy, Université de Sherbrooke, Canada</i>	
MA8b-2: Signal Processing (for) Hardware	
MA8b-2.1: An Optimized Nearest Neighbor Compliant Quantum Circuit for 5-qubit Code	278
<i>Arijit Mondal, Keshab Parhi, University of Minnesota, United States</i>	
MA8b-2.2: Deep-Unrolling Multidimensional Harmonic Retrieval Algorithms on Neuromorphic Hardware	298
<i>Vlad Costin Andrei, Alexandru-Paul Drăguțoiu, Technical University of Munich, Germany; Gabriel Béna, Imperial College, United Kingdom; Mahmoud Akl, SpiNNcloud Systems GmbH, Germany; Yin Li, Technical University of Munich, Germany; Matthias Lohrmann, SpiNNcloud Systems GmbH, Germany; Ullrich Mönich, Holger Boche, Technical University of Munich, Germany</i>	

MA8b-2.3: Novel Update Model with Improved Write Rates for Coded Data Storage.....	322
<i>Lev Tautz, Lara Dolecek, UCLA, United States</i>	
MA8b-2.4: A Software-Defined and Distributed Wi-Fi Channel-State Information Acquisition	338
Testbed	
<i>Frederik Zumegen, Christoph Studer, ETH Zurich, Switzerland</i>	
MA8b-2.5: Zero-Copy AI-augmented Signal Processing Pipeline on Heterogeneous Satellite	354
Processors	
<i>Michael Petry, Andreas Koch, Airbus Defence and Space / Technical University of Munich, Germany; Martin Werner, Technical University of Munich, Germany</i>	
MA8b-3: Speech Signal Processing	
MA8b-3.1: Speech Pathology Classification.....	283
<i>Athina Gourou, Samouil Pratzioti, Constantine Kotropoulos, Aristotle University of Thessaloniki, Greece</i>	
MA8b-3.2: Systematic Study of Dysarthric Speech Recognition: Spectral Features and	303
Acoustic Models	
<i>Paban Sapkota, Hemant Kumar Kathania, National Institute of Technology Sikkim, India; Mikko Kurimo, Aalto University, Finland; Sudarsana Reddy Kadiri, Shrikanth Narayanan, University of Southern California, United States</i>	
MA8b-3.3: Comparative Analysis of ASR Methods for Speech Deepfake Detection.....	329
<i>Davide Salvi, Politecnico di Milano, Italy; Amit Kumar Singh Yadav, Kratika Bhagtani, Purdue University, United States; Viola Negroni, Paolo Bestagini, Politecnico di Milano, Italy; Edward Delp, Purdue University, United States</i>	
MA8b-3.4: Improving End-to-End Speech Recognition for Dysarthric Speech through In-Domain	345
Data Augmentation	
<i>Paban Sapkota, Hemant Kumar Kathania, National Institute of Technology Sikkim, India; Sudarsana Kadiri, Shrikanth Narayanan, University of Southern California, United States</i>	
MA8b-3.5: Improving Fairness in Synthetic Speech Detectors	362
<i>Amit Kumar Singh Yadav, Kratika Bhagtani, Purdue University, United States; Paolo Bestagini, Politecnico di Milano, Italy; Edward J. Delp, Purdue University, United States</i>	
MA8b-4: Image Analysis	
MA8b-4.1: Generative Multiplane Image (GMPI): Text to Volumetric Representation	288
<i>Dewei Hu, Vanderbilt University, United States; Dae Yeol Lee, Guan-Ming Su, Dolby Laboratories, United States</i>	
MA8b-4.2: 2.5D Super-Resolution Approaches for X-ray Computed Tomography-based Inspection	308
of Additively Manufactured Parts	
<i>Haley Duba-Sullivan, Aniket Pramanik, Singanallur Venkatakrishnan, Amirkoushyar Ziabari, Oak Ridge National Laboratory, United States</i>	
MA8b-4.3: Semantic Image Segmentation Annotation Refinement using SAM	334
<i>Jan-Christoph Krabbe, Adrian Bauer, Kevin Kollek, Jörg Velten, Anton Kummert, University of Wuppertal, Germany</i>	
MA8b-4.4: RoofSAM: Adapting the Segment Anything Model to Rooftop Classification in	350
Aerial Images	
<i>Adrian Bauer, Jan-Christoph Krabbe, Kevin Kollek, Jörg Velten, Anton Kummert, University of Wuppertal, Germany</i>	
MA8b-4.5: On the Robustness of Out-of-Distribution Detection Methods for Camera-based	367
Systems	
<i>Christian Huber, Bernhard Lehner, Silicon Austria Labs GmbH, Austria; Claus Hofmann, Bernhard Moser, Reinhard Feger, Johannes Kepler University, Austria</i>	
MP1b: Semantic and Goal-Oriented Communications	
MP1b.1: Transformer-Aided Semantic Communications.....	372
<i>Matin Mortaheb, University of Maryland, United States; Mohammad A. (Amir) Khojastepour, NEC Laboratories America, United States; Sennur Ulukus, University of Maryland, United States</i>	

MP1b.2: Goal-oriented Communications based on Recursive Early Exit Neural Networks	378
<i>Jary Pomponi, Alessio Devoto, Paolo Di Lorenzo, Simone Scardapane, Sapienza, University of Rome, Italy</i>	
MP1b.3: Deep Unfolding Based Precoding for Task-Oriented Semantic Communications Over MIMO Channels	383
<i>Chang Cai, The Chinese Universty of Hong Kong, Hong Kong SAR of China; Xiaojun Yuan, University of Electronic Science and Technology of China, China; Ying-Jun Angela Zhang, The Chinese Universty of Hong Kong, Hong Kong SAR of China</i>	
MP1b.4: Goal-oriented Real-time Tracking in a Status Update System Under Imperfect Feedback	391
<i>Saeid Sadeghi Vilni, Abolfazl Zakeri, University of oulu, Finland; Mohammad Moltafet, University of California at Santa Cruz, United States; Marian Codreanu, Linköping University, Sweden</i>	
MP2b: Integrating Sensing and Communication in Multiantenna Systems	
MP2b.1: Sparse MIMO Array Design Using Uplink-Downlink Duality and Hole-free Zone Co-array Sensing	396
<i>Ids van der Werf, Delft University of Technology, Netherlands; Sundeep Prabhakar Chepuri, Indian Institute of Science, India; Geert Leus, Delft University of Technology, Netherlands</i>	
MP2b.2: Digital Twin Assisted Beamforming Design for Integrated Sensing and Communication Systems	401
<i>Shuai Feng Jiang, Ahmed Alkhateeb, Arizona State University, United States</i>	
MP2b.4: Collaborative Position and Orientation Tracking in mmWave Vehicular Systems Exploiting V2I and V2V Links	407
<i>Yun Chen, Nuria González-Prelcic, University of California San Diego, United States; Takayuki Shimizu, Chinmay Mahabal, Toyota Motor North America, United States</i>	
MP3b: Advances in Graph Signal Processing and Learning	
MP3b.1: Graph Signal Processing for Compositional Data	413
<i>Dimitrios Kalodikis, Gerald Matz, TU Wien, Austria</i>	
MP3b.2: Identifying Anomalous Edges with Link Sampling and Consensus	418
<i>Abdullah Karaaslanli, Panagiotis Traganitis, Selin Aviyente, Michigan State University, United States</i>	
MP3b.3: Convolutional Learning on Directed Acyclic Graphs	423
<i>Samuel Rey, Rey Juan Carlos University, Spain; Hamed Ajorlou, Gonzalo Mateos, University of Rochester, Spain</i>	
MP3b.4: Computationally Efficient Active Learning of Gaussian Graphical Models	428
<i>Abrar Zahin, Gautam Dasarathy, Arizona State University, United States</i>	
MP4b: Information Theoretic Methods for Machine Learning	
MP5b: Machine Learning for Integrated Sensing and Communications	
MP5b.1: A Memory-Based Reinforcement Learning Approach to Integrated Sensing and Communication	433
<i>Homa Nikbakht, Princeton University, United States; Michèle Wigger, Télécom Paris, France; Shlomo Shamai (Shitz), Technion, Israel; H. Vincent Poor, Princeton University, United States</i>	
MP5b.2: GFlowNet-Based Antenna Selection for ISAC Systems under the Presence of Eavesdroppers	438
<i>Spilios Evmorfos, Athina Petropulu, Rutgers University, United States</i>	
MP5b.3: BeamSpace and Frequency Domain ISAC Resource Allocation using Reinforcement Learning	443
<i>Majdoddin Esfandiari, Petteri Pulkkinen, Visa Koivunen, Aalto university, Finland</i>	
MP5b.4: Sparse Neural Precoders for Distributed Integrated Sensing and Communication Systems	450
<i>Soumyadeep Chatterjee, R.S. Prasobh Sankar, Sundeep Prabhakar Chepuri, Indian Institute of Science Bengaluru, India</i>	

MP6b: Deep Learning and Transformers

- MP6b.1: Expert-Guided Transformers: Advancing CAD Diagnosis455
Riya Salian, Ayan Banerjee, Payal Kamboj, Anil Sriramaju, Srivathsan Komandoor, Sandeep Gupta, Arizona State University, United States
- MP6b.2: Deep Learning under Instance-dependent Label Noise: A Tensor Factorization460
Perspective
Diego Linares Gonzalez, Shahana Ibrahim, University of Central Florida, United States
- MP6b.3: Vision Transformer for Arrhythmia Classification465
Dorsa Esmailpourmoghaddam, Rice University, United States; Mehdi Razavi, The Texas Heart Institute, United States; Behnaam Aazhang, Rice University, United States
- MP6b.4: Joint Source-Environment Adaptation for Deep Learning-Based Underwater Acoustic470
Source Ranging
Dariush Kari, University of Illinois Urbana-Champaign, United States; Andrew Singer, Stony Brook University, United States

MP7b: Video Analysis

- MP7b.1: Dynamic Average Consensus for Improving Classifier Accuracy for Multi-Camera475
Video Sequences
Soumee Guha, Lisa S. Berlizova, Zongli Lin, Scott T. Acton, University of Virginia, United States
- MP7b.3: Event-Based Video Frame Extrapolation with Recurrent Neural Networks.....480
Sri Harsha Musunuri, Anustup Choudhury, Guan-Ming Su, Dolby Laboratories Inc., United States; Seobin Park, The University of Texas at Austin, United States
- MP7b.4: Estimating Cervical Range of Motion using Computer Vision.....485
Nishad Kulkarni, Children's National Hospital, United States; Sarah Dance, Kevin Cleary, Faisal Munajjad, Matthew Oetgen, Childrens National Hospital, United States; Syed Anwar, Children's National Hospital, United States

