PROGRESS IN BIOMEDICAL OPTICS AND IMAGING Vol. 26 No. 9

Ophthalmic Technologies XXXV

Daniel X. Hammer Derek Nankivil Yuankai K. Tao Editors

25–27 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13300

Proceedings of SPIE, 1605-7422, V. 13300

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Ophthalmic Technologies XXXV*, edited by Daniel X. Hammer, Derek Nankivil, Yuankai K. Tao, Proc. of SPIE 13300, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510683488 ISBN: 9781510683495 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

NEURO-OPHTHALMOLOGY, NEURODEGENERATION, AND GLAUCOMA

- 13300 02 Age-related loss rate of the minimal cross section of the waist of the nerve fiber layer in the optic nerve head estimated with OCT [13300-1]
- 13300 03 High-resolution multimodal optical coherence tomography and scanning laser ophthalmoscopy for in vivo mouse retinal imaging [13300-2]

NOVEL DEVICES AND METHODOLOGY

- 13300 04 **1.7MHz, 840nm swept-source ophthalmic OCT** [13300-10]
- 13300 05 Imaging photoreceptor somas and their loss in disease in the living human eye [13300-16]

NOVEL THERAPIES, VISION RESTORATION, AND VISION CORRECTION

13300 06 Effectiveness of central and peripheral corneal cross-linking in correcting hyperopia and myopia [13300-18]

ANTERIOR SEGMENT IMAGING AND TECHNOLOGIES

13300 07 Imaging the entire human vitreous body in vivo with synchronous OCT window scanning and adaptive focusing (Pascal Rol Award) [13300-25]

ANGIOGRAPHY, HEMODYNAMICS, AND OXIMETRY

- 13300 08 Functional OCT reveals anisotropic vessel pulsatility in human retinas [13300-31]
- 13300 09 High dynamic range choroidal imaging with transcranial illumination [13300-34]

FUNCTIONAL METHODS AND OPTORETINOGRAPHY

13300 0A Single-cell imaging, single-spot optoretinography sensing (SCISSORS) in living human subjects [13300-45]

MACHINE LEARNING AND COMPUTATIONAL METHODS

13300 0B Enhancing ophthalmic examinations with real-time eye position monitoring using SVM [13300-48]

INTRAOPERATIVE, MICROSCOPE INTEGRATED, HANDHELD, AND ROBOTIC SYSTEMS

13300 0C Developing an affordable smartphone PedCam for comprehensive examination of retinopathy of prematurity [13300-53]

POSTER SESSION

13300 OD An embedded clinical decision support system for OCT [13300-58] 13300 OE Precise control of eye movement for real-time video funduscopy and OCT using dynamic fixation patterns [13300-59] 13300 OF Retinal feature analysis from Al-driven OCT to OCTA translation [13300-62] 13300 0G Automatic segmentation for early glaucoma detection using nnU-Net [13300-65] Denoising diffusion probabilistic models for classifying ophthalmic disease [13300-68] 13300 OH 13300 OI Extending the measurement range in ophthalmic linear optical coherence tomography using dual reference path interferometry [13300-70] 13300 OJ A simulation study of fluorescein attenuation and dynamic tracer kinetic model-extracted retinal blood flow from human retinal fluorescein videoangiographies [13300-71] Dynamic reference arm adjustment for wide-field OCT/OCTA of posterior eye with limited 13300 OK imaging depth range [13300-73] 13300 OL Robust real-time retinal tracking for ophthalmic applications [13300-74] 13300 OM Optimizing OCT alignment: a semi-automatic alignment module for OCT imaging [13300-79] 13300 ON Three-dimensional OCT segmentation of anatomic and pathologic features of vitreoretinal interface disorders [13300-80] 13300 00 Multimodal scanning confocal light microscopy (SCLM) with optical coherence microscopy (OCM) for ex vivo mouse retinal tissue imaging [13300-82] 13300 OP Multi-role OCT system for comprehensive eye scanning [13300-83]

- 13300 0Q Potential-driven electrochemical clearing of ex vivo acidic corneal injuries [13300-85]
- 13300 OR Cracking the code: enhancing interpretability and accessibility of ophthalmic disorder detection using Kolmogorov-Arnold Network [13300-87]
