## 5th International Workshop on Artificial Intelligence in Software Testing (AIST 2025)

---

### Session 1: AI/ML for Software Testing Applications

|                                                                                                                                                                                                                                         |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Generating Latent Space-Aware Test Cases for Neural Networks using Gradient-Based Search</b><br>Simon Speth, Christoph Jasper, Claudius Jordan, and Alexander Pretschner — <i>TUM, Germany</i> . . . . .                             | 1  |
| <b>Adaptive Test Healing using LLM/GPT and Reinforcement Learning</b><br>Nariman Mani and Salma Attaranasl — <i>Nutrosal Inc., Canada</i> . . . . .                                                                                     | 9  |
| <b>Test2Text: AI-Based Mapping between Autogenerated Tests and Atomic Requirements</b><br>Elena Treshcheva, Iosif Itkin, Rostislav Yavorski, and Nikolay Dorofeev — <i>Exactpro, USA; Exactpro LLC, UK; Exactpro, Georgia</i> . . . . . | 17 |

### Session 2: LLMs for Test Case Generation

|                                                                                                                                                                                                                                                                                                                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>LLM Prompt Engineering for Automated White-Box Integration Test Generation in REST APIs</b><br>André Mesquita Rincon, Auri Marcelo Rizzo Vincenzi, and João Pascoal Faria — <i>Federal Institute of Tocantins (IFTO); Federal University of São Carlos (UFSCar), Brazil; Department of Computing (DC), Federal University of São Carlos (UFSCar), Brazil; INESC TEC, Faculty of Engineering, University of Porto, Portugal</i> . . . . . | 21 |
| <b>A System for Automated Unit Test Generation using Large Language Models and Assessment of Generated Test Suites</b><br>Andrea Lops, Fedelucio Narducci, Azzurra Ragone, Michelantonio Trizio, and Claudio Bartolini — <i>Polytechnic University of Bari - Wideverse s.r.l., Italy; Polytechnic University of Bari, Italy; University of Bari, Italy; Wideverse s.r.l., Italy</i> . . . . .                                               | 29 |
| <b>From Implemented to Expected Behaviors: Leveraging Regression Oracles for Non-regression Fault Detection using LLMs</b><br>Stefano Ruberto, Judith Perera, Gunel Jahangirova, and Valerio Terragni — <i>JRC European Commission, Italy; University of Auckland, New Zealand; Kings College London, UK</i> . . . . .                                                                                                                      | 37 |

# 21th International Workshop on Advances in Model Based Testing (A-MOST 2025)

---

## Coverage and Path-Based Testing

### Novel Algorithm to Solve the Constrained Path-Based Testing Problem

Matej Klima, Miroslav Bures, Marek Miltner, Chad Zanoeco, Gordon Fraser, Sebastian Schweikl, and Patric Feldmeier — *Czech Technical University in Prague, Czechia; Stanford University, USA; University of Passau, Germany* . . . . . 41

### CPT Manager: An Open Environment for Constrained Path-Based Testing

Matej Klima, Miroslav Bures, Daniel Holotik, Maximilian Herczeg, Marek Miltner, and Chad Zanoeco — *Czech Technical University in Prague, Czechia; Stanford University, USA* . . . . . 50

### Towards Improving Automated Testing with GraphWalker

Yavuz Koroglu, Mutlu Beyazt, Onur Kilincceker, Serge Demeyer, and Franz Wotawa — *Graz University of Technology, Austria; University of Antwerp and Flanders Make, Belgium* . . . . . 54

## Model and Machine Learning

### Automata Learning for React Web Applications

Peter Grubelnik and Franz Wotawa — *Technische Universitaet Graz, Austria* . . . . . 59

### Mutating Skeletons: Learning Timed Automata via Domain Knowledge

Felix Wallner, Bernhard K. Aichernig, Florian Lorber, and Martin Tappler — *Graz University of Technology and Silicon Austria Labs, TU Graz - SAL DES Lab, Austria; Graz University of Technology, Austria; Silicon Austria Labs, Austria; TU Wien, Austria* . . . . . 67

### SelfBehave, Generating a Synthetic Behaviour-Driven Development Dataset using SELF-INSTRUCT

Manon Galloy, Martin Balfroid, Benoît Vanderose, and Xavier Devroey — *NADI, University of Namur, Belgium* . . . . . 78