MP8b-1: Signal Processing for Biomedical Signal and Image Processing

- MP8b-1.1: The "Flight of the Bumblebee" by Hough Transform of Doppler Radar Images490
Herbert Aumann, Margery Aumann, Maine Biosensors LLC, United States; Nuri Emanetoglu, University of Maine, United States
- MP8b-1.2: Nested Inheritance Dynamics.....494
Bahman Moraffah, Arizona State University, United States
- MP8b-1.3: EIT Heartbeat Signal Segmentation by Fourier Based Synchrosqueezing.....499
Henryk Richter, Fabian Müller-Graf, Jonas Merz, Amelie Zitzmann, Stefan Böhm, Daniel Reuter, Volker Kühn, University of Rostock, Germany
- MP8b-1.4: Decoding movement initiation in a brain-computer interface for real-time speech504
synthesis
Belinda Okomeng, Jonathan Brumberg, University of Kansas, United States
- MP8b-1.5: Weight Transfer in the Reinforcement Learning Model of Songbird Acquisition509
Khue Tran, Alexei Koulakov, Cold Spring Harbor Laboratory, United States
- MP8b-1.6: P3T: A Transformer Model for Enhancing Character Recognition Rates in P300514
Speller Systems
Jiazhen Hong, Laleh Najafizadeh, Rutgers, The State University of New Jersey, United States
- MP8b-1.7: Temporal analysis of infectious diseases.....519
Lavanya Shri S A, Mahesh Banavar, Clarkson University, United States
- MP8b-1.8: Recurrent Neural Network model of the olfactory system develops primacy and524
predictive coding
Cyrille Mascart, Alexei Koulakov, CSHL, United States
- MP8b-1.9: User Authentication and Vital Signs Extraction from Low-Frame-Rate and531
Monochrome No-contact Fingerprint Captures
Olaoluwayimika Olugbenle, Naveenkumar Venkataswamy, Arfina Rahman, Logan Drake, Yemi Afolayanka, Mahesh Banavar, Masudul Imtiaz, Clarkson University, United States

MP8b-1.10: Deepnose: An Equivariant Convolutional Neural Network Predictive Of Human Olfactory Percepts	536
<i>Sergey Shuvaev, Khue Tran, Khristina Samoilova, Cyrille Mascart, Alexei Koulakov, Cold Spring Harbor Laboratory, United States</i>	
MP8b-1.11: Topological Data Analysis for Robust Classification of Circulating Cancer Cells	544
<i>Yongjian Yu, Axon Connected, LLC, United States; Jue Wang, Union College, United States</i>	
MP8b-1.12: Improved Dictionary Learning for fMRI Data Analysis for Capturing Common and Individual Neural Activation Maps	549
<i>Shuai Xu, Rui Jin, Seung-Jun Kim, University of Maryland, Baltimore County, United States</i>	
MP8b-1.13: STORM: Strategic Orchestration of Modalities for Rare Event Classification	554
<i>Payal Kamboj, Ayan Banerjee, Sandeep K.S. Gupta, Arizona State University, United States</i>	
MP8b-1.14: Electrooculogram Signal Analysis in Quantifying Sleep Apnea	559
<i>Tien Loc Le, Karl Magtibay, Toronto Metropolitan University, Canada; Hans Katzberg, Toronto General Hospital, Canada; Mark Boulos, Sunnybrook Health Sciences Centre, Canada; Karthi Umamathy, Toronto Metropolitan University, Canada</i>	
MP8b-1.15: Contrastive Principal Component Analysis in the Time-Frequency Domain for EEG Data Reduction	563
<i>Nathan Marchywka, Selin Aiyente, Michigan State University, United States</i>	
MP8b-1.16: Integrate-and-Fire from a Mathematical and Signal Processing Perspective	567
<i>Bernhard A. Moser, JKU, Austria</i>	
TA1a: Model-based Learning for Array Processing	
TA1a.1: Optimization of Iterative Blind Detection based on Expectation Maximization and Belief Propagation	572
<i>Luca Schmid, Karlsruhe Institute of Technology, Germany; Tomer Raviv, Nir Shlezinger, Ben-Gurion University of the Negev, Israel; Laurent Schmalen, Karlsruhe Institute of Technology, Germany</i>	
TA1a.2: Enhancing Off-Grid One-Bit DOA Estimation with Learning-based Sparse Bayesian Approach for Non-Uniform Sparse Array	577
<i>Yunqiao Hu, Shunqiao Sun, The University of Alabama, United States; Yimin D. Zhang, Temple University, United States</i>	
TA1a.3: Codebook-Based Downlink Beamforming with Imperfect CSI using Model-Driven Deep Learning	583
<i>Lukas Schynol, Moritz Hemsing, Marius Pesavento, Technical University of Darmstadt, Germany</i>	
TA1a.4: Multiuser Fair Resource Allocation for Block-stationary Wireless Channels.....	591
<i>Reza Ramezanpour, Santiago Segarra, Ashutosh Sabharwal, Rice University, United States</i>	
TA2a: MIMO Communication with Dynamic Metasurface Antennas	
TA2a.1: 3D Electromagnetic Signal Processing.....	596
<i>Davide Dardari, University of Bologna, Italy</i>	
TA2a.2: Computational Angle of Arrival Detection using Dynamic Metasurfaces	602
<i>Idban Alamzadeh, Travis Williams, Mohammadreza Imani, Arizona State University, United States</i>	
TA2a.3: Near-Field Full-Duplex Integrated Sensing and Communication with Dynamic Metasurface Antennas	609
<i>Murat Bayraktar, Nuria González-Prelcic, University of California San Diego, United States; Hao Chen, Charlie Jianzhong Zhang, Samsung Research America, United States</i>	
TA2a.4: Analysis of dynamic metasurface antennas under matching network constraints.....	614
<i>Nitish Deshpande, University of California San Diego, United States; Joseph Carlson, Miguel Castellanos, North Carolina State University, United States; Robert Heath, University of California San Diego, United States</i>	

TA3a: Distributed Optimization and Learning

- TA3a.2: Proximally Regularized Multitask Learning over Networks619
Stefan Vlaski, Imperial College London, United Kingdom; Roula Nassif, Université Côte d’Azur, France
- TA3a.4: ADMM for Downlink Beamforming in Cell-Free Massive MIMO Systems.....623
Mehdi Zafari, Divyanshu Pandey, Rahman Doost-Mohammady, César A. Uribe, Rice University, United States

TA4a: Multi-agent Reinforcement Learning

- TA4a.1: A Tensor Low-Rank Approximation for Value Functions in Multi-Task Reinforcement Learning629
Sergio Rozada, King Juan Carlos University, Spain; Santiago Paternain, Rensselaer Polytechnic Institute, United States; Juan Andrés Bazarque, University of Pittsburgh, United States; Antonio G. Marques, King Juan Carlos University, Spain
- TA4a.3: Bimodal Bandits: Max-Mean Regret Minimization634
Adit Jain, Cornell University, United States; Sujay Bhatt, JP Morgan Chase and Co., United States; Vikram Krishnamurthy, Cornell University, United States; Alec Koppel, JP Morgan Chase and Co., United States

TA5a: Synthetic Aperture ISAC

- TA5a.1: Early-Late Correlation for Wideband Interference AoA Estimation and Suppression in Analog Uniformly Spaced Linear TTD Arrays639
Foad Beheshti, Washington State University, United States; Ruifu Li, University of California, Los Angeles, United States; Subhanshu Gupta, Washington State University, United States; Danijela Cabric, University of California, Los Angeles, United States
- TA5a.2: Multi-Static Cell-Free Massive MIMO ISAC: Performance Analysis and Power Allocation647
Nhan Nguyen, Tianyu Fang, Markku Juntti, University of Oulu, Finland; Hien Quoc Ngo, Queen’s University Belfast, United Kingdom
- TA5a.4: Sense and Jam: ISAC-aided Robust Physical Layer Security.....653
Hamza Naim Shaikh, Nazarbayev University, Kazakhstan; Abdulkadir Celik, Ahmed M. Eltawil, KAUST, Saudi Arabia; Galymzhan Nauryzbayev, Nazarbayev University, Kazakhstan

TA6a: Computational Imaging

- TA6a.1: Edge Projection-Based Adaptive View Selection for Cone-Beam CT.....658
Jingsong Lin, Purdue University, United States; Singanallur Venkatakrisnan, Oak Ridge National Lab, United States; Gregory Buzzard, Purdue University, United States; Amir Ziabari, Oak Ridge National Lab, United States; Charles Bouman, Purdue University, United States
- TA6a.3: Multi-pose Fusion for Autonomous Polycrystalline Material Decomposition in Hyperspectral Neutron Tomography664
Diyu Yang, Purdue University, United States; Mohammad Chowdhury, Purdue University, United States; Shimin Tang, Singanallur Venkatakrisnan, Hassina Bilheux, Oak Ridge National Laboratory, United States; Gregory Buzzard, Charles Bouman, Purdue University, United States

TA7a: Speech Classification and Recognition

- TA7a.2: Explainable Camera Model Identification Employing log-Mel Spectrograms from Videos’ Audio669
Christos Korgialas, Ioannis Tsingalis, George Tzolopoulos, Constantine Kotropoulos, Aristotle University of Thessaloniki, Greece
- TA7a.3: Quantum Machine Learning and Spectrogram Fusion for Speech Recognition674
Leslie Miller, Glen Uehara, Tanay Kamlesh Patel, Salil Naik, Andreas Spanias, Arizona State University, United States
- TA7a.4: Navajo Speech Recognition Using Low-Resource Language Models679
Emery Sutherland, Melvatha R. Chee, Marios S. Pattichis, The University of New Mexico, United States

