# TABLE OF CONTENTS

## ANNUAL SIMULATION SYMPOSIUM (ANSS)

|                                                                                                                                                                                                    |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| A Multiscale Model for Australian Army Recruitment and Training Planning .....                                                                                                                     | 1  |
| <i>Katie Mortimer, Cameron Pike, Terry Caelli</i>                                                                                                                                                  |    |
| A Review of Quantum Modeling and Simulation Approaches for Lithium-ion Batteries .....                                                                                                             | 14 |
| <i>Deniz Cetinkaya, Amor Abdelkader</i>                                                                                                                                                            |    |
| Discrepancy of Lane Flow Distribution and Lane-Wise Speed Distribution When Simulating Lane-Drop Bottleneck in Simulation of Urban Mobility (SUMO): A Comparison of Two Car-Following Models ..... | 26 |
| <i>Chukun Gao</i>                                                                                                                                                                                  |    |
| Minimum Time Search and Rescue Missions Involving UAVs with a Framework Supported by DEVS, RHC and PEA .....                                                                                       | 37 |
| <i>Juan Bautista Bordón Ruiz, Jose L. Risco-Martin, Eva Besadas-Porta, José A. López-Orozco</i>                                                                                                    |    |
| Quality in DES, SD, and ABM: An Algorithmic Analysis of Literature .....                                                                                                                           | 50 |
| <i>Chris Lawrence</i>                                                                                                                                                                              |    |
| Reproducibility and Replicability of Simulation Models .....                                                                                                                                       | 63 |
| <i>Yilin Huang</i>                                                                                                                                                                                 |    |
| Simulating Combinatorial Double Auctions: A Devs and Multi-agent Approach with Different Participant Behavior .....                                                                                | 73 |
| <i>Juan De Anton Heredero, Cristina Ruiz Martin, Félix Villafañez, David Poza</i>                                                                                                                  |    |
| Simulating Web3 Tokenomics with Agent-Based Models.....                                                                                                                                            | 85 |
| <i>Don Berndt, Ricardo Lasa</i>                                                                                                                                                                    |    |
| Simulation Analysis of Sensor Placement and Target Interaction in DEVS Formalism.....                                                                                                              | 97 |
| <i>Yeeun Park, Hyungho Na, Il-Chul Moon</i>                                                                                                                                                        |    |

## COMMUNICATION TECHNOLOGIES AND NETWORKING SIMULATION (CNS)

|                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------|-----|
| An Adaptive Data Transfer Technique for Sensor-based Systems.....                                         | 110 |
| <i>Juan Contreras, Shikharesh Majumdar</i>                                                                |     |
| DEVS over MQTT to Enable Distributed Real-Time Simulation .....                                           | 123 |
| <i>Roman Cardenas, Patricia Arroba, Segundo Esteban, Jose L. Risco-Martin</i>                             |     |
| Modeling and Simulation of Virtual Cut-through Routing in Multidimensional Interconnection Networks ..... | 136 |
| <i>Benjamin Ehrlich, Yelena Rykalova, Lev B. Levitin</i>                                                  |     |
| Optimizing Energy Efficiency Performance in RIS-assisted Near-field MIMO System Using Deep RL.....        | 148 |
| <i>Amjad Iqbal, Ala'a Al-Habashna, Gabriel Wainer, Gary Boudreau</i>                                      |     |
| Simulation of Deep Neural Networks by Data Parallelization .....                                          | 161 |
| <i>Jorge A. Lopez, Abdolreza Abhari</i>                                                                   |     |

## **CYBER-PHYSICAL SYSTEMS AND DIGITAL TWINS (CPS/DT)**

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| Developing Urban Digital Twin for Mobility .....                                                              | 174 |
| <i>Zeeshan Ali, Mama Diakit , Mamadou Kaba Traore</i>                                                         |     |
| Dynamic Development of Traffic Simulations for Urban Digital Twins .....                                      | 187 |
| <i>Martin McCarthy, Carolina Cruz-Neira, Dirk Reiners</i>                                                     |     |
| FMI-based Distributed Co-simulation with Enhanced Security and Intellectual Property Safeguards .....         | 198 |
| <i>Santiago Gil, Ecem E. Bas, Chirstian D. Jensen, Sebastian Engelsgaard, Giuseppe Abbiati, Cl udio Gomes</i> |     |
| Towards a Standardized Framework for Developing Trustworthy Self-Adaptive Robotic Systems .....               | 204 |
| <i>Sahar Nasimi Nezhad, Bert Van Acker, Paul De Meulenaere</i>                                                |     |
| Towards Federating IoT and Simulation Systems: An HLA-Based Approach .....                                    | 217 |
| <i>Michel El Haddad, Jalal Possik, Emilio Jimenez, Marco Gotelli, Roy Abi Zeid Daou, Charles Yaacoub</i>      |     |

