Optical Methods for Tumor Treatment and Detection: Mechanisms and Techniques in Photodynamic Therapy XXXIII

David H. Kessel Tayyaba Hasan Edward V. Maytin Editors

25–27 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13299

Proceedings of SPIE, 1605-7422, V. 13299

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Optical Methods for Tumor Treatment and Detection: Mechanisms and Techniques in Photodynamic Therapy XXXIII, edited by David H. Kessel, Tayyaba Hasan, Edward V. Maytin, Proc. of SPIE 13299, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510683464 ISBN: 9781510683471 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

DRUG DELIVERY PROCEDURES

13299 02 Applying photodynamics for radiotherapy-controlled drug delivery [13299-1]

PDT GENERAL TOPICS

- 13299 03In vitro and in vivo analysis in NIR-PDD combining multiphoton excitation and 5-ALA[13299-13]
- 13299 04 Multispectral singlet oxygen luminescence dosimetry (MSOLD) for direct singlet oxygen monitoring during in-vivo photofrin-mediated PDT [13299-14]
- 13299 05 Assessment of generic corrections for multiview Cherenkov emission during total skin electron therapy (TSET) [13299-16]

THERAPEUTIC INDICATIONS

- 13299 06 Monte Carlo analysis of light fluence distribution in pleural PDT [13299-17]
- 13299 07 Direct near-infrared laser-induced suppression of human 2D melanoma [13299-19]

TARGETING AND OXYGENATION

- 13299 08 Impact of scattering medium on singlet oxygen luminescence generation in photodynamic therapy [13299-21]
- 13299 09 Real-time photosensitizer dosimetry for photodynamic therapy [13299-23]

PDT GENERAL TOPICS II

13299 0A Multispectral singlet oxygen luminescent dosimetry (MSOLD) using isotropic detector for photodynamic therapy [13299-25]

- 13299 0B Comparative analysis of multichannel singlet oxygen luminescence dosimetry (MSOLD) and singlet oxygen explicit dosimetry (SOED) in benzoporphyrin derivative (BPD)-mediated photodynamic therapy: a mouse model study [13299-27]
- 13299 OC Adanced photodynamic therapy monitoring using a 7-channel continuous singlet oxygen luminescent dosimetry (CSOLD) device [13299-28]

POSTER SESSION

13299 0D Determination of optimal Photofrin-mediated PDT treatment parameters for long-term survival [13299-29]