TA8a-1: Communications Systems and Networks

TA8a-1.1: Over-the-Air Collaborative Inference with Feature Differential Privacy.....	684
<i>Mohamed Seif, Yuqi Nie, Andrea Goldsmith, Vincent Poor, Princeton University, United States</i>	
TA8a-1.2: An Unconditionally Secure and Non-malleable Encryption Scheme for Cloud Storage	689
<i>Mohammad Moltafet, Hamid R. Sadjadpour, Zouheir Rezki, University of California Santa Cruz, United States</i>	
TA8a-1.3: Equitable Extended Reality via Cooperative NOMA in Decentralized Mobile	694
Edge Computing Systems	
<i>Robert-Jeron Reifert, Ruhr University Bochum, Germany; Hayssam Dahrouj, University of Sharjah, United Arab Emirates; Aydin Sezgin, Ruhr University Bochum, Germany</i>	
TA8a-1.4: Distance Order Statistics for Multi-Layer Satellite Constellation	701
<i>Matthew Gaydos, David Love, Purdue University, United States</i>	
TA8a-1.5: An Algorithm for Harsh Doppler Shift Estimation for Satellite Communications.....	706
<i>André B. de F. Diniz, Chalmers University, Ericsson Research, Sweden; Thomas Eriksson, Chalmers University, Sweden; Ulf Gustavsson, Ericsson Research, Sweden</i>	
TA8a-1.6: AI-based Physical Layer Secret Key Exchange in Non-Terrestrial Wireless	711
Communication Networks	
<i>Asim Ul Haq, Aarhus University, Denmark; Alben Mihovska, Sofia Technology Park, Bulgaria; Pavlos Lazaridis, University of Huddersfield, United Kingdom; H. Vincent Poor, Princeton University, United States; Vladimir K. Poulkov, Technical University of Sofia, Bulgaria; Michail J. Beliatis, Aarhus University, Denmark</i>	
TA8a-1.7: Minimizing the Age of Two Heterogeneous Sources With Packet Drops Via Cyclic	716
Schedulers	
<i>Sahan Liyanaarachchi, Sennur Ulukus, University of Maryland, College Park, United States; Nail Akar, Bilkent University, Turkey</i>	
TA8a-1.8: Beyond Privacy: Deception in Information Retrieval	721
<i>Sajani Vithana, Sennur Ulukus, University of Maryland, College Park, United States</i>	
TA8a-1.9: Secure UAV Communications By STEEP Against Full-Duplex Active Eavesdropper	726
<i>Md Saydur Rahman, Yingbo Hua, University of California Riverside, United States</i>	
TA8a-1.10: An Adaptive Framework for Generalizing Network Traffic Prediction towards	732
Uncertain Environments	
<i>Alex Downey, Virginia Tech, United States; Evren Tuna, ULAK Communications Inc, Turkey; Alkan Soysal, Virginia Tech, United States</i>	
TA8a-1.11: Primary Synchronization Signal for an Orthogonal Time Frequency Space based 5G	737
Broadcast System	
<i>Jonas von Beöczy, Technische Universität Braunschweig, Germany</i>	
TA8a-1.12: Optical OFDMA for Multi-cell/Multi-User Indoor Optical Wireless	742
Networks	
<i>Michael Rahaim, UMass Boston, United States; Arsalan Ahmed, Deutsche Telekom, Germany; Michel Kulhandjian, Rice University, United States; Hovannes Kulhandjian, California State University, Fresno, United States</i>	
TA8a-1.13: Opportunistic Information Bottleneck for Edge-assisted Goal-Oriented	748
Communications	
<i>Francesco Binucci, Paolo Banelli, University of Perugia, Italy</i>	
TA8a-1.14: ML-based Low-Density Spreading Code Design.....	754
<i>Hanchao Yang, Virginia Tech, United States; Michel Kulhandjian, Rice University, United States; Hovannes Kulhandjian, Daniel J. Jakubisin, Xiang Cheng, Kumar Sai Bondada, Yaling Yang, Virginia Tech, United States</i>	
TA8a-1.15: High Dimensional User-Specific Channel Generation for CSI Compression using	759
Diffusion Models	
<i>Taekyun Lee, Juseong Park, Hyeji Kim, Jeffrey G. Andrews, The University of Texas at Austin, United States</i>	

TA8a-2: Physical Layer Communications and Signal Processing

TA8a-2.1: Digital Post-Distortion for DFT-s-OFDM.....	764
<i>Huseyin Babaroglu, Lauri Anttila, Vesa Lampu, Tampere University, Finland; Oskari Tervo, Esa Tirola, Nokia, Finland; Mikko Valkama, Tampere University, Finland</i>	

TA8a-2.2: A Novel Paradigm of Polarization Reconfigurable NOMA with Dynamic Ordered SIC	771
<i>Julio Acevedo, Thong Ngo, Paul Oh, Hen-Geul Yeh, Sean Kwon, California State University Long Beach, United States</i>	
TA8a-2.3: Self-Nomination Based Feedback Reduction for MU-MIMO	776
<i>Juseong Park, Jeffrey Andrews, The University of Texas at Austin, United States</i>	
TA8a-2.5: Capacity and Sensitivity Analysis of MISO Receivers with Antenna Impedance Estimation	781
<i>Shaohan Wu, EdgeQ Inc., United States</i>	
TA8a-2.6: Optimizing Puncturing Patterns of 5G NR LDPC Codes for Few-Iteration Decoding	788
<i>Reinhard Wiesmayr, Darja Nonaca, ETH Zurich, Switzerland; Chris Dick, NVIDIA, United States; Christoph Studer, ETH Zurich, Switzerland</i>	
TA8a-2.7: Practical Waveform Design for ISAC Systems: An Instrumental Variable Approach.....	795
<i>Byunghyun Lee, Hwanjin Kim, David Love, James Krogmeier, Purdue University, United States</i>	
TA8a-2.8: Capacity of a Binary Channel with a Time-Bounded Adversary.....	801
<i>Mingjun Ying, Fatih Berkay Sarpkaya, Serhat Bakirtas, Elza Erkip, Theodore Rappaport, Sundeep Rangan, New York University, United States</i>	
TA8a-2.9: Hammerstein Self-Interference Cancellation for FDD in Adjacent Bands.....	806
<i>Ephraim Fuchs, Stephan ten Brink, University of Stuttgart, Germany</i>	
TA8a-2.10: Active Antenna System (AAS) Optimization for Coexistence Considerations.....	812
<i>Vasanthan Raghavan, Mustafa Emara, Marco Papaleo, Ozge Koymen, Junyi Li, Edward Tiedemann, Jr., Qualcomm, United States</i>	
TA8a-2.11: AFDM Chirp-Permutation-Index Modulation with Quantum-Accelerated Codebook Design	817
<i>Hyeon Seok Rou, Constructor University, Germany; Kein Yuki Yoshi, Taku Mikuriya, Yokohama National University, Japan; Giuseppe Thadeu Freitas de Abreu, Constructor University, Germany; Naoki Ishikawa, Yokohama National University, Japan</i>	
TA8a-2.12: Hardware Distortion Modeling for Panel Selection in Large Intelligent Surfaces	822
<i>Ashkan Sheikhi, Juan Vidal Alegría, Ove Edfors, Lund University, Sweden</i>	
TA8a-2.13: Rate-Splitting MIMO Multiple Access --- An Amortized Optimization Approach.....	827
<i>Jeremy Johnston, Xiaodong Wang, Columbia University, United States</i>	
TA1b: Satellite Communications	
TA1b.1: Enhanced Time Division Duplexing Slot Allocation and Scheduling in Non-Terrestrial Networks	835
<i>Matteo Pagin, Alessandro Traspadini, Marco Giordani, Michele Zorzi, University of Padova, Italy</i>	
TA1b.3: DeepSatLoc: A multimodal fusion strategy for enhanced localization in urban canyons exploiting GPS and LEO satellite communication signals	842
<i>Bibhor Kumar, North Carolina State University, United States; Yun Chen, Nuria González-Prelcic, University of California San Diego, United States; Takayuki Shimizu, Akila Ganlath, Toyota Motor North America, United States</i>	
TA1b.4: Non-Terrestrial Networks for Space Vehicles beyond 6G: Applications, Architecture, and Capacity Limits	850
<i>Sergi Aliaga, Northeastern University, United States; Vitaly Petrov, KTH Royal Institute of Technology, Sweden; Ahmad Masihi, Northeastern University, United States; Marc Sanchez, NASA Jet Propulsion Laboratory, United States; Josep Jornet, Northeastern University, United States</i>	
TA2b: Advances in mmWave Array Architectures, Algorithms and Applications	
TA2b.1: Near-Field Beam Training with Analog Extremely Large True-Time-Delay Arrays.....	858
<i>Ibrahim Pehlivan, University of California Los Angeles, United States; Mehmet Cagri Ilter, Mikko Valkama, Tampere University, Finland; Danijela Cabric, University of California Los Angeles, United States</i>	
TA2b.2: Active Beam Learning for Full-Duplex Wireless Systems.....	865
<i>Hancheng Li, Ian Roberts, UCLA, United States</i>	

