# TABLE OF CONTENTS

## VOLUME 1

### **AERODYNAMIC DESIGN: ANALYSIS, METHODOLOGIES, AND OPTIMIZATION TECHNIQUES I**

|                                                                                                                                                             |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Development of an Exploding Wire Facility to Study Shock Propagation at Embry-Riddle<br>Aeronautical University.....                                        | 1  |
| <i>Eric M. Yoerg, Juan P. Roldan, Donald Tuten, Michael Potash, Rui Harrison, Kassandra J.<br/>Durst, Michael P. Kinzel, Surabhi Singh</i>                  |    |
| Design of a Supersonic Wind Tunnel at Embry-Riddle Aeronautical University.....                                                                             | 11 |
| <i>Surabhi Singh, Eric Yoerg, Grayson Hayes, Ethan Coon, Tyler Keon, Anubhav Dasgupta,<br/>Alexandre Mota, Fady Barsoum, William Engblom, Steven Farr</i>   |    |
| Navigating Aerodynamic Trade-Offs: Multi-Objective Optimization of Helicopter Rotor Blade<br>Using an Evolutionary Algorithm.....                           | 22 |
| <i>Muhammad Muneeb Safdar, Apurva Anand, Koushik Marepally, James D. Baeder</i>                                                                             |    |
| Slip Effect Correction for Propeller Blades on Martian Rotorcraft at Rarefied Atmospheric<br>Conditions .....                                               | 41 |
| <i>Yifei Chen, Moon B. Hazarika, Benjamin Bates, Mirko Gamba</i>                                                                                            |    |
| Transonic, High-Mach Number Wing Adjoint-Based Aerodynamic Shape Optimization .....                                                                         | 65 |
| <i>Filipe Maia Nunes Celestino, Lucas Vinicius Rezende Sanches, Gustavo Luiz Olichevis<br/>Halila, Felipe Issamu Kitadani Odaguil, João Luiz F. Azevedo</i> |    |

### **CONCEPTUAL DESIGN AND OPTIMIZATION I**

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| Performance Assessment and Mission-Based Optimization for Next-Generation Single-Aisle<br>Aircraft Conceptual Design.....          | 88  |
| <i>Dev P. Patel, Tuna Ergun, Yu Cai, Jonathan C. Gladin, Dimitri Mavris</i>                                                        |     |
| Conceptual Design of Composite Aircraft Using Multidisciplinary Optimization.....                                                  | 108 |
| <i>Ryosuke Kano, Kazuki Ryuzono, Shugo Date, Yoshiaki Abe, Tomonaga Okabe</i>                                                      |     |
| Towards the Integration of an Aerodynamic Variable Fidelity Surrogate Model into a Conceptual<br>Aircraft Design Environment ..... | 121 |
| <i>Maurice Zimmnau, Simon Cremer, Anna Uhl, Eike Stumpf</i>                                                                        |     |

### **AERODYNAMIC DESIGN: ANALYSIS, METHODOLOGIES, AND OPTIMIZATION TECHNIQUES II**

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| Aerodynamic Interference Analysis for a Coaxial Rotor in Forward Flight Using the Dynamic<br>Vortex Tube Method..... | 136 |
| <i>Haryun Choi, Sunhoo Park, Seung-Hoon Kang, Sang Joon Shin</i>                                                     |     |
| Cruise Slotted Wing Design with Natural Laminar Flow for Transonic Commercial Transport<br>Aircraft .....            | 149 |
| <i>Brett R. Hiller, Richard L. Campbell, Michelle N. Banchy</i>                                                      |     |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| Towards a Two-Stage Multi-Fidelity Shape Optimization Approach to Noise Reduction in Urban Air Mobility Applications..... | 171 |
| <i>Luca Abergo, Alberto Guardone, Giulio Gori</i>                                                                         |     |
| Lifting-Line Predictions for Optimal Dihedral Distributions in Ground Effect .....                                        | 189 |
| <i>Amanda K. Olsen, Zachary S. Montgomery, Douglas F. Hunsaker</i>                                                        |     |
| A Novel Gas Injection Blending Technique to Mitigate the Aerodynamic Heating in High-Speed Flows .....                    | 204 |
| <i>Dekkala Vinay, Yash Raj, Raunak Sharma, R K. Saluja, Vr Sanal Kumar</i>                                                |     |

## **CONCEPTUAL DESIGN AND OPTIMIZATION II**

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| Study on Ultrasonically Actuated Molding: Evaluating an Alternative Manufacturing Method for Enhanced Lightweight Structures..... | 211 |
| <i>Mehmet A. Ahrazoglu, Mehmet Bülent Özer, Nuri Durlu</i>                                                                        |     |
| Development of Liquid-Cooled Battery System Sizing Method for eVTOL Aircraft.....                                                 | 225 |
| <i>Junhwi Park, Kwanjung Yee</i>                                                                                                  |     |

