# TABLE OF CONTENTS

## VOLUME 1

### **SYSTEM IDENTIFICATION AND FLIGHT TEST I**

|                                                                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Aerodynamic Model Synthesis of an Aircraft With Feather-Inspired Flow Control Devices .....                                                         | 1  |
| <i>Nathaniel Simon, Daa Zekry, Girguis Sedky, Aimy Wissa</i>                                                                                        |    |
| Identifying Control Effectiveness Models of the Flying V Sub-Scale Aircraft in the Wind Tunnel<br>Using Multisine Inputs for System Excitation..... | 11 |
| <i>Burhanuddin Saify, Coen C. De Visser, Xuerui Wang</i>                                                                                            |    |
| Aero-Propulsive Damping Characterization for eVTOL Aircraft Using Free Motion Wind-Tunnel<br>Testing .....                                          | 25 |
| <i>Benjamin M. Simmons, Kasey A. Ackerman, Garrett D. Asper</i>                                                                                     |    |
| In-Flight System Identification of the Ingenuity Mars Helicopter .....                                                                              | 48 |
| <i>Tove S. Aagren, Allen W. Ruan, Carlos Malpica, Shannah Withrow-Maser, Larry Meyn</i>                                                             |    |
| Modeling Asymmetric Blade Damage in Quadrotors Through System Identification Techniques .....                                                       | 71 |
| <i>Burhanuddin Saify, Coen C. De Visser</i>                                                                                                         |    |

### **HYPERSONIC AND SPACECRAFT FLIGHT MECHANICS**

|                                                                                                      |     |
|------------------------------------------------------------------------------------------------------|-----|
| Varying Fidelity Comparative Analysis of Space Shuttle (STS-1) Reentry Dynamics .....                | 112 |
| <i>Emma L. Webb, Robert Bettinger</i>                                                                |     |
| Investigating Stability of Hypersonic Conically-Derived Waverider Vehicles.....                      | 136 |
| <i>Adam S. Weaver, Douglas F. Hunsaker</i>                                                           |     |
| 3 Degree-of-Freedom Aircraft Flight Analysis and Reporting (FLARE) for Trajectory Optimization ..... | 168 |
| <i>Benjamin M. Ford, Douglas F. Hunsaker</i>                                                         |     |

### **SYSTEM IDENTIFICATION AND FLIGHT TEST II**

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| In-Flight Evaluation of Multipoint Loads Model for Flexible Aircraft Loads Monitoring.....                  | 206 |
| <i>Marcus Vinicius Preisighe Viana</i>                                                                      |     |
| Updating High-Order Aeroservoelastic Models From Low-Order System Identification Results .....              | 227 |
| <i>Jeffrey A. Ouellette</i>                                                                                 |     |
| Sparsity Enhanced Aerodynamic Parameter Estimation for Nonlinear Aircraft Model .....                       | 240 |
| <i>Amit Jain, Puneet Singla, John Valasek</i>                                                               |     |
| Parameter Estimation Including Mass and Moments of Inertia Using a Physics-Informed Neural<br>Network ..... | 262 |
| <i>Jaiden Martin, Richard C. Lind</i>                                                                       |     |
| System Identification of an Advanced Geared Turbofan Model Using Neural Networks .....                      | 274 |
| <i>Joaquim N. Dias, Gabriel Melo</i>                                                                        |     |

## **AIRCRAFT DYNAMICS, PERFORMANCE, STABILITY, AND CONTROL I**

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Analytical Flight Dynamic Model Development for eVTOL Aircraft .....                                                                      | 304 |
| <i>Nhan T. Nguyen, Benjamin Webb</i>                                                                                                      |     |
| Extension of a Full Envelope Flight Control System to CTOL/STOL Capabilities on a Urban Air<br>Mobility Tilt-Rotor .....                  | 332 |
| <i>Anthony M. Comer, Aashutosh A. Mishra, Imon Chakraborty</i>                                                                            |     |
| A Quadrotor Model for Evaluating Dynamic Response to a Blast Pressure Wave.....                                                           | 366 |
| <i>Nicholas P. Kakavitsas, Andrew Willis, Dipankar Maity, Artur Wolek</i>                                                                 |     |
| Proximity Flight of Controlled Multirotor UAV With Manned Helicopter in Hover .....                                                       | 383 |
| <i>Shun Watanabe, Nobuhiro Yokoyama, Koji Muraoka</i>                                                                                     |     |
| Dynamic Mode Characteristics of Asymmetric Aircraft .....                                                                                 | 405 |
| <i>Troy Abraham, Douglas F. Hunsaker</i>                                                                                                  |     |
| Evaluation of Stability and Controllability of the Multiple Trim Solutions for a Bio-Inspired<br>Rotating Empennage Fighter Aircraft..... | 449 |
| <i>Ben Moulton, Christian Bolander, Douglas F. Hunsaker</i>                                                                               |     |