TA2b.3: Space-Time Beamforming for Satellite Communications.....	870
<i>Namyoon Lee, Korea University, Republic of Korea; Jungbin Lim, POSTECH, Republic of Korea; Jeounghun Park, Yonsei University, Republic of Korea</i>	
TA2b.4: Beamforming with Joint Phase and Time Array: System Design, Prototyping and Performance	875
<i>Jianhua Mo, Ahmad AlAmmouri, Shenggang Dong, Younghan Nam, Won-Suk Choi, Gary Xu, Charlie Zhang, Samsung Research America, United States</i>	
TA3b: Joint Sensing and Communication	
TA3b.1: Subscription-Based Joint 5G-Radar System Design and Analysis.....	882
<i>Yukang Fu, Alex Chiriyath, Daniel Bliss, Arizona State University, United States</i>	
TA3b.2: Communicate or Sense? AP Mode Selection in mmWave Cell-Free Massive MIMO-ISAC	889
<i>Weixian Yan, Ozan Alp Topal, Zinat Behdad, KTH Royal Institute of Technology, Sweden; Özlem Tuğfe Demir, TOBB University of Economics and Technology, Turkey; Cicek Cavdar, KTH Royal Institute of Technology, Sweden</i>	
TA3b.3: Frequency Modulated Waveforms for Integrated Imaging and Communications	894
<i>Peter Vouras, U.S. Department of Defense, United States</i>	
TA3b.4: CRB Optimization for Joint Array Partitioning and Beamforming Design in ISAC Systems	898
<i>Rang Liu, A. Lee Swindlehurst, University of California Irvine, United States; Ming Li, Dalian University of Technology, China</i>	
TA4b: Optimization	
TA4b.1: Difference-of-Convex Approximation Methods for the Affine Sparsity Constraints for Hierarchical Variable Selection	903
<i>Chengyu Ke, American Airlines Inc., United States; Miju Ahn, Southern Methodist University, United States</i>	
TA4b.2: Almost multiseant BFGS quasi-Newton method	908
<i>Mokhwa Lee, Yifan Sun, Stony Brook University, United States</i>	
TA4b.3: Discrete Aware Matrix Completion via Convexized ℓ_0 -Norm Approximation.....	916
<i>Niclas Führling, Kengo Ando, Giuseppe Thadeu Freitas de Abreu, Constructor University, Germany; David Gonzalez G., Osvaldo Gonsa, Continental AG, Germany</i>	
TA4b.4: Generalized model recovery from sampled data.....	921
<i>Ayan Banerjee, Sandeep Gupta, Arizona State University, United States</i>	
TA5b: Advances in Video Analysis	
TA5b.1: Student Engagement Assessment in Classrooms Using a Novel 3D Eye-gaze Estimation and Evaluation Algorithm	926
<i>Matthew Korban, Jonathan Thomas McGee, Peter Youngs, Scott T. Acton, University of Virginia, United States</i>	
TA5b.2: Dynamic 3D Scene Reconstruction from Classroom Videos	931
<i>Sebastian Janampa, Phuong Tran, Erik Guaderrama, University of New Mexico, United States; Sylvia Celedon-Pattichis, University of Texas at Austin, United States; Marios Pattichis, University of New Mexico, United States</i>	
TA5b.3: Facial Image and Video Pain Intensity Estimation.....	937
<i>Melpo Pittara, University of Groningen, Netherlands; Andreas Anastasiou, Konstantinos Andreou, University of Cyprus, Cyprus; Andreas Panayides, CYENS Centre of Excellence, Cyprus; Nicolai Petkov, University of Groningen, Cyprus; Constantinos Pattichis, University of Cyprus & CYENS Centre of Excellence, Cyprus</i>	
TA5b.4: Adaptive Strategies For Enhancing Quality of Experience in 360° Video Streaming	945
<i>Ioanna Valiandi, CYENS CoE, Cyprus; Efthymoulos Kyriacou, Cyprus University of Technology, Cyprus; Andreas S. Panayides, CYENS CoE, Cyprus</i>	

TA6b: Physiological Signal Processing

TA6b.1: An Adaptive Marked Point Process Filtering Approach for Decoding Cognitive Performance	950
<i>Saman Khazaei, Rose T. Faghieh, New York University, United States</i>	
TA6b.2: Advancing Parkinson’s Disease Management through Multi-Shared-Task Self-Supervised Signal Processing	957
<i>Mustafa Shuqair, Florida Atlantic University, United States; Joochi Jimenez-Shahed, Icahn School of Medicine at Mount Sinai, United States; Behnaz Ghoraani, Florida Atlantic University, United States</i>	
TA6b.4: Ultra-Short Term Heart Rate Variability Estimation Using PPG And End-to-End Deep Learning	962
<i>Weinan Wang, Laleh Najafizadeh, Rutgers University, United States</i>	

TA7b: Algorithm/Architecture Co-Design Towards 6G Channel Codes

TA7b.1: Channel Coding under Silicon Implementation Constraints	967
<i>Oliver Griebel, Lucas Johannsen, Claus Kestel, Norbert Wehn, University of Kaiserslautern-Landau, Germany</i>	
TA7b.2: New perspectives on Convolutional Coding/Decoding for 6G	975
<i>Joseph Jabour, Jeremy Nadal, Stefan Weithoffer, Charbel Abdel Nour, Catherine Douillard, IMT Atlantique, France</i>	
TA7b.3: Towards 6G: Configurable High-Throughput Decoder Implementation for SC-LDPC Codes	980
<i>Yuqing Ren, Yifei Shen, Wenqing Song, EPFL, Switzerland; Alexios Balatsoukas-Stimming, TU/e, Netherlands; Emmanuel Boutillon, Universite Bretagne Sud, France; Andreas Burg, EPFL, Switzerland</i>	
TA7b.4: A Layered CPA Decoder for Reed-Muller Codes	985
<i>Jijie Li, Warren J. Gross, McGill University, Canada</i>	

TA8b-1: Information Processing with Networks and Graphs I

TA8b-1.1: Tight Local Graph Fourier Frames with Finite Support	990
<i>Philipp Reingruber, Gerald Matz, TU Wien, Austria</i>	
TA8b-1.2: An Approach of Directly Tracking Multiple Objects	995
<i>Mingchao Liang, Florian Meyer, University of California, San Diego, United States</i>	
TA8b-1.3: Peer-to-Peer Deep Learning for Beyond-5G IoT	1000
<i>Srinivasa Pranav, José M.F. Moura, Carnegie Mellon University, United States</i>	
TA8b-1.4: Distributionally Robust Power Policies for Wireless Systems under Power Fluctuation Risk	1005
<i>Gokberk Yaylali, Dionysis Kalogieras, Yale University, United States</i>	
TA8b-1.5: Byzantine-resilient Collaborative Hierarchical Non-Bayesian Learning	1013
<i>Connor Mclaughlin, Northeastern University, United States; Matthew Ding, University of California, Berkeley, United States; Deniz Erdogmus, Lili Su, Northeastern University, United States</i>	
TA8b-1.6: The Sample Complexity of Differential Analysis for Networks that Obey Conservation Laws	1020
<i>Jiajun Cheng, Anirudh Rayas, Arizona State University, United States; Rajasekhar Anguluri, University of Maryland, Baltimore County, United States; Gautam Dasarathy, Arizona State University, United States</i>	
TA8b-1.7: Cache Update Algorithms for Multicasting Without File Splitting	1025
<i>David Garrido, Universidad Carlos III of Madrid, Spain; Hashem Moradmamand, IRIB, Iran; Borja Peleato, University Carlos III of Madrid, Spain</i>	
TA8b-1.8: Multiview Graph Learning Based on Node Perturbation Model	1030
<i>Mohammad Alwardat, Selin Aviyente, Michigan State University, United States</i>	
TA8b-1.9: Graph Signal Processing: Frequency Analysis for Similar Matrices	1035
<i>John Shi, Jose Moura, Carnegie Mellon University, United States</i>	
TA8b-1.10: Distributed and Rate-Adaptive Feature Compression	1040
<i>Aditya Deshmukh, Venugopal Veeravalli, University of Illinois Urbana-Champaign, United States; Gunjan Verma, Army Research Laboratory, United States</i>	

TA8b-1.11: Spectrum Allocation and Scheduling in Conflict Graphs via Scalable Multi-agent Reinforcement Learning	1045
<i>Yiming Zhang, Dongning Guo, Northwestern University, United States</i>	
TA8b-1.12: On Sparse High-Dimensional Graph Estimation from Multi-Attribute Data	1053
<i>Jitendra Tugnait, Auburn University, United States</i>	
TA8b-2: Information Processing with Networks and Graphs II	
TA8b-2.1: Cyberattack Aware Load Frequency Control in Power Systems	1058
<i>Shahriar Rahman Fahim, Texas A&M University, United States; Rachad Atat, Texas A&M University at Qatar, Qatar; Cihat Kececi, Texas A&M University, United States; Abdulrahman Takiddin, Florida State University, United States; Muhammad Ismail, Tennessee Tech University, United States; Katherine Davis, Erchin Serpedin, Texas A&M University, United States</i>	
TA8b-2.2: Binary Relaxation on Unlabeled Graph Matching: a Twin-VAMP Approach.....	1068
<i>Akrouf Mohamed, Faouzi Bellili, Amine Mezghani, University of Manitoba, Canada</i>	
TA8b-2.3: Structure-Guided Input Graph for GNNs facing Heterophily	1080
<i>Victor M. Tenorio, King Juan Carlos University, Spain; Madeline Navarro, Rice University, United States; Samuel Rey, King Juan Carlos University, Spain; Santiago Segarra, Rice University, United States; Antonio G. Marques, King Juan Carlos University, Spain</i>	
TA8b-2.4: Form-Finding and Physical Property Predictions of Tensegrity Structures Using Deep Neural Networks	1090
<i>Muhao Chen, Jing Qin, University of Kentucky, United States</i>	
TA8b-2.5: Deep Linearization Mappings for Canonical Correlation Clustering.....	1095
<i>Akshay Malhotra, InterDigital Communications, United States; Ioannis Schizas, US Army Research Laboratory, United States; João Morais, Arizona State University, United States</i>	
TA8b-3: Multisensor Systems	
TA8b-3.1: Leveraging distributed acoustic sensing for vehicle counting in high-traffic-density environments	1063
<i>Yacine Khacef, Cédric Richard, Université Côte d'Azur, France; Charles Casimiro Cavalcante, Federal University of Ceará (UFC), Brazil; André Ferrari, Université Côte d'Azur, France</i>	
TA8b-3.2: Experimental Results on Direct Position Determination Using First-Order Scattered Reflections	1073
<i>Devanand Palur Palanivelu, Marc Oispuu, Wolfgang Koch, Fraunhofer Institute for Communication, Information Processing and Ergonomics FKIE, Germany; Thomas Dallmann, Radio Technologies for Automated and Connected Vehicles Research Group, Technische University Ilmenau, Germany</i>	
TA8b-3.3: Array Signal Processing for Small Antenna Arrays.....	1085
<i>Benjamin Friedlander, University of California Santa Cruz, United States</i>	
TA8b-3.5: Experimental Millimeter Wave ISAR Imaging of Unmanned Aerial Systems.....	1100
<i>Michael Tran, Michael Martinez, Jeffrey Krolik, Duke University, United States</i>	
TA8b-3.6: Maximum Sum-Power Wireless Reception: Some of the Antennas May Actually Radiate Positive Power	1105
<i>Brian McMinn, Thomas L. Marzetta, New York University, United States</i>	
TA8b-3.7: Single-Satellite Location of Ground Electromagnetic Interferer Exploiting Doppler Signatures	1109
<i>Yimin D. Zhang, Temple University, United States; Yanwu Ding, Khanh Pham, Wichita State University, United States; Dan Shen, Genshe Chen, Intelligent Fusion Technology, Inc., United States</i>	
TP1a: 6G Technologies	
TP1a.1: Bounds on the Minimum Number of Beamformers for Integrated Sensing and Communication	1114
<i>Kareem Attiah Alboraie, Wei Yu, University of Toronto, Canada</i>	
TP1a.3: Towards flexible LDPC coding for 6G.....	1119
<i>Paul Bezner, Jannis Clausius, Marvin Geiselhart, Tim Janz, Felix Krieg, Simon Obermüller, Daniel Tandler, Stephan ten Brink, University of Stuttgart, Germany</i>	

