# Biophotonics and Immune Responses XX

Wei R. Chen Feifan Zhou Editors

27–28 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13296

Proceedings of SPIE, 1605-7422, V. 13296

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Biophotonics and Immune Responses XX, edited by Wei R. Chen, Feifan Zhou, Proc. of SPIE 13296, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510683402 ISBN: 9781510683419 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

v Conference Committee

## 20 YEARS OF BIOPHOTONICS AND IMMUNE RESPONSES

13296 02 The optical dosimetry of PDT (Invited Paper) [13296-3]

#### IN VIVO MONITORING OF IMMUNE RESPONSES

- 13296 03 Deep-UV microscopy for label-free lymphocyte characterization and subtyping [13296-10]
- 13296 04 Profiling macrophage responses to biochemical stimuli via stimulated Raman scattering microscopy [13296-11]
- 13296 05 Effect of simulation on normalized glandular dose coefficients in phase-sensitive breast tomosynthesis prototypes using various x-ray filters [13296-66]

#### PHOTOIMMUNOTHERAPY FOR CANCER

13296 06 A preliminary study on fusing CT and pathology information to improve the performance of tumor response prediction [13296-14]

### POSTER SESSION

13296 09 Segment anything model (SAM) for metastatic tumor segmentation: evaluating its impact on chemotherapy response prediction [13296-44]

#### **DIGITAL POSTER SESSION**

- 13296 0A Amyloid-β oligomers induced AD-like pathological changes in human cerebral organoids [13296-32]
- 13296 OB Reduced glucose utilisation accompanied by inflammation in the brain of spontaneous type 2 diabetic cynomolgus monkeys and its association with AD-like pathology [13296-34]
- 13296 OC Brain insulin resistance and its effect on AD-like pathological formation in spontaneous type 2 diabetic cynomolgus monkeys [13296-37]

- 13296 0D Blood metabolomics analysis combined with machine learning to reveal the key metabolites associated Alzheimer's disease in cynomolgus monkeys with spontaneous obesity [13296-38]
- 13296 OE The synthesis and characterization of medin oligomers and its effects on nerve cells in vitro [13296-39]
- 13296 OF The deposition and cross-seeding of islet amyloid polypeptide and phosphorylated a-Synuclein in gut, myocardium, and brain of cynomolgus monkeys with spontaneous type 2 diabetes mellitus [13296-40]
- 13296 0G Impaired intestinal barrier and intestinal AD-like pathological formation in type 2 diabetic cynomolgus monkeys [13296-41]
