Volume 13293

Proceedings of SPIE, 1605-7422, V. 13293

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Photonics in Urology 2025*, edited by Hyun Wook Kang, Ronald Sroka, Jian J. Zhang, Proc. of SPIE 13293, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PDT/PTT AND PHOTOBIOMODULATION

- 13293 02 **Dosimetry study of photothermal ablation for the treatment of urethral stricture** [13293-1]
- 13293 03 **Investigation on mechanism of wavelength-dependent laser on stimulative effects of prostate cancer (Best Paper Award)** [13293-2]
- 13293 04 **Effect of energy dependent photobiomodulation on tumor metastasis** [13293-3]

LIGHT-TARGET INTERACTIONS

- 13293 05 **Ho:YAG laser pulse in-water transient pressure field full space measurement** [13293-5]
- 13293 06 **Laser lithotripsy: the impact of beam profile and wavelength on stone ablation** [13293-6]
- 13293 07 **2.1 μ m compact laser with fiber launched output for urological applications** [13293-23]
- 13293 08 **In vivo evaluations on non-ablative transurethral laser treatment of stress urinary incontinence** [13293-8]

TECHNIQUES IN PROSTATE TREATMENT

- 13293 09 **Deep learning-based detection of prostate cancer grades and chronic prostatitis in biparametric MRI (Best Paper Award)** [13293-9]
- 13293 0A **Benefits of holmium laser enucleation of the prostate (HoLEP) over transurethral resection (TURP) for bladder outlet obstruction (BOO) in patients with prostate cancer: a propensity score-matched evaluation for optimum palliative care** [13293-10]
- 13293 0B **Switching lasers: comparing efficacy, efficiency, and safety in learning curves of three surgeons with different experience levels in holmium laser enucleation of the prostate (HoLEP) for pulsed thulium laser enucleation of the prostate (ThuLEP)** [13293-12]
- 13293 0C **Artificial intelligence in urology: combining imaging and clinical data for improved prostate diagnostics** [13293-13]

DIAGNOSTICS IN UROLOGY

- 13293 0D **Methodology to establish non-invasive synchronous heart rate and heart rate variability measurement during uroflowmetry** [13293-17]
- 13293 0E **Detection of high-tone pelvic floor dysfunction using near infrared spectroscopy** [13293-18]

POSTER SESSION

- 13293 0F **Numerical analysis for laser endoluminal treatment of stress urinary incontinence** [13293-7]