TP1a.4: 2-Step RACH and Unsourced Massive Random Access in Cell-Free User-Centric Networks	1126
<i>Eleni Gkiouzepe, Burak Cakmak, Giuseppe Caire, Technical University of Berlin, Germany</i>	
TP2a: Machine Learning for MIMO Communication and Sensing	
TP2a.1: BLUE Fusion for Multi-Point Localization	1134
<i>Hwanjoon Cho, Namyoon Lee, Korea University, Republic of Korea</i>	
TP2a.2: Site-Specific Beam Alignment without Explicit Channel Knowledge via Deep Learning	1139
<i>Jong Woo Kwak, Hanju Yoo, Yonsei university, Republic of Korea; Ian Roberts, University of California, Los Angeles, United States; Chan-Byoung Chae, Yonsei university, Republic of Korea</i>	
TP2a.3: A Dataset Similarity Evaluation Framework for Wireless Communications and Sensing	1144
<i>João Morais, Arizona State University, United States; Akshay Malhotra, Shahab Hamidi-Rad, InterDigital Communications, United States; Ahmed Alkhateeb, Arizona State University, United States</i>	
TP2a.4: Adaptive People Counting and Localization Based on Meta Learning with WiFi NICs	1150
<i>Jihoon Cha, Korea Advanced Institute of Science and Technology, Republic of Korea; Hwanjin Kim, Purdue University, Republic of Korea; Junil Choi, Korea Advanced Institute of Science and Technology, Republic of Korea</i>	
TP3a: Learning over Graphs	
TP3a.1: A Random Dot Product Graph Model for Weighted and Directed Networks	1155
<i>Bernardo Marenco, Paola Bermolen, Marcelo Fiori, Federico Larroca, Facultad de Ingeniería, Universidad de la República, Uruguay; Gonzalo Mateos, Department of Electrical and Computer Engineering, University of Rochester, United States</i>	
TP3a.2: Sequential Community Detection in High-Dimensional Temporal Graphs	1160
<i>Robert Malinas, Dogyoon Song, Alfred Hero, University of Michigan, United States</i>	
TP3a.4: Towards Joint graph learning and sampling set selection from data	1168
<i>Shashank Nelamangala Sridhara, Antonio Ortega, Eduardo Pavez Carvelli, University of Southern California, United States</i>	
TP4a: Machine Learning for Communications II	
TP4a.1: AI-assisted link adaptation: Predicting hybrid automatic repeat request success	1173
<i>Emre Gonultas, Swathi Dhandhapani, Stefan Adalbjörnsson, Zaigham Kazmi, Ericsson Inc., United States</i>	
TP4a.2: Robust Antenna Parameter Optimization in Cellular Networks via Adversarial Machine Learning	1178
<i>Ezgi Tekgul, The University of Texas at Austin, United States; Salam Akoum, AT&T Labs, United States; Jeffrey Andrews, The University of Texas at Austin, United States</i>	
TP4a.3: A Bayesian Learning Approach to Wireless Outdoor Heatmap Construction using Deep Gaussian Process	1183
<i>Xiang Zhang, Yanyu Hu, University of Utah, United States; Imtiaz Nasim, Shannon Eggers, Vivek Agarwal, Amitabh Mishra, Joshua Daw, Arupjyoti Bhuyan, Idaho National Laboratory, United States; Sneha Kasera, Mingyue Ji, University of Utah, United States</i>	
TP4a.4: Average Reward Reinforcement Learning for Wireless Radio Resource Management	1188
<i>Kun Yang, University of Virginia, United States; Jing Yang, The Pennsylvania State University, United States; Cong Shen, University of Virginia, United States</i>	
TP5a: Computational Sensing	
TP5a.1: Generative Deep Synthesis of MIMO Sensing Waveforms with Desired Transmit Beampattern	1194
<i>Vesa Saarinen, Robin Rajamäki, Visa Koivunen, Aalto University, Finland</i>	

TP5a.2: Monte Carlo Tree Search for Binary Inverse Problems with $O(1)$ Measurements.....	1199
<i>Osman Furkan Kar, Parthasarathi Khirwadkar, Piya Pal, University of California San Diego, United States</i>	
TP5a.3: Integrated Sensing and Communication Using Spatial Sigma-delta Quantized Arrays	1205
<i>R.S. Prasobh Sankar, Sundeep Prabhakar Chepuri, Indian Institute of Science Bengaluru, India</i>	
TP5a.4: Coded Cover for Acoustic Vector Sensors.....	1210
<i>Chenyang Yan, Delft University of Technology; KTH Royal Institute of Technology, Sweden; Dani Fernández Comesaña, Microflown Technologies, Netherlands; Geert Leus, Delft University of Technology, Netherlands</i>	
TP6a: Machine Learning in Medicine for Wearable Based Physiological Signals	
TP6a.1: Kinematic Cycle Consistency Using Wearables and RF Data for Improved Human Skeleton Estimation	1215
<i>Sultanus Salehin, Sean Kearney, Sevgi Zubeyde Gurbuz, The University of Alabama, United States</i>	
TP6a.2: Enhancing Alzheimer’s Disease Detection through Electroencephalography Channel and Feature Optimization	1220
<i>Can Dimici, Berk Katircioglu, Beren Semiz, Koc University, Turkey</i>	
TP6a.3: Deciphering Cardiac Neural Network Dynamics: From In-Vivo Recordings to Unsupervised Spike Labeling	1225
<i>Nil Z. Gurel, UCLA Cardiac Arrhythmia Center and Neurocardiology Research Program of Excellence, United States; Koustubh Sudarshan, Alex Karavos, Guy Kember, Dalhousie University, Canada; Olujimi Ajijola, UCLA Cardiac Arrhythmia Center and Neurocardiology Research Program of Excellence, United States</i>	
TP6a.4: Addressing Racial Disparities in Pulse Oximetry: A Machine Learning Perspective.....	1230
<i>Hakan Burak Karli, Bige Deniz Unluturk, Michigan State University, United States</i>	
TP7a: Hardware and Software Approaches for Efficient Deep Neural Networks	
TP7a.1: Every Bit Matters: A Hardware/Software Approach for Enabling More Powerful Machine Learning Models	1235
<i>Enrique Torres Sanchez, Milos Nikolic, Kareem Ibrahim, Alberto Delmas Lascorz, Ali Hadi Zadeh, Jiahui Wang, University of Toronto, Canada; Ameer Abdelhadi, McMaster University, Canada; Mostafa Mahmoud, Christina Giannoula, Andreas Moshovos, University of Toronto, Canada</i>	
TP7a.2: Sharpness-Aware Minimization Scaled by Outlier Normalization for Robust DNNs on In-Memory Computing Accelerators	1241
<i>Sébastien Henwood, Polytechnique Montreal, Canada; Gonçalo Mordido, Mila - Quebec AI Institute, Canada; Yvon Savaria, Polytechnique Montreal, Canada; Sarath Chandar, Mila - Quebec AI Institute, Canada; François Leduc-Primeau, Polytechnique Montreal, Canada</i>	
TP7a.3: Parameter Efficient Fine-tuning of Transformer-based Language Models using Dataset Pruning	1248
<i>Sayed Mohammadreza Tayaranian Hosseini, Seyyed Hasan Mozafari, James Clark, Brett Meyer, Warren Gross, McGill University, Canada</i>	
TP8a-1: Data Science, Machine Learning, and Adaptive Systems I	
TP8a-1.1: On the Use of Delayless Adaptive Filter Architecture for Feedback Control in Hearing Aids	1253
<i>Meng Guo, Bernhard Kuenzle, Demant, Denmark</i>	
TP8a-1.2: Quantum Calculus-based Two-Dimensional Least Mean Square Algorithm.....	1258
<i>Muhammad Moinuddin, King Abdulaziz University, Saudi Arabia; Azzedine Zerguine, King Fahd University of Petroleum and Minerals, Saudi Arabia; Ubaid M. Al-Saggaf, King Abdulaziz University, Saudi Arabia; Muhammad Arif, University of Klagenfurt, Austria</i>	
TP8a-1.3: Advanced Results Demonstrating that Lévy Firefly Bio-Inspired Algorithms Can Improve Fetal Electrocardiogram (FECG) Adaptive Signal Processing	1263
<i>Kenneth Jenkins, Pennsylvania State University, United States; Chandra Radhakrishnan, University of Illinois, Champaign-Urbana, United States</i>	