## **AERODYNAMIC DESIGN: ANALYSIS, METHODOLOGIES, AND OPTIMIZATION TECHNIQUES III**

|                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------|-----|
| Contrastive Representation Learning for Regression-Based Aerodynamics Problem: Fuselage and Airfoil.....                   | 241 |
| <i>Tasfia Maysa Binte Kamal, Shoumik Saha</i>                                                                              |     |
| Evaluating the Impact of Grid-Fin Stabilizers on Munition Trajectory and Accuracy: A Circular Error Probable Approach..... | 254 |
| <i>Puwit Chaowanapreecha, Pitaakphong Rattanagraikanakorn, Joshua Staubs</i>                                               |     |
| Impact of Whale Tubercles on the Aerodynamics Characteristics of F1 Front Wing - Adjoint Optimization.....                 | 282 |
| <i>Fidel Toprakoglu, Ismet Ozyumruoglu, Zeeshan A. Rana, Davide Di Pasquale</i>                                            |     |
| Multi-Fidelity Surrogate Modeling of a Generic Hypersonic Vehicle.....                                                     | 298 |
| <i>Evan J. Burke, Markus P. Rumpfkeil</i>                                                                                  |     |

## **NOVEL AIRCRAFT CONFIGURATIONS**

|                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------|-----|
| Local Air Quality and Noise Improvements Via Optimization of Strut-Braced Wings with Distributed Electric Propulsion ..... | 324 |
| <i>Pablo Norczyk Simon, Rauno Cavallaro</i>                                                                                |     |
| Quantification of Design Trade-Offs When Comparing Transonic Truss-Braced Wing to Advanced Tube and Wing Aircraft .....    | 347 |
| <i>Carl Recine, Michael Schuh, Noah S. Listgarten, Kevin James</i>                                                         |     |
| Mass Balance and Optimization of a Strut-Braced Wing Structure.....                                                        | 368 |
| <i>Antoine Lannoo, Valentin Priasso</i>                                                                                    |     |
| Mass Estimation Relationships for Conceptual Design of Blended-Wing-Body Cabin with Advanced Structures.....               | 382 |
| <i>James Joseph, David J. Kinney, Joseph A. Garcia, Jeffrey V. Bowles</i>                                                  |     |

|                                                               |     |
|---------------------------------------------------------------|-----|
| Conceptual Design of a Gulled-Wing Commercial Transport ..... | 398 |
| <i>Robert B. Taylor</i>                                       |     |

|                                                                                  |     |
|----------------------------------------------------------------------------------|-----|
| Preliminary Conceptual Design for a Box-Wing High Altitude Pseudo Satellite..... | 415 |
| <i>Eleonora Riccio, Chiara Giaquinto, Vincenzo R. Baraniello, Domenico Coiro</i> |     |

## **AERODYNAMIC OPTIMIZATION AND ANALYSIS I**

|                                                                                             |     |
|---------------------------------------------------------------------------------------------|-----|
| Clustered Active Subspaces for Aerodynamic Shape Optimization .....                         | 432 |
| <i>Maxime Chapron, Christophe Blondeau, Itham Salah El Din, Denis Sipp, Michel Bergmann</i> |     |

|                                                                                      |     |
|--------------------------------------------------------------------------------------|-----|
| Geometric Programming for Airfoil Shape Optimization with Geometric Constraints..... | 449 |
| <i>Dajung Kim, Arjit Seth, Rhea P. Liem</i>                                          |     |

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| Transition Aero-Propulsive Analysis of a Tilt-Wing eVTOL Aircraft Using a Surface-Vorticity Solver ..... | 466 |
| <i>Griffin A. Dimaggio, Benjamin M. Simmons, Steven C. Geuther, Roy J. Hartfield, Vivek Ahuja</i>        |     |

|                                                                                         |     |
|-----------------------------------------------------------------------------------------|-----|
| Aerodynamics of an Ogival Double Delta Wing: Control Authority with Split Elevons ..... | 483 |
| <i>Daniel J. Sykes, Max Jones, Alexander Mesny, Carl M. Sangan</i>                      |     |

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| Comparative Analysis of Aerodynamic Coefficient Estimation Using CFD Methods for Aircraft Development ..... | 502 |
| <i>Rodrigo Granzoto, Mauro R. Lopez, Eduardo S. Molina</i>                                                  |     |

## **AERODYNAMIC OPTIMIZATION AND ANALYSIS II**

|                                                                                       |     |
|---------------------------------------------------------------------------------------|-----|
| VORLAX2024: Further Upgrades to a Legacy Potential Flow Solver .....                  | 513 |
| <i>Timothy T. Takahashi, Jack A. Griffin, Brandon S. Gaydusek, William P. Lorenzo</i> |     |

|                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------|-----|
| New Methodology for Aerodynamic Forces Calculations in Unmanned Aerial Systems Optimization Design..... | 546 |
| <i>Alexander Rubenstrup, Oscar Espinosa, Ruxandra M. Botez</i>                                          |     |

|                                                                                 |     |
|---------------------------------------------------------------------------------|-----|
| Evaluation of the GEKO Turbulence Model for Whole Aircraft Drag Prediction..... | 562 |
| <i>Alex Kennedy, Charles Stuart</i>                                             |     |

