Volume 13295

Proceedings of SPIE, 1605-7422, V. 13295

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Diagnostic and Therapeutic Applications of Light in Cardiology 2025*, edited by Gijs van Soest, Irina V. Larina, Christos Bourantas, Proc. of SPIE 13295, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NEW INSTRUMENTS AND METHODS

- 13295 02 **Improved intravascular fluorescence quantification using a reusable tissue mimicking phantom with conical lumen and an absorptive reference** [13295-6]

HEMODYNAMICS AND PHYSIOLOGY

- 13295 03 **Deep learning-enabled quantification of the capillary network in the myocardium by autofluorescence imaging** [13295-20]

POSTER SESSION

- 13295 04 **Detection of vascular calcification via peripheral diffuse reflectance flow patterns changes** [13295-25]
- 13295 05 **Peripheral hemodynamic changes during leg elevation using near-infrared spectroscopic imaging** [13295-26]
- 13295 06 **Visualization of fiber structure and calcification of porcine and human aortic valve and pericardium tissue via optical coherence tomography** [13295-39]