TP8a-1.4: Random suppression of ECG artifacts using a NLSRLMMN-based cascaded noise canceller	1268
<i>Mohammed Faiz, Presidency University, India; Azzedine Zerguine, KFUPM, Saudi Arabia; Izzet Kale, University of Westminster, United Kingdom</i>	
TP8a-1.5: Improved Spectral Segmentation in Wideband Data Using the Signed Cumulative Distribution Transform	1274
<i>Abu Hasnat Mohammad Rubaiyat, Jacobs, United States; Jordan Vincent, Tekla Research, United States; Brian Greeley, DCS Corporation, United States; George Stantchev, Colin Olson, U.S. Naval Research Laboratory, United States</i>	
TP8a-1.6: Extending Kalman Filters for non-Gaussian Process Noise Sources via Approximate Message Passing	1279
<i>Tiancheng Gao, Mohamed Akrouf, Faouzi Bellili, Amine Mezghani, University of Manitoba, Canada</i>	
TP8a-1.7: Estimating Valley Fever Endemicity with Environmental Parameters.....	1286
<i>Jacob Caraccilo, Sarah Garner, Mario Banuelos, California State University, Fresno, United States</i>	
TP8a-1.8: Threshold Effect of Neural Network-based Fundamental Frequency Estimators	1291
<i>Jonas Lindenberger, Silicon Austria Labs GmbH, Austria; Stefan Schuster, voestalpine Stahl GmbH, Austria; Oliver Lang, Johannes Kepler University, Austria; Alexander Haberl, voestalpine Stahl GmbH, Austria; Bernhard Lehner, Silicon Austria Labs GmbH, Austria; Clemens Staudinger, K1-MET GmbH, Austria; Theresa Roland, voestalpine Metal Forming GmbH, Austria; Mario Huemer, Johannes Kepler University, Austria</i>	
TP8a-1.9: On the Design of SO(3)-invariant Feature Extraction Functions for 3D Point Cloud	1296
<i>Amit Efrain, Shamoon College of Engineering, Israel; Joseph M. Francos, Ben Gurion University, Israel</i>	
TP8a-1.10: On the Analytic Solution to Recursive Smoothing in Mixture Models.....	1301
<i>Branislav Rudic, Valentin Sturm, Linz Center of Mechatronics GmbH, Austria; Dmitry Efrosinin, Johannes Kepler University, Austria</i>	
TP8a-1.11: Full Slepian-Bangs formula for Fisher information on Lie groups	1306
<i>Sara EL BOUCH, University of Toulouse/ISAE-SUPAERO, France; Samy Labsir, IPSA/TéSA, France; Alexandre Renaux, University of Paris-Saclay, France; Jordi Vilà-Valls, Eric Chaumette, University of Toulouse/ISAE-SUPAERO, France</i>	
TP8a-1.12: Extrinsic and Linearized CWCW MMSE Estimation as in GAMP.....	1311
<i>Zilu Zhao, Fangqing Xiao, Dirk Slock, EURECOM, France</i>	
TP8a-1.13: Multipath-based SLAM with Cooperation and Map Fusion in MIMO Systems	1316
<i>Erik Leitinger, Lukas Wielandner, Alexander Venus, Graz, University of Technology, Austria; Mingchao Liang, Florian Meyer, University of California San Diego, United States; Klaus Witrisal, Graz, University of Technology, Austria</i>	
TP8a-2: Data Science, Machine Learning, and Adaptive Systems II	
TP8a-2.1: Coupled Basis Pursuit for 3D Terahertz Video Reconstruction.....	1323
<i>Miguel Heredia Conde, Abdulraouf Kutaish, Ullrich Pfeiffer, University of Wuppertal, Germany</i>	
TP8a-2.3: A Single Network for Reconstruction with Dynamic Measurement Rates	1328
<i>Cemre Omer Ayna, Ali Cafer Gurbuz, Mississippi State University, United States</i>	
TP8a-2.4: Error Correction Codes for Robust Classification with Neural Networks Under Sparse Noise	1333
<i>Eva Riherd, Weiyu Xu, Raghu Mudumbai, University of Iowa, United States</i>	
TP8a-2.5: Robust and Constrained Estimation of State-Space Models: A Majorization-Minimization Approach	1338
<i>Yifan Yu, Shengjie Xiu, Daniel Palomar, Hong Kong University of Science and Technology, Hong Kong SAR of China</i>	
TP8a-2.6: Very Efficient Convolutional Neural Network based on the Discrete Hirschman Transform	1344
<i>Weiwei Wang, Victor DeBrunner, Linda DeBrunner, Florida State University, United States; Dingli Xue, China Academy of Science, China; Hanqing Zhao, Ranran Tao, Florida State University, United States</i>	

TP8a-2.8: Cardiac Condition Classification Using 12-Lead ECG Recordings	1349
<i>Dorsa Esmaeilpourmoghaddam, Rice University, United States; Mehdi Razavi, Texas Heart Institute, United States; Behnaam Aazhang, Rice University, United States</i>	
TP8a-2.9: Track-Cued Radar Point Cloud Target Classification.....	1354
<i>Lihui Chen, NXP Semiconductors Inc., United States; Mujtaba Hassan, Delft University of Technology, Netherlands; Satish Ravindran, Ryan Wu, NXP Semiconductors Inc., United States</i>	
TP8a-2.10: Rotation-Equivariant Neural Networks for Cloud Removal from Satellite Images	1360
<i>Suhas Lohit, Tim K. Marks, Mitsubishi Electric Research Laboratories, United States</i>	
TP8a-2.11: A Vision Transformer based Method for Pileup Detection in Pulse Shape	1366
Discrimination	
<i>Qi Cheng, Oklahoma State University, United States; Jason Hayward, Xianfei Wen, University of Tennessee, United States</i>	
TP8a-2.12: Comparison of Explainability Approaches for Reinforcement Learning for Autonomous	1372
Flight Maneuvers	
<i>Soumyabrata Dey, Swati Kar, Mahesh Banavar, Clarkson University, United States; Allan Salihovic, SUNY Buffalo, United States; Simon Khan, Jason Bryant, Air Force Research Lab, United States</i>	
TP8a-2.13: Towards Data-Driven Guarantees for Sparse Signal Recovery.....	1377
<i>Farhang Yeganehi, Arian Eamaz, Mojtaba Soltanalian, University of Illinois Chicago, United States</i>	

TP1b: Channel Estimation, Synchronization, and Equalization

TP1b.1: Interpolation Techniques for Fast Channel Estimation in Ray Tracing	1383
<i>Ruibin Chen, Jayadev Joy, Yaqi Hu, Mingsheng Yin, New York University Tandon School of Engineering, United States; Marco Mezzavilla, Politecnico di Milano, Italy; Sundeep Rangan, New York University Tandon School of Engineering, United States</i>	
TP1b.2: Optimum Tuning of a Blind Moment-Based Adaptive I/Q Imbalance Estimator	1389
<i>Moritz Tockner, Oliver Lang, Andreas Meingassner, Mario Huemer, Johannes Kepler University, Austria</i>	
TP1b.3: A Decoupled Channel Estimation Method for Beyond Diagonal RIS.....	1395
<i>Bruno Sokal, Fazal-E Asim, André de Almeida, Federal University of Ceará, Brazil</i>	
TP1b.4: Using Equalization-Induced Noise Coloring to Improve Error-correcting Decoding.....	1400
<i>Jane Millward, Massachusetts Institute of Technology, United States; Ken Duffy, Northeastern University, United States; Muralidhar Rangaswamy, Air Force Research Laboratory, United States; Muriel Medard, Massachusetts Institute of Technology, United States</i>	
TP1b.5: Channel Estimation in Time-Varying Ocean Environments using OTFS Modulation	1404
<i>Amogh Panchagatti, Byungjun Kim, Peter Gerstoft, University of California San Diego, United States; Christoph Mecklenbraeuer, TU Wien, Austria</i>	

TP2b: Perceptual and Higher Level Loss and Distance Functions for Audio and Acoustics

TP2b.1: Similarity Metrics for Late Reverberation	1409
<i>Gloria Dal Santo, Prawda Karolina, Aalto University, Finland; Sebastian Jiro Schlecht, Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU), Germany; Vesa Välimäki, Aalto University, Finland</i>	
TP2b.2: Time-Frequency Audio Similarity using Optimal Transport.....	1414
<i>Linda Fabiani, Ecole Polytechnique Fédérale de Lausanne, Switzerland; Sebastian J. Schlecht, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany; Filip Elvander, Aalto University, Finland</i>	
TP2b.3: A Novel Perceptual Loss Function for Audio and Music Quality Differentiable in	1418
PyTorch	
<i>Gerald Schuller, Ilmenau University of Technology, Germany, Germany</i>	
TP2b.4: Instrumental Timbre Transfer Based on Disentangled Representation of Timbre and	1423
Pitch	
<i>Lin Ye, Gerald Schuller, Muhammad Imran, Ilmenau University of Technology, Germany, Germany</i>	

TP2b.5: Pruning-aware Loss Functions for STOI-Optimized Pruned Recurrent Autoencoders1427
for the Compression of the Stimulation Patterns of Cochlear Implants at Zero Delay
Reemt Hinrichs, Jörn Ostermann, Leibniz University Hannover, Germany

TP3b: Distributed Processing for Next Generation Wireless Communications

TP3b.1: Distributed Precoding for Mitigating Hardware Impairments in Cell-free massive1433
MIMO with Sequential Fronthaul

*Antoine Durant, Rafik Zayani, Commissariat A L'Energie Atomique Et Aux Energies
Alternatives, France*

TP3b.2: Distributed Decoding Scheme for Uplink C-RAN System with Limited Backhaul1438
Capacity

*Thomas Chêne, Ghaya Rekaya, Télécom Paris, France; Oussama Damen, University of
Waterloo, Canada*

TP3b.3: Decentralized Message-Passing for Semi-Blind Channel Estimation in Cell-Free1443
Systems Based on Bethe Free Energy Optimization

Zilu Zhao, Dirk Slock, EURECOM, France

TP3b.4: Quantum Annealing for Active User Detection in NOMA Systems.....1448

Romain Piron, Claire Goursaud, Université de Lyon, INSA Lyon, INRIA, CITI EA 37, France

TP3b.5: Communication-Efficient Distributed Computing via Matrix Factorization1453

*Seif Hussein, Saeed Razavikia, Sajad Daei, Carlo Fischione, KTH Royal Institute of Technology,
Sweden*

TP4b: Learning and Adaptation

TP4b.3: Distributed Gradient Clustering: Convergence and the Effect of Initialization.....1461

*Aleksandar Armacki, Carnegie Mellon University, United States; Dragana Bajović, Faculty of
Technical Sciences, University of Novi Sad, Yugoslavia; Dušan Jakovetić, Faculty of Sciences,
University of Novi Sad, Yugoslavia; Soumya Kar, Carnegie Mellon University, United States*

TP4b.4: Decentralized Learning with Approximate Finite-Time Consensus1466

TP4b.5: On the Inconsistency of Estimation with Uncertain Models.....1471

*Cesar A Uribe, Rice University, United States; James Zachary Hare, Lance M. Kaplan,
DEVCOM Army Research Laboratory, United States; Ali Jadbabaie, MIT, United States*

TP5b: Computational Methods in Array Processing

TP5b.1: On SINR Loss-based Robust ABF Under Mismatch and Signal Contamination1476

*Akshay Bondre, Arizona State University, United States; Christ Richmond, Duke University,
United States*

TP5b.2: Computationally Efficient Direct Localization of Narrowband Radio Frequency1481
Emitters

Amir Weiss, Bar-Ilan University, Israel

TP5b.3: A Bayesian-inspired approach to passive radar detection.....1486

*David Ramírez, Universidad Carlos III de Madrid, Spain; Ignacio Santamaría, Universidad
de Cantabria, Spain; Louis Scharf, Colorado State University, United States; Joaquín Míguez,
Universidad Carlos III de Madrid, Spain*

TP6b: Advanced System and Signal Processing Approaches for Biomedical Motion Capturing

TP6b.1: Time-Synchronized Joint Communication and Precise Wireless Localization of1491
Multiple On-Body Sensor Nodes for Human Gait and Movement Measurement

*Niklas Schlechtweg, Stefan Brückner, Markus Gambietz, Anne Koelewijn, Martin Vossiek,
Friedrich-Alexander University Erlangen-Nuremberg, Germany*

TP6b.2: End-to-End Learning for Human Pose Estimation from Raw Millimeter Wave Radar1495
Data