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Effect of Fineness Ratio on the Basic Aerodynamic Characteristics of a Generic Missile Configuration Involving Forebody Articulation ..... | 584 |
| <i>Kevin Hernandez-Lichtl, Rajan Kumar, Nicholas Gauthier, Tyler Ince-Ingram, Alexander Kunstmann, Ben Dickinson, Ron Taylor</i>           |     |

|                                                                    |     |
|--------------------------------------------------------------------|-----|
| Synthesis of the Aerodynamic Model of a Flying Wing Aircraft ..... | 604 |
| <i>Salvatore Asaro, Roelof Vos</i>                                 |     |

|                                                                                                      |     |
|------------------------------------------------------------------------------------------------------|-----|
| A Study to Evaluate the System Viability of Active HLFC.....                                         | 621 |
| <i>Hirakawa Karin, Kaori Chiaki, Itetsu Inuzuka, Hitoshi Oyori, Takeshi Akinaga, Yotsugi Shibuya</i> |     |

## **SUPERSONIC AND HYPERSONIC APPLICATIONS**

- Aerodynamic Design of an Executive Transport Optimized for Flight Just Beyond Mach One ..... 631  
*Brendyn Bryan, Eric M. Weissman, Jonathan V. Phung, Timothy T. Takahashi, Zachary R. Jackson, Jaydin D. Leo, Jacob Stonemetz, Wilhelm G. Cateral, Ethan Hadimani, Llana J. Cana, Juan Alonzo-Cea*
- Efficient Global Optimization of a Novel Diverterless Supersonic Intake Design Method ..... 657  
*Jonggyu Choi, Jaeik Shin, Hyungrok Do*

## **VOLUME 2**

- AC-130 to 7th Gen. Combat Aircraft Design: The Role of Hypersonic Aerial Gunnery ..... 676  
*Ronald M. Barrett-Gonzalez*
- Investigation for Reduction of Wave Drag Through Design and Analysis of Supersonic Fuel Tanks..... 688  
*Hassan N. Khan, Jehanzeb Masud, Usman Zia, Muhammad Muneeb Safdar*

## **DESIGN OF HYDROGEN-POWERED AIRCRAFT**

- Influence of Fuel Tank Design on the Energy Demand of Hydrogen Aircraft ..... 704  
*Nicolas Gomez-Vega, Dun Yuan Tan, Prakash Prashanth, Steven R. Barrett, Raymond L. Speth, Florian Allroggen*
- Structural Analysis of a Novel Integral Tank Concept for Hydrogen Storage Onboard Commercial Aircraft ..... 722  
*Tomas Montellano, Alexander Heidebrecht, Maurice Hoogreef*
- Conceptual Co-Design of Cryogenic Storage and Ballast Systems for a Hydrogen Airliner ..... 743  
*Aristeidis Antonakis, Dimitrios Glenis*
- Integrated Preliminary Sizing Environment for Hydrogen-Powered Drones ..... 768  
*Aleksandar Joksimovic, Alberto M. Lourenco-Feio, Nikola Gavrilovic*
- Design and Evaluation of an Aircraft Family with Diverse Energy Sources for Sustainable Aviation ..... 798  
*Ranya Almarzooqi, Michela J. Vonfeldt, Evanthia Kallou, Jiacheng Xie, Jonathan C. Gladin, Dimitri Mavris*

## **DESIGN OF HYBRID-ELECTRIC AIRCRAFT**

- Sizing and Optimization of Multi eVTOL Configuration for Urban Air Mobility Applications ..... 817  
*Rajan Bhandari, Imon Chakraborty*
- Parallel Hybrid Turboprop Performance Modeling and Optimization ..... 841  
*Noah S. Listgarten, Dahlia Pham, Carlos Anthony D. Natividad, Benjamin W. Margolis, Kenneth R. Lyons, Joseph A. Garcia, Jeffrey V. Bowles, Catherine E. Russell*
- Hybrid-Electric Design Studies for a Long-Endurance Tailsitter Concept..... 857  
*J. Michael Vegh*
- Multi-Disciplinary Design of a Regional Hybrid Aircraft with Different Green Solutions..... 876  
*Luca Pustina, Riccardo M. Galassi, Matteo Blandino, Franco Mastroddi*

## **WING DESIGN AND OPTIMIZATION**

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| Structural Index Parameter for Capturing Structural & Aerothermal Effects in Conceptual Level Vehicle Design.....                    | 887 |