## **HIGH PERFORMANCE COMPUTING AND SIMULATION (HPC)**

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| Comparison of the Performance Evaluation of the Intel Quantum Simulator on the HPC Systems .....                             | 228 |
| <i>Daniel Talav n-Vega, Pablo Fern ndez-Alonso, Paloma Rodr guez-Oliver, Javier Corral-Garc a, Juan-Antonio Rico-Gallego</i> |     |
| Quantum Emulation for High-performance Computing Centers: Qaptiva HPC .....                                                  | 239 |
| <i>Cyril Allouche, Jefferson Andres Bravo Montes, Miriam Bastante Chichon</i>                                                |     |
| Simulating Quantum Circuits with Hard-core Bosons .....                                                                      | 252 |
| <i>David da Costa</i>                                                                                                        |     |

## **HUMAN AGENTS AND COOPERATIVE ARTIFICIAL SOCIETIES (HACAS)**

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| Combination of Agent-based Social Simulation Models: Approaches and Challenges .....                                        | 264 |
| <i>Emil Johansson, Fabian Lorig, Paul Davidsson</i>                                                                         |     |
| Realistic Social Networks in Agent-based Modeling .....                                                                     | 277 |
| <i>Maxim Malikov, Kathleen Salazar-Serna</i>                                                                                |     |
| The Transparency Imperative: The Need for Model Documentation for Engaging with Public Policy Following the EU AI Act ..... | 290 |
| <i>Michael Frank Belfrage, Fabian Lorig, Christopher Frantz, Jason Tucker, Paul Davidsson</i>                               |     |
| Toward a Quantitative Science of Nonviolence: Sensitivity Analysis of an Agent-Based Model of Nonviolent Resistance .....   | 303 |
| <i>Joshua Steakelum, Hang Trung Dinh, Lance Fiondella</i>                                                                   |     |
| Using Virtual Reality to Simulate and Study the Movements of School Shooters .....                                          | 316 |
| <i>Christopher A. McClurg, Alan R. Wagner</i>                                                                               |     |

## MACHINE LEARNING AND AI IN SIMULATION (MLAIS)

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| Builda: A Thermal Building Data Generation Framework for Transfer Learning .....                                              | 329 |
| <i>Thomas Krug, Fabian Raisch, Markus Wirnsberger, Dominik Aimer, Ferdinand Sigg,<br/>Benjamin Schäfer, Benjamin Tischler</i> |     |
| Real-Time Efficiency Control for Sim-to-Real Systems Using Spiking-Neural-Networks-based<br>Reinforcement Learning .....      | 342 |
| <i>Yijing Fan, Chun Zhao, Lin Zhang, Heming Zhang</i>                                                                         |     |

## MODELING AND SIMULATION FOR SUSTAINABILITY AND SMART ENERGY SYSTEMS (S&SES)

|                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------|-----|
| Economy and Sustainability Analysis with a Novel Modular Configurable Multi-modal White-box<br>Building Model.....  | 355 |
| <i>Haozhen Cheng, Veit Hagenmeyer, Hüseyin K. Çakmak</i>                                                            |     |
| Effect of Electric Vehicle Charging Scheduling and Battery Energy Storage System on Grid Load at<br>an Airport..... | 368 |
| <i>Primož Godec, Steve McKeever</i>                                                                                 |     |

## MODELING AND SIMULATION IN CYBER SECURITY (MSCS)

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| A Modeling and Simulation Framework to Support Cybersecurity Engineering ..... | 381 |
| <i>Moussa Koita, Youssouf M. Diagana, Oumar Y. Maiga, Mamadou Kaba Traoré</i>  |     |
| Automatic Generation of CNN Models for Radiofrequency Fingerprinting .....     | 393 |
| <i>Rogelio García-Aguirre, Carlos Mex-Perera, Eva M. Navarro-López</i>         |     |

## MODELING AND SIMULATION IN MEDICINE (MSM)

|                                                                                                                                          |     |
|------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Phenomenological Model of the Endometrial Cycle: Sensitivity Analysis of Prostaglandin<br>Imbalances in Heavy Menstrual Bleeding ..... | 405 |
| <i>Alexandria Johnson, Carolina Ramirez Mazo, David Archer, Andrew Moore, Enrico Tronci,<br/>Michel Audette, Mette Olufsen</i>           |     |
| A Virtual Coaching Approach for the Computer-Assisted Surgical Trainer .....                                                             | 417 |
| <i>Jonas Bloem, Jerzy Rozenblit, Klaus Buchenrieder</i>                                                                                  |     |
| Computational Analysis of the Novel LQT3 Mutations G1481V and Q1491H in Myocardial and<br>Purkinje Cells .....                           | 430 |
| <i>Anthony Owusu-Mensah, Omer Berenfeld, Quentin Plumereau, Michel Audette</i>                                                           |     |