*Jonas Mueller, Daniel Krauss, Lukas Engel, Martin Vossiek, Bjoern M. Eskofier, Eva Dorschky,
Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany*

TP6b.3: Multiresolution point cloud compression for real-time visualization and streaming of large 3D datasets	1500
<i>Dat Thanh Nguyen, Daniel Zieger, Markus Gambietz, Anne Koelewijn, Marc Stamminnger, André Kaup, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany</i>	
TP6b.4: Unobtrusive Gait Reconstructions using Radar-based Optimal Control Simulations	1505
<i>Markus Gambietz, Anne Dröge, Christian Schüßler, FAU Erlangen-Nürnberg, Germany; Maximilian Stahlke, Fraunhofer IIS, Germany; Vanessa Wirth, Jörg Miebling, Anne Koelewijn, FAU Erlangen-Nürnberg, Germany</i>	
TP6b.5: Vector Approximate Message Passing for 3D MIMO Radar	1510
<i>Bastian Eisele, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany; Ali Bereyhi, University of Toronto, Canada; Ralf Müller, Friedrich-Alexander-Universität Erlangen- Nürnberg, Germany; Sundeep Rangan, New York University, United States</i>	
TP7b: Neuromorphic Computing: Algorithms and Embedded Hardware Architectures	
TP7b.1: Event-driven frequency decomposition with spiking phase-locked loops	1517
<i>Hugh Greatorex, Elisabetta Chicca, University of Groningen, Netherlands</i>	
TP7b.2: Reading Events Hierarchically to Reduce Latency	N/A
<i>Leo Liu, Kwabena Boahen, Stanford University, United States</i>	
TP7b.3: QUANTISENC++: A Fully-Configurable Many-Core Neuromorphic Hardware.....	1527
<i>Shadi Matinizadeh, Arghavan Mohammadhassani, M. L Varshika, Sarah Johari, Anup Das, Drexel University, United States</i>	
TP7b.4: Waves and symbols in neuromorphic hardware: from analog signal processing to digital computing on the same computational substrate	1532
<i>Giacomo Indiveri, University of Zurich, ETH Zurich, Switzerland</i>	
TP7b.5: SpikeVision: A Fully Spiking Neural Network Transformer-Inspired Model for Dynamic Vision Sensors	1537
<i>Zhanbo Shen, Federico Corradi, Eindhoven University of Technology, Netherlands</i>	
TP8b-4: Single- and Multi-user MIMO	
TP8b-4.1: Semi-Blind Multi-Modulus Approach using Embedded Pilot for MIMO-OFDM Communications	1547
<i>Kabiru Aliyu, KFUPM, Saudi Arabia; Karim Abed-meraim, Universite Orleans, France; Azzedine Zerguine, Abdulmajid Lawal, KFUPM, Saudi Arabia</i>	
TP8b-4.2: Enhanced OFDM-SAGE for Multiuser MIMO Parametric Channel Estimation	1557
<i>Enrique Pinto, Markku Juntti, University of Oulu, Finland</i>	
TP8b-4.3: Coded Information Retrieval in Multi-User MIMO Systems.....	1567
<i>Milad Abolpour, MohammadJavad Salehi, Antti Tölli, University of Oulu, Finland</i>	
TP8b-1: RIS-assisted MIMO	
TP8b-1.1: Perfectly Covert Communication with a Reflective Panel	1542
<i>Or Elimelech, Asaf Cohen, Ben-Gurion University of the Negev, Israel</i>	
TP8b-1.2: Wireless communications with user equipment mounted Reconfigurable Intelligent Surfaces	1552
<i>Fnu Ishaq Basha Zakir Ahmed, Hamid Sadjadpour, UC Santa Cruz, United States</i>	
TP8b-1.3: Joint Active and Passive Beamforming for NLOS Target Detection in RIS-Assisted Mono-Static Radar	1562
<i>Cengcang Zeng, Hongbin Li, Stevens Institute of Technology, United States</i>	
TP8b-1.4: Mobile RIS-Channel Estimation with Kalman Filter and Learning.....	1570
<i>Zhuoxuan Ju, Milos Doroslovacki, The George Washington University, United States</i>	
TP8b-1.5: Active Reconfigurable Intelligent Surface Empowered Synthetic Aperture Radar Imaging	1575
<i>Yifan Sun, Dalian University of Technology, China; Rang Liu, University of California Irvine, United States; Zhiping Lu, Beijing University of Posts and Telecommunications; State Key Laboratory of Wireless Mobile Communications (CICT), China; Honghao Luo, Ming Li, Qian Liu, Dalian University of Technology, China</i>	

TP8b-1.6: RIS-Assisted Sensing: A Nested Tensor Decomposition-Based Approach.....	1581
<i>Kenneth Benicio, Fazal Asim, Bruno Sokal, André L. F. de Almeida, Federal University of Ceará, Brazil; Behrooz Makki, Gabor Fodor, Ericsson Research, Sweden</i>	
TP8b-1.8: Semi-Blind Channel Estimation for Beyond Diagonal RIS.....	1586
<i>Gilderlan de Araújo, Federal Institute of Ceara, Brazil; André de Almeida, Federal University of Ceara, Brazil</i>	

TP8b-2: Massive MIMO

TP8b-2.1: Energy-Efficient Cell-Free Massive MIMO with Wireless Fronthaul.....	1591
<i>Ozan Alp Topal, KTH Royal Institute of Technology, Sweden; Özlem Tuğfe Demir, TOBB University of Economics and Technology, Turkey; Emil Björnson, Cicek Cavdar, KTH Royal Institute of Technology, Sweden</i>	
TP8b-2.2: Fast and Robust Expectation Propagation MIMO Detection via Preconditioned Conjugated Gradient	1603
<i>Luca Schmid, Karlsruhe Institute of Technology, Germany; Dominik Sulz, University of Tübingen, Germany; Laurent Schmalen, Karlsruhe Institute of Technology, Germany</i>	
TP8b-2.3: Decentralized Multi-Antenna Architectures with Unitary Constraints.....	1615
<i>Juan Vidal Alegria, Ove Edfors, Lund University, Sweden</i>	
TP8b-2.4: Optimal Detection in MIMO Systems using Spatial Sigma-Delta ADCs.....	1625
<i>Toan-Van Nguyen, Sajjad Nassirpour, San Diego State University, United States; Italo Atzeni, Antti Tolli, Oulu University, Finland; A. Lee Swindlehurst, University of California, Irvine, United States; Duy H. N. Nguyen, San Diego State University, United States</i>	
TP8b-2.5: SRS Compression for Cloud RAN Massive MIMO.....	1637
<i>Javad Abdoli, Avik Sengupta, Daewon Lee, Bishwarup Mondal, Intel Corporation, United States</i>	
TP8b-2.6: Generative vs. Predictive Models in Massive MIMO Channel Prediction.....	1642
<i>Juhyung Lee, Joochan Lee, Andreas F. Molisch, University of Southern California, United States</i>	

TP8b-3: MIMO at mmWave

TP8b-3.1: Analog Beamforming Aided by Full-Dimension One-Bit Chains	1597
<i>Lina Liu, Northwestern University, United States; Weimin Xiao, Jialing Liu, Zhigang Rong, Futurewei Technologies, United States</i>	
TP8b-3.2: Antenna Module Placement Optimization for Robustness to Hand Blockage.....	1609
<i>Vasanthan Raghavan, Raghu Challa, Alberto Cicalini, Mike McCloud, Brian Banister, Qualcomm, United States</i>	
TP8b-3.3: Scaling mmWave MU-MIMO: Information-Theoretic Guidance using Real-World Data	1620
<i>Canan Cebeci, Oveys Delafrooz Noroozi, Upamanyu Madhow, University of California, Santa Barbara, United States</i>	
TP8b-3.4: Quasi-Orthogonal Beamspace Modulation in Near-Field LoS MIMO Channel.....	1630
<i>Lin Chen, The Chinese University of Hong Kong, Hong Kong SAR of China; Xiaojun Yuan, University of Electronic Science and Technology of China, China; Ying-Jun Angela Zhang, The Chinese University of Hong Kong, Hong Kong SAR of China</i>	

WA1a: Advances in Wireless Channel Charting

WA1a.1: Pilot allocation for cell-free massive MIMO based on channel charting.....	1647
<i>Pere Garauburguera, Bushra Shaikh, Hanan Al-tous, Aalto University, Finland; Markku Juntti, Oulu university, Finland; Olav Tirkkonen, Aalto University, Finland</i>	
WA1a.2: Alternative Channel Charting Techniques in Cellular Wireless Communications.....	1653
<i>Ender Ayanoglu, University of California, Irvine, United States</i>	
WA1a.3: CSI Compression using Channel Charting	1660
<i>Baptiste CHATELIER, Univ Rennes, INSA Rennes, CNRS, IETR-UMR 6164 / Mitsubishi Electric R&D Centre Europe, Rennes / b<>com, France; Vincent CORLAY, Mitsubishi Electric R&D Centre Europe, Rennes / b<>com, France; Matthieu CRUSSIÈRE, Luc LE MAGOAROU, Univ Rennes, INSA Rennes, CNRS, IETR-UMR 6164 / b<>com, France</i>	
WA1a.4: Uncertainty-Aware Dimensionality Reduction for Channel Charting with Geodesic Loss	1665
<i>Florian Euchner, Phillip Stephan, Stephan ten Brink, University of Stuttgart, Germany</i>	

WA2a: MIMO Communication above 6 GHz

- WA2a.1: Position-Aided Beam Management for Multi-Panel Dynamic Metasurface Antennas.....1673
Ibrahim Kilinc, Nitish Deshpande, Robert Heath, University of California San Diego, United States
- WA2a.2: Robust Beamfocusing Against Positioning Errors Over Sub-Terahertz LOS1678
Channels
Sota Uchimura, Koji Ishibashi, The University of Electro-Communications, Japan; Josep Miquel Jornet, Northeastern University, Japan
- WA2a.3: Near-Field Measurement System for the Upper Mid-Band.....1684
Raghavendra Palayam Hari, Hao Guo, Ali Rasteh, New York University, United States; Marco Mezzavilla, Politecnico di Milano, United States; Sundeeep Rangan, New York University, United States
- WA2a.4: Near Field Dictionary Design and Channel Estimation Using Discrete Fresnel1690
Transform
Ziyi Xu, Chinese University of Hong Kong, Hong Kong SAR of China; Shuoyao Wang, Shenzhen University, China; Ying-Jun Angela Zhang, Chinese University of Hong Kong, Hong Kong SAR of China

