# TABLE OF CONTENTS

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Directional Perception of Virtual Sources in an Automotive Environment: Experiments and Models .....                                       | 1   |
| <i>Thomas Charpentier, Etienne Parizet, Bernard Fines, Benoit De Schaepmeester</i>                                                         |     |
| Literature Review: The Influence of Masking Noise on Spatial Perception.....                                                               | 11  |
| <i>Grzegorz Sikora, Wieslaw Woszczyk, Richard King</i>                                                                                     |     |
| Subjective Perception Based on Acoustical Parameters for In-Vehicle Virtual Sound.....                                                     | 23  |
| <i>Minsik Choi, Woonchul Jung, Sungho Kim, May J. Lazaro, Marcin Kalinowski, Jeonghwan Lee, Soyoun Moon, Myung H. Yun, Grzegorz Sikora</i> |     |
| Application of Virtual Sensing Strategies for Active Control of Road Noise in an Electric Vehicle.....                                     | 33  |
| <i>Laurence Wilmshurst, Stephen Elliott, Yoav Vered, Chuang Shi</i>                                                                        |     |
| Enhanced Spatial Audio Immersion in Automotive Environments: A Paired Comparison Study of Virtual Height Rendering .....                   | 42  |
| <i>Jacobo Giralt, Nathan Swedlow, Phil Brown, Dan Darcy</i>                                                                                |     |
| Loudspeaker Control using Long/Short Term Memory Neural Networks .....                                                                     | 51  |
| <i>Denys Volkov, Lars-Johan Branmark, Jessica Wild</i>                                                                                     |     |
| Perceived Spatial Extent of Local Active Noise Control for Broadband Disturbances .....                                                    | 59  |
| <i>Felix Holzmüller, Alois Sontacchi</i>                                                                                                   |     |
| Assessing Audio Performance: A Study in the Context of Loudness Processing .....                                                           | 69  |
| <i>Álvaro J. N. Illescas, Alessandro Travaglini, Johannes Klein</i>                                                                        |     |
| Can Personalized Sound Preference Profiles Be Transferred Between Consumer Products and Automotive Audio Systems? .....                    | 79  |
| <i>Jan Rennies, Andreas Volgenandt, Sina Buchholz</i>                                                                                      |     |
| Validation of the Simulation of Vehicle Loudspeaker Systems in the High Frequency Range .....                                              | 86  |
| <i>Olgierd Zaleski, Boris Dilba, Sören Keuchel, Michael Kwade</i>                                                                          |     |
| The Advantages of Centralized Audio Architecture in Head Units .....                                                                       | 94  |
| <i>Jean-Marie Millet, Jérémy Andriamakaoly, Guillaume Adam</i>                                                                             |     |
| In Situ Measurement and Evaluation of an Automotive Audio Haptic System.....                                                               | 104 |
| <i>Stephen Oxnard, Ethan Stanhope, Laurence J. Hobden, Lucy Diggle, Callum C. Hubbard, Benjamin C. Munday</i>                              |     |
| Audio Speech Source Separation and Enhancement in an Automotive Scenario using Different Microphone Configurations.....                    | 112 |
| <i>Federico Maver, Daniele Foscari, Davide Balsarri, Luca Menescardi, Michele Buccoli, Simone Pecorino, Antonio Grosso</i>                 |     |
| Design of an Engine Sound Synthesis System for Flexible Sound Design .....                                                                 | 122 |
| <i>Gilbert Soulodre, David Soulodre</i>                                                                                                    |     |
| Leveraging Multiple Threads and Cores for Advanced Automotive Audio Processing .....                                                       | 132 |
| <i>Paul Beckmann, John Whitecar, Steve Ernst</i>                                                                                           |     |