## AI and Testing

### Model-Based Testing Computer Games: Does It Work?

Wishnu Prasetya — *Utrecht University, Netherlands* . . . . . 85

# 16th International Workshop on Automated Testing (A-TEST)

---

## AI-Driven Testing Automation

### Test Case Generation for Dialogflow Task-Based Chatbots

Rocco Gianni Rapisarda, Davide Ginelli, Diego Clerissi, and Leonardo Mariani — *University of Milano-Bicocca, Italy; University of Genova, Italy* . . . . . 93

### Automated Testing of the GUI of a Real-Life Engineering Software using Large Language Models

Tim Rosenbach, Alexander Weinert, and David Heidrich — *German Aerospace Center (DLR), Institute for Software Technology, Germany* . . . . . 103

### SleepReplacer-GPT: AI-Based Thread Sleep Replacement in Selenium WebDriver Tests

Dario Olinas, Maurizio Leotta, and Filippo Ricca — *Università di Genova, Italy; DIBRIS, Università di Genova - Italy, Italy* . . . . . 111

### Curiosity Driven Multi-agent Reinforcement Learning for 3D Game Testing

Raihana Ferdous, Fitsum Meshesha Kifetew, Davide Prandi, and Angelo Susi — *Consiglio Nazionale delle Ricerche (CNR), Italy; Fondazione Bruno Kessler, Italy; FONDAZIONE BRUNO KESSLER, Italy; Fondazione Bruno Kessler - Irst, Italy* . . . . . 121

## Automated Testing in Critical Systems

### Introducing a Testing Automation Framework for Basic Integrity of Java Applications in Hitachi Railway Systems

Angelo Venditto, Chiara Aprile, Fabrizio Zanini, and Fausto Del Villano — *Hitachi Rail, Italy* . . . . . 130

### Automated Testing in Railways: Leveraging Robotic Arm Precision and Efficiency for Superior Customizability and Usability Test Case Execution

Giuseppe Guida, Mario D'Avino, Massimo Nisci, Roberto Villano, Barbara Di Giampaolo, Michele Schettino, and Erasmo Alessio Bortone — *Hitachi Rail STS, Italy* . . . . . 139

### A Workflow for Automated Testing of a Safety-Critical Embedded Subsystem

Michele Ignarra, Maria Guarino, Andrea Aiello, Vincenzo Tonziello, Giovanni De Donato, Emanuele Pascale, Renato De Guglielmo, Antonio Costa, and Cosimo Affuso — *Hitachi Rail, Italy; Alten, Italy* . . . . . 149

# 5th International CI/CD Industry Workshop (CCIW 2025)

---

## The Purpose of CI

### Continuous Evaluation: Using CI Techniques for Experimentation at Scale

Nilesh Jagnik — *Google, USA* . . . . . 157

## CI at Scale

### Shifting Gears in Continuous Integration: BMWs Strategies for High-Velocity Builds

Maximilian Jungwirth, Simon Rummert, Alexander Scott, and Gordon Fraser — *BMW Group, University of Passau, Germany; BMW Group, Germany; University of Passau, Germany* . . . . . 158

### Multi-architecture Testing at Google

Tim A. D. Henderson, Sushmita Azad, Avi Kondareddy, and Abhay Singh — *Google, USA; Google LLC, USA; Google LLC, UK* . . . 160

### The Art of Managing Flaky Tests at Scale

Oleg Andreyev — *Okta, USA* . . . . . 161

## Centralized, ML-Based, CI Optimizations

### Unlocking New Practical Advantages of Machine Learning via Generating Large Amounts of High-Quality Data about Software Faults

Neetha Jambigi, Marc Tuerke, Bartosz Bogacz, Thomas Bach, and Michael Felderer — *University of Cologne, Germany; SAP, Germany; German Aerospace Center (DLR), Germany* . . . . . 163

# 12th International Workshop on Software Test Architecture (InSTA 2025)

---

## Research Papers

### Establishing Utilization Decision Criteria for Open-Source Software Projects Based on Issue Resolution Time Evaluation

Keisuke Inoue and Kazuhiko Tsuda — *University of Tsukuba, Japan* . . . . . 164

### The Evaluation of Ambiguity Based on the Distance between Transitive Verbs and Objects in Japanese

Toshiharu Kato and Kazuhiko Tsuda — *Graduate School of University of Tsukuba, Japan* . . . . . 171