WA3a: Understanding Graph Neural Networks

- WA3a.1: Graph Signal Representations1695
José M. F. Moura, Carnegie Mellon University, United States
- WA3a.2: Universal transferability for GNNs via graphons1700
Mauricio Velasco, Universidad Catolica del Uruguay (UCU), Uruguay; Soledad Villar, Kaiying Xie, Johns Hopkins University (JHU), United States; Bernardo Rychtenberg, Universidad Catolica del Uruguay (UCU), United States
- WA3a.3: Seeking universal approximation for continuous limits of graph neural networks on large1705
random graphs
Matthieu Cordonnier, Université Grenobles Alpes, France; Nicolas Keriven, CNRS, IRISA, France; Nicolas Tremblay, CNRS, Gipsa-lab, France; Samuel Vaiter, CNRS, LJAD, France
- WA3a.4: Generalization of Graph Neural Networks: Over Geometric Graphs Sampled from1710
Manifolds
Zhiyang Wang, Juan Cervino, Alejandro Ribeiro, University of Pennsylvania, United States

WA4a: Advances in Multiview Processing and Learning

- WA4a.1: Online Canonical Correlation Analysis via Rayleigh-Ritz Projections.....1715
Vassilis Kalantzis, IBM Research, United States; Panagiotis A. Traganitis, Michigan State University, United States; Charilaos I. Kanatsoulis, Stanford University, United States
- WA4a.2: Kernel-driven Self-Supervision for Multi-View Learning over Graphs.....1720
Alireza Sadeghi, Konstantinos Polyzos, Georgios B. Giannakis, University of Minnesota, United States
- WA4a.3: Multiview Analog FM Radio Underlay1725
Nima Razavi, Spyridon Peppas, Paris Karakasis, Nicholas Sidiropoulos, University of Virginia, United States
- WA4a.4: Project or Factorize? A case study of Multiview CCA and PARAFAC2 tensor1730
factorization
Jia Chen, Evangelos Papalexakis, University of California Riverside, United States

WA5a: DOA Estimation

- WA5a.1: The Effect of Mutual Coupling on Directivity and SNR in Super-Directive1735
Antenna Arrays
Benjamin Friedlander, University of California, Santa Cruz, United States
- WA5a.2: LOS Path Identification in Multipath Environments with an Unknown Number of1740
Passive Targets
Yifan Liang, Hongbin Li, Stevens Institute of Technology, United States
- WA5a.3: High-Resolution One-Bit Direct Position Determination of Narrowband Gaussian1745
Emitters
Amir Weiss, Bar-Ilan University, Israel

WA5a.4: Multipole Source Capture using Multiple Dictionary Sparse Bayesian Learning.....1750
Alex Tung, Peter Gerstoft, University of California, San Diego, United States

WA6a: Adaptive Filtering and Estimation II

WA6a.1: Clutter Subspace-Based Space-Time Adaptive Radar Detectors.....1757
Christ Richmond, Duke University, United States

WA6a.2: Neuro-Scheduling for Remote Estimation1762
Marcos Vasconcelos, Yifei Zhang, Florida State University, United States

WA6a.3: Quickest Change Detection with Confusing Change.....1768
Yu-Zhen Janice Chen, University of Massachusetts Amherst, United States; Jinhang Zuo, University of Massachusetts Amherst & California Institute of Technology, United States; Venugopal Veeravalli, University of Illinois at Urbana-Champaign, United States; Don Towsley, University of Massachusetts Amherst, United States

WA6a.4: Breaking the Gaussian Barrier: Leveraging ReGVAMP to Extend EKF and1774
IEKF
fangqing xiao, dirk slock, eurecom, France

WA7a: Hardware Security

WA7a.1: Watermarking Large Language Models and the Generated Content: Opportunities and1779
Challenges
Ruisi Zhang, Farinaz Koushanfar, UC San Diego, United States

WA7a.2: DL-SCADS: Deep Learning-Based Post-Silicon Side-Channel Analysis Using1787
Decomposed Signal
Dipayan Saha, Farimah Farahmandi, University of Florida, United States

WA7a.3: Hardware Acceleration for Fully Homomorphic Encryption Scheme Switching from1792
CKKS to FHEW
Kaiyuan Zhang, Tufts University, United States; Antian Wang, Clemson University, United States; Yingjie Lao, Tufts University, United States; Keshab Parhi, University of Minnesota, United States

WA7a.4: Architectural Tradeoffs for Long Polynomial Modular Multiplication1797
Sin-Wei Chiu, Keshab Parhi, University of Minnesota at Twin Cities, United States

WA1b: IoT and Machine-Type Communications

WA1b.1: LoRa Fine Synchronization with Two-Pass Time and Frequency Offset Estimation.....1802
Joachim Tapparel, Andreas Burg, Ecole polytechnique fédérale de Lausanne, Switzerland

WA1b.2: Age of k-out-of-n Systems on a Gossip Network1807
Erkan Bayram, Melih Bastopcu, Mohamed-Ali Belabbas, Tamer Başar, University of Illinois at Urbana-Champaign, United States

WA1b.3: Intelligent Duty Cycling Management and Wake-up for Energy Harvesting IoT1812
Networks with Correlated Activity
David Ernesto Ruiz-Guirola, Onel ALCARAZ LÓPEZ, University of Oulu, Finland; Samuel Montejo-Sánchez, Universidad Tecnológica Metropolitana, Chile, Chile; Israel Leyva Mayorga, Department of Electronic Systems, Denmark; Zhu Han, University of Houston, United States; Petar Popovski, Department of Electronic Systems, Denmark

WA2b: Resilient MIMO communication

WA2b.1: Protecting Legacy Wireless Systems Against Interference using Massive MIMO1819
Sameer Mathad, Purdue University, United States; Taejoon Kim, University of Kansas, United States; David Love, Purdue University, United States

WA2b.2: Fundamental Limits for Jammer-Resilient Communication in Finite-Resolution1824
MIMO
Gian Marti, Alexander Stutz-Tirri, Christoph Studer, ETH Zurich, Switzerland

WA2b.3: Over-the-Air Computation with Reciprocity Calibration: Detection and Realignment1832
of Misaligned Devices
Martin Dahl, Zheng Chen, Erik G. Larsson, Linköping University, Sweden

WA3b: Federated Learning

- WA3b.1: Mixed-Timescale Differential Coding for Downlink Model Broadcast in Wireless1837
Federated Learning
Chung-Hsuan Hu, Zheng Chen, Erik G. Larsson, Linköping University, Sweden
- WA3b.2: rAge-k: Communication-Efficient Federated Learning Using Age Factor.....1843
Matin Mortaheb, Priyanka Kaswan, Sennur Ulukus, University of Maryland College Park, United States
- WA3b.3: Data Similarity-Based One-Shot Clustering for Multi-Task Hierarchical1848
Federated Learning
Abdulmoneam Ali, Ahmed Arafa, UNC Charlotte, United States

WA4b: Trustworthy Learning II

- WA4b.1: Inference Privacy: Properties and Mechanisms1853
Fengwei Tian, Ravi Tandon, University of Arizona, United States
- WA4b.2: Sequential Reinforcement Learning-Based Waveform Adaptation for Dynamic1861
Decision-Making in Tracking
Abigail Eastman, Antonia Papandreou-Suppappola, Arizona State University, United States
- WA4b.3: Adversarial Training with Maximal Coding Rate Reduction1866
Hsiang-Yu Chu, Hongbo Zhao, Markus Flierl, KTH Royal Institute of Technology, Sweden

WA5b: Sensing and Communications

- WA5b.1: Partially-Blocked Near-Field Sensing: Joint Source DoA and Blockage Range1871
Estimation
Jiaqi Xu, A. Lee Swindlehurst, University of California, Irvine, United States
- WA5b.2: Tensor-Based Receivers for the Bistatic Sensing and Communication Scenario1876
Walter Freitas Jr., Federal University of Ceará, Brazil; Gérard Favier, Laboratoire I3S/CNRS/UNSA, France; André L. F. de Almeida, Federal UNiversity of Ceará, Brazil
- WA5b.3: Kalman filter for dynamic estimation of stochastic radio source power and DoA1881
Cyril Cano, Ecole de l'Air et de l'Espace, France; Éric Chaumette, ISAE-SUPAERO, France; Pascal Larzabal, SATIE, ENS Paris-Saclay, France; Mohammed Nabil El Korso, L2S, CentraleSupélec, France

WA6b: Learning for Medical Imaging

- WA6b.1: INFusion: Diffusion Regularized Implicit Neural Representations for 2D and 3D1886
accelerated MRI reconstruction
Yamin Arefeen, Zach Stoebner, Brett Levac, Jonathan I Tamir, The University of Texas at Austin, United States
- WA6b.2: Machine Learning-Based Screening for Pediatric Hip Dysplasia: Towards a1891
Validated Approach
Maria Lizeth Reyna, Ricardo Tabares, Martine Ceberio, Vladik Kreinovich, Christoph Lauter, University of Texas at El Paso, United States; Cecilia Alejandra Marquez, Centro Medico de Especialidades, Mexico
- WA6b.3: Edge Guided Segmentation Mask Prediction for 3D CT Fracture Imagery1895
Trung Hoang, Zachary Koroneos, Gregory S. Lewis, Vishal Monga, Pennsylvania State University, United States

WA7b: Machine Learning Hardware

- WA7b.1: Accelerating Sparse MTTKRP for Small Tensor Decomposition on GPU1900
Sasindu Wijeratne, University of Southern California, United States; Rajgopal Kannan, DEVCOM Army Research Lab, United States; Viktor Prasanna, University of Southern California, United States
- WA7b.2: A RISC-V Hardware Accelerator for AW-SOM Machine Learning.....1906
Lorenzo Canese, Gian Carlo Cardarilli, Luca Di Nunzio, Riccardo La Cesa, Tor Vergata University of Rome, Italy; Mariano Neroni, Simone Pace, MBDA Italia S.p.A., Italy; Sergio Spanò, Tor Vergata University of Rome, Italy

WA7b.3: Hybrid SORN Support Vector Machine Classifier: A Hardware Implementation of1911
the RBF Kernel

*Nils Hülsmeier, Moritz Bärthel, University of Bremen, Germany; Jochen Rust, Hamburg
University of Applied Sciences, Germany; Steffen Paul, University of Bremen, Germany*
