# TABLE OF CONTENTS

## **SMALL SATELLITE MISSION STUDIES AND UPCOMING MISSIONS**

|                                                                                                                                                                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Retrieving History: Options for Returning Vanguard 1 to Earth .....                                                                                                                                                                                        | 1  |
| <i>Matt A. Bille, Michael Ferguson, Christopher Vanwy, William Austin, Catherine Russell, Dakota Welch</i>                                                                                                                                                 |    |
| Mars Radio Occultation Observation Network (MaROON) .....                                                                                                                                                                                                  | 19 |
| <i>Andrew D. Lewis, Talbryn Porter, Seth Schoenhardt, Ananyo Bhattacharya, David Sweeney, Dillan McDonald, Rohan Madathil, Srikeerthi Kothapally, Epafra Ernesto Boanerges Sihombing, Ollie Paulus, Anson Sheu, Paul Jalade Lorient, Rishika Jandhyala</i> |    |
| Mission Concept Development for the TERP RAPTOR (Terrapin Engineered Rideshare Probe for Rapid-Response Asteroid Apophis Profiling, Tracking, Observing, and Reconnaissance) .....                                                                         | 31 |
| <i>Brent W. Barbee, Adrienne Rudolph, Cameron J. Storey, Chintan Prasad, Kruti Bhingradiya, Rahul Vishnoi, Ryan Mahon, Sean Philips, David L. Akin, Mary Bowden, Jarred Young</i>                                                                          |    |
| 2044: A DEEP Space Odyssey .....                                                                                                                                                                                                                           | 72 |
| <i>Thomas F. May, Christina M. Decker, Josh J. Profeta, Roney Biju, Javid Bayandor</i>                                                                                                                                                                     |    |

## **SMALL SATELLITE NOVEL TECHNOLOGIES**

|                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Advancing CubeSat Technology with Additive Manufacturing and a Versatile Common Bus .....                                                       | 93  |
| <i>Sharlene M. Nazari, Cj Negrete, Andres Cuevas, Andrew Adams, Navid Nakhjiri, Marco Maggia, Jeremiah Gayle, Scott Roberts, Takuro Daimaru</i> |     |
| Icarus: Retractable Drag Sail for Small Satellites Using Shape Memory Alloys .....                                                              | 112 |
| <i>Matthew Werneken, Tycho Bogdanowitsch, Michael L. Garcia, Avery Rambur, Ryan Wu</i>                                                          |     |
| On Optimal Observation Orbits for Learning Gaussian Splatting-Based 3D Models of Unknown Resident Space Objects .....                           | 122 |
| <i>Arianna Issitt, Trupti Mahendrakar, Amy Alvarez, Ryan T. White, Alex Sizemore</i>                                                            |     |

## **SMALL SATELLITE NOVEL TECHNOLOGIES, TOOLS AND MULTI-SATELLITE CONSTELLATIONS**

|                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Development of a High-Precision Pointing Platform for the CubeSpec Mission .....                                                             | 146 |
| <i>Leonardo Peri, Jeroen De Maeyer, Wim De Munter, Mathijs Keunen, Dirk Vandepitte</i>                                                       |     |
| Development of a Universal Small-Satellite Payload for On-Orbit Characterization and Evaluation of Novel Radiation-Shielding Materials ..... | 162 |
| <i>Avery Brock, Malachi Mooney-Rivkin, Luke Idziak, Alejandro Salas, Susan Wrbanek, John Wrbanek</i>                                         |     |
| Production of Flight Instruments for Multi-Satellite Constellations .....                                                                    | 173 |
| <i>Art Jacques, Ulrik Gliese, Alexander Barrie, Craig Pollock, Calinda Yew</i>                                                               |     |
| A Model-Based Tool for Anomaly Management .....                                                                                              | 189 |
| <i>Aneliese Hebenstreit, Michael A. Swartwout</i>                                                                                            |     |

|                                                                                                      |     |
|------------------------------------------------------------------------------------------------------|-----|
| Stability of Projected Elliptical Orbit Formation for Geo-Location of Radio Frequency Emitters ..... | 201 |
| <i>Chek-Wu Tan, Tirupathi Ramana Sabapathy, Bok-Leong Chua</i>                                       |     |

## **SMALL SATELLITE DEPLOYABLE STRUCTURES**

|                                                                                                                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Thermal and Mechanical Design of Thin-Film Solar Arrays on Textile Origami Deployable Structures.....                                                                                                                                                                      | 210 |
| <i>So Yeon Suk, Atsuki Ochi, So Tanaka, Delburg P. Mitchao, Mitsuhiro Yasuhara, Takashi Tomura, Hiraku Sakamoto, Osamu Mori, Hiroyuki Toyota, Yu Miyazawa, Shusaku Kanaya, Masanori Matsushita, Tamotsu Horiuchi, Ryota Takabe, Yuko Hisada, Rie Tokuda, Kenta Noguchi</i> |     |
| Optimization of a Tapered Deployable Space Structure.....                                                                                                                                                                                                                  | 219 |
| <i>Srivatsa Harish, Daisaku Inoyama, Tom Stoumbos, Rakesh K. Kapania</i>                                                                                                                                                                                                   |     |
| Feasibility Analysis of Volute Spring Inspired Self-Deployable Baffle for Space Cameras .....                                                                                                                                                                              | 241 |
| <i>Shunxing Shi, Guglielmo Aglietti</i>                                                                                                                                                                                                                                    |     |
| A Compact Passive Tape Spring Deployer with Application to In-Situ Drag Measurement.....                                                                                                                                                                                   | 256 |
| <i>Robert W. Engebretson, Riley M. Fitzgerald</i>                                                                                                                                                                                                                          |     |