### A Language Framework for Test(-ware) Architecture

Luis León — *e-Quallity, Mexico* . . . . . 178

## Industry Reports and Emerging Ideas

### Enhancing SaaS Product Reliability and Release Velocity through Optimized Testing Approach

Ren Karita and Tsuyoshi Yumoto — *freee K.K., Japan* . . . . . 188

### Als Understanding of Software Test Architecture

Jon Hagar and Tom Wissink — *Grand Software Testing, USA* . . . . . 194

# 9th International Workshop on Testing Extra-Functional Properties and Quality Characteristics of Software Systems (ITEQS 2025)

---

## AI and Testing

### Quality Assurance for LLM-RAG Systems: Empirical Insights from Tourism Application Testing

Bestoun S. Ahmed, Ludwig Otto Baader, Firas Bayram, Siri Jagstedt, and Peter Magnusson — *Karlstads Universitet, Sweden; American University of Bahrain, Bahrain; Ludwig Maximilian University Munich, Germany; Karlstad University, Sweden* . . . . . 200

|                                                                                                                                                                   |     |

| <b>Towards Accessibility of Covering Arrays for Practitioners of Combinatorial Testing</b>                                                                                                              |     |
| Ulrike Grömping — <i>BHT - Berliner Hochschule für Technik, Germany</i>                                                                                                                                 | 296 |

## Applications of CT

|                                                                                                                                                                                                                                     |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Evaluating Large Language Model Robustness using Combinatorial Testing</b>                                                                                                                                                       |     |
| Jaganmohan Chandrasekaran, Ankita Ramjibhai Patel, Erin Lanus, and Laura Freeman — <i>Virginia Tech, USA; Independent Researcher, USA</i>                                                                                           | 300 |
| <b>Combinatorial Methods for Enhancing the Resilience of Production Facilities</b>                                                                                                                                                  |     |
| Klaus Kieseberg, Konstantin Gerner, Bernhard Garn, Wolfgang Czerni, Dimitris E. Simos, D. Richard Kuhn, and Raghu Kacker — <i>SBA Research, Austria; Infraprotect, Austria; National Institute of Standards and Technology, USA</i> | 310 |
| <b>Combinatorial Test Design Model Creation using Large Language Models</b>                                                                                                                                                         |     |
| Deborah Furman, Eitan Farchi, Michael Gildein, Andrew Hicks, and Ryan Rawlins — <i>IBM, USA; IBM HRL, Israel</i>                                                                                                                    | 314 |

|                                                                                                                                          |     |
|------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Extended Abstract of Poster: STARS: Tree-Based Classification and Testing of Feature Combinations in the Automated Robotic Domain</b> |     |
| Till Schallau, Dominik Schmid, Nick Pawlinorz, Stefan Naujokat, and Falk Howar — <i>TU Dortmund University, Germany</i> . . . . .        | 324 |

## International Workshop on Mutation Testing (Mutation 2025)

---

### Session 1

|                                                                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Equivalent Mutants: Deductive Verification to the Rescue</b>                                                                                                                   |     |
| Serge Demeyer and Reiner Hähnle — <i>Universiteit Antwerpen (ANSYMO), Belgium; Technische Universität Darmstadt, Germany</i> . .                                                  | 326 |
| <b>Semantic-Preserving Transformations as Mutation Operators: A Study on Their Effectiveness in Defect Detection</b>                                                              |     |
| Max Hort, Linas Vidziunas, and Leon Moonen — <i>Simula Research Laboratory, Norway; Simula Research Laboratory &amp; BI Norwegian Business School, Norway</i> . . . . .           | 337 |
| <b>Intent-Based Mutation Testing: From Naturally Written Programming Intents to Mutants</b>                                                                                       |     |
| Asma Hamidi, Ahmed Khanfir, and Mike Papadakis — <i>University of Luxembourg, Luxembourg; South Mediterranean University (MSB-MedTech-LCI), Tunis, Tunisia, Tunisia</i> . . . . . | 347 |

