Proceedings of SPIE, 1605-7422, V. 13298

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Diagnosis, Monitoring, Prevention, and Treatment of Infections and Inflammatory Diseases 2025*, edited by Tianhong Dai, Jürgen Popp, Mei X. Wu, Proc. of SPIE 13298, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## PHOTONIC DIAGNOSIS AND MONITORING II

---

- 13298 02 **Label-free detection of respiratory virus co-infections: integrating surface-enhanced Raman scattering with deep learning (Invited Paper)** [13298-4]
- 13298 03 **Antibiotics quantification in a compact SERS-based centrifugal microfluidics platform: the case of Meropenem in ICU settings (Invited Paper)** [13298-9]

---

## PHOTONIC DIAGNOSIS AND MONITORING III

---

- 13298 04 **RamanBioAssay platform for fast and comprehensive characterization of pathogenic bacteria (Invited Paper)** [13298-10]
- 13298 05 **Correlated micro-spectroscopic labelling and analysis of leukocytes (Best Paper Award)** [13298-14]

---

## ANTIMICROBIAL PHOTOTHERAPY I

---

- 13298 06 **Antimicrobial photodynamic inactivation as a means to improve the safety of temporary polymer implants** [13298-17]

---

## ANTIMICROBIAL PHOTOTHERAPY III

---

- 13298 07 **Photosensitization: an alternative approach to control infections** [13298-24]
- 13298 08 **Photodynamic therapy for infection treatment through novel laminar flow fibre optics** [13298-26]