## **ENTRY, DESCENT AND LANDING TECHNOLOGY: OVERVIEWS**

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Development of a Hypersonic Entry Test Platform.....                                                                                        | 470 |
| <i>Breanna J. Johnson</i>                                                                                                                   |     |
| POST Explorer: A Design Space Exploration Tool for POST2 .....                                                                              | 490 |
| <i>Robert A. Williams, James A. Hoffman, Rafael Lugo</i>                                                                                    |     |
| Pterodactyl: 6-DOF Integration of Guidance and Control Algorithms in Genesis .....                                                          | 497 |
| <i>Zarrin T. Bashir, Quincy E. McKown, Karen Mae Baldonado, Breanna J. Johnson, Sarah N.<br/>D'Souza, Benjamin W. Margolis, Wendy Okolo</i> |     |
| Current Status and Analyses of the SPLICE Hazard Detection Software .....                                                                   | 520 |
| <i>John Y. Liu, Po-Ting Chen, Jack B. Aldrich, Robert L. Bocchino, Geoffrey M. Vaughan</i>                                                  |     |

## **SYSTEM IDENTIFICATION AND FLIGHT TEST III**

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| The 20-Minute Flight Tests .....                                                                       | 535 |
| <i>Mujahid Abdulrahim, Russell E. Erb, Tyler G. Sanders</i>                                            |     |
| Integrating UAS Flight Test Education Into the USAF Test Pilot School Curriculum.....                  | 558 |
| <i>Mujahid Abdulrahim, Justin Nguyen, Jordan Taranto, M Christopher Cotting, Shawn S.<br/>Stephens</i> |     |
| Development and Capabilities of the NASA Flight Dynamics Research Facility .....                       | 571 |
| <i>Charles M. Fremaux, Benjamin M. Simmons, D. Bruce Owens, Dan D. Vicroy, David B.<br/>Storch</i>     |     |
| Wind Tunnel Based System Identification of a Small Unmanned Aircraft System.....                       | 600 |
| <i>Sabine Wisbacher, Daniel Ossmann, Sebastian Schubert, Juergen Frey, Harald Pfifer</i>               |     |

|                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------|-----|
| Structure for Implementing a Priori Model Knowledge in Markov Parameter Based System Identification Algorithm ..... | 612 |
| <i>Christopher J. Leshikar, John Valasek</i>                                                                        |     |

## **AIRCRAFT DYNAMICS, PERFORMANCE, STABILITY, AND CONTROL II**

|                                                                                                   |     |
|---------------------------------------------------------------------------------------------------|-----|
| Dynamic Behavior of a Falling Rotary Decelerator With Multiple Wings.....                         | 624 |
| <i>Liang-Chun Liu, Hsin-Fu Liu, Jie-Yin Lin</i>                                                   |     |
| Simultaneous Use of Thrust Vectoring and Optimally Deflected Fin for Aircraft Spin Recovery ..... | 634 |
| <i>Salahudden Salahudden, Rakesh Kumar, Tushar Siag</i>                                           |     |
| Computational and Experimental Study of Deep Stall in a Generic T-Tail Transport Aircraft.....    | 643 |
| <i>Mark H. Lowenberg, Daniel Pusztai, Duc Nguyen, Simon Neild</i>                                 |     |
| Using Importance Sampling Monte Carlo to Analyze Aircraft Takeoff and Landing .....               | 664 |
| <i>Jeffrey A. Ouellette</i>                                                                       |     |
| Lifting Bodies.....                                                                               | 678 |
| <i>Miles Miller</i>                                                                               |     |

## **ENTRY, DESCENT AND LANDING TECHNOLOGY: NAVIGATION SENSORS**

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Demonstration of Navigation Doppler Lidar Capabilities Onboard the First Commercial Lunar Lander.....                                  | 694 |
| <i>Glenn D. Hines, Farzin Amzajerdian, Aram Gragossian, Christopher Karlgaard, Scott R. Angster, Raphael A. Lugo, Daniel K. Litton</i> |     |
| Navigation Doppler LiDAR Lunar Landing Data Analysis and Trajectory Reconstruction .....                                               | 707 |
| <i>Diego Pierrottet, Jeffrey F. Monaco, Stephen P. Sandford</i>                                                                        |     |

## **VOLUME 2**

|                                                                                                                                                                                                                                                                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| ELSA: Europa Lander Lidar Sensor Assembly - Field Testing and Performance Analysis .....                                                                                                                                                                                                                                                                                | 716 |
| <i>Anup B. Katake, Po-Ting Chen, Edward H. Konefat, Xavier Zapien, Daniel Clouse, Daniel Ryan, Andrew Bolduc, Christine Gebara, James Alexander, Alejandro San Martin, Ivelin Bakalski, Joel Portier, Roman Machan, Daniel Reed</i>                                                                                                                                     |     |
| Development of a Compact Lidar Sensor for Terrain Relative Navigation and Terrain Hazard Avoidance .....                                                                                                                                                                                                                                                                | 735 |
| <i>Farzin Amzajerdian, Aram Gragossian, Alexander Bulyshev, Paul F. Brewster, Jacob M. Heppler, Frederick G. Wilson, Glenn D. Hines, Sean A. Laughter, Daniel K.
