**Volume 13297**

Proceedings of SPIE, 1605-7422, V. 13297

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Mechanisms of Photobiomodulation Therapy XIX*, edited by Ann Liebert, Jeri-Anne Lyons, James D. Carroll, Proc. of SPIE 13297, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

---

## MECHANISMS OF PHOTOBIOMODULATION

---

- 13297 02 **Proposal for suitable classification of photomedical concepts** [13297-1]
- 13297 03 **In vitro evidence on photobiomodulation by blue LED light** [13297-3]
- 13297 04 **Harnessing photobiomodulation therapy: a holistic approach to healthcare and wellness for the MZ generation** [13297-4]
- 13297 05 **Monte Carlo simulation of temperature distribution for skin tissue during photobiomodulation** [13297-5]
- 13297 06 **Dosimetric characterization of photobiomodulation devices at 660nm and 810nm for clinical applications in dentistry (Invited Paper)** [13297-6]

---

## PHYSICAL MECHANISMS OF PBM

---

- 13297 07 **Photostimulation of mitochondria: a Raman microspectroscopy approach (Invited Paper)** [13297-7]
- 13297 08 **In vitro study of optical vortex and photobiomodulation effects for the development of Parkinson's disease treatment** [13297-9]

---

## CLINICAL APPLICATIONS OF PBM

---

- 13297 09 **Evaluating the impact of soft tissue flaps on red and near-infrared light transmission in porcine cortical bone: a preliminary study for dental applications** [13297-13]
- 13297 0A **Enhanced post-arthroplasty shoulder rehabilitation following total rotator cuff tear: a study case with a synergistic approach using physiotherapy and multimodal photobiomodulation** [13297-14]

---

## POSTER SESSION

---

- 13297 0B **Novel glaucoma therapy rescuing excitotoxicity in an ischemia-reperfusion mice model** [13297-20]