### Session 2

|                                                                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Mutation Testing via Iterative Large Language Model-Driven Scientific Debugging</b>                                                                                |     |
| Philipp Straubinger, Marvin Kreis, Stephan Lukasczyk, and Gordon Fraser — <i>University of Passau, Germany; University of Passau and JetBrains, Germany</i> . . . . . | 358 |
| <b>Exploring Robustness of Image Recognition Models on Hardware Accelerators</b>                                                                                      |     |
| Nikolaos Louloudakis, Perry Gibson, José Cano, and Ajitha Rajan — <i>The University of Edinburgh, UK; University of Glasgow, UK</i> .                                 | 368 |

## 8th International IEEE Workshop on Next Level of Test Automation (NextA 2025)

---

### Testing and LLMs

|                                                                                                                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Adaptive Testing for LLM-Based Applications: A Diversity-Based Approach</b>                                                                                                                            |     |
| Juyeon Yoon, Robert Feldt, and Shin Yoo — <i>Korea Advanced Institute of Science and Technology, South Korea; Chalmers, Sweden; Korea Advanced Institute of Science Technology, South Korea</i> . . . . . | 375 |

### Fault Localization

|                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Witness Test Program Generation through AST Node Combinations</b>                                                                                                      |     |
| Heuichan Lim — <i>Davidson College, USA</i> . . . . .                                                                                                                     | 383 |
| <b>Influence of Pure and Unit-Like Tests on SBFL Effectiveness: An Empirical Study</b>                                                                                    |     |
| Attila Szatmári, Tamás Gergely, and Árpád Beszédes — <i>Szegedi Tudományegyetem, Hungary; Department of Software Engineering, University of Szeged, Hungary</i> . . . . . | 392 |

## 1st International Workshop on Secure, Accountable, and Verifiable Machine Learning (SAFE-ML 2025)

---

### Robustness, Verification, and Security in AI Systems

|                                                                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Structural Backdoor Attack on IoT Malware Detectors via Graph Explainability</b>                                                                                 |     |
| Yu-Cheng Chiu, Maina Bernard Mwangi, Shin-Ming Cheng, and Hahn-Ming Lee — <i>National Taiwan University of Science and Technology, Taiwan</i> . . . . .             | 400 |
| <b>Quantifying Correlations of Machine Learning Models</b>                                                                                                          |     |
| Yuan Yuan Li, Neeraj Sarna, and Yang Lin — <i>Munich RE, USA; Munich RE, Germany; Hartford Steam Boiler, USA</i> . . . . .                                          | 410 |
| <b>Towards a Probabilistic Framework for Analyzing and Improving LLM-Enabled Software</b>                                                                           |     |
| Juan Manuel Baldonado, Flavia Bonomo-Braberman, and Víctor Adrián Braberman — <i>ICC UBA/CONICET and DC, FCEN, Universidad de Buenos Aires, Argentina</i> . . . . . | 418 |

|                                                                                                                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Black-Box Multi-Robustness Testing for Neural Networks</b>                                                                                                                                          |     |
| Mara Downing and Tevfik Bultan — <i>University of California Santa Barbara, USA; University of California at Santa Barbara, USA</i>                                                                    | 423 |
| <b>Security and Privacy in Fedetated Learning Systems</b>                                                                                                                                              |     |
| <b>Towards A Common Task Framework for Distributed Collaborative Machine Learning</b>                                                                                                                  |     |
| Qianying Liao, Dimitri Van Landuyt, Davy Preuveneers, and Wouter Joosen — <i>KU Leuven, Belgium</i>                                                                                                    | 433 |
| <b>Exploring and Mitigating Gradient Leakage Vulnerabilities in Federated Learning</b>                                                                                                                 |     |
| Harshit Gupta, Ghena Barakat, Luca D’Agati, Francesco Longo, Giovanni Merlino, and Antonio Puliafito — <i>University of Messina, Italy</i>                                                             | 438 |
| <b>Federated Learning under Attack: Game-Theoretic Mitigation of Data Poisoning</b>                                                                                                                    |     |
| Marco De Santis and Christian Esposito — <i>University of Salerno, Italy</i>                                                                                                                           | 443 |
| <b>Privacy-Preserving in Federated Learning: A Comparison between Differential Privacy and Homomorphic Encryption across Different Scenarios</b>                                                       |     |
| Alessio Catalfamo, Maria Fazio, Antonio Celesti, and Massimo Villari — <i>Università degli Studi di Messina, Italy; University of Messina, Italy; Department of MIFT, University of Messina, Italy</i> | 451 |
| <b>Author Index</b>                                                                                                                                                                                    | 460 |
