# Molecular-Guided Surgery: Molecules, Devices, and Applications XI

Summer L. Gibbs Kenneth M. Tichauer Editors

25–27 January 2025 San Francisco, California, United States

Sponsored by SPIE

Cosponsored by Intuitive Surgical (Switzerland) Karl Storz SE & Company KG (Germany) Quel Imaging, LLC (United States) Stryker (Canada) SurgiMab (France)

Published by SPIE

Volume 13301

Proceedings of SPIE, 1605-7422, V. 13301

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Molecular-Guided Surgery: Molecules, Devices, and Applications XI,* edited by Summer L. Gibbs, Kenneth M. Tichauer, Proc. of SPIE 13301, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510683501 ISBN: 9781510683518 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v Conference Committee

# IMAGING SYSTEMS AND ADVANCED IMAGING METHODS I

- 13301 02 Spatial-frequency 3D fluorescence for surgical guidance: margin thickness quantification [13301-9]
- 13301 03 Time-resolved measurements of protoporphyrin IX prompt and delayed fluorescence with a dual-channel time-correlated single photon counting system [13301-10]

#### **CONTRAST AGENTS I**

13301 04 Using paired-agent principles and widefield fluorescence optical projection tomography to rapidly identify and localize lymph node micro metastases [13301-21]

#### PRECLINICAL AND CLINICAL TRANSLATION I

13301 05 High dynamic range multi-spectral RGB-NIR imaging platform for image-guided surgery [13301-27]

#### IMAGING SYSTEMS AND ADVANCED IMAGING METHODS II

- 13301 06 Multispectral photoacoustic imaging for breast cancer detection and hysterectomy guidance (Invited Paper) [13301-28]
- 13301 07 Development of exogenous contrast agents to identify cancer using optoacoustic imaging (Invited Paper) [13301-30]
- 13301 08 Bioinspired 9-band camera for image-guided cancer surgery with multiple NIR fluorophores [13301-31]

# PRECLINICAL AND CLINICAL TRANSLATION II

13301 09 Canvas fluorescence imaging system characterization for intraoperative visualization of cancer cells with tozuleristide (BLZ-100) for a randomized, multi-center, phase 2/3 pediatric CNS tumor trial [13301-35]

# **CLINICAL APPLICATIONS**

13301 0A Democratizing advanced surgical guidance: decoupling the state-of-the-art from tertiary centers and breaking trail for autonomous robotic surgery in austere environments (Invited Paper) [13301-40]

## **POSTER SESSION**

13301 OB A single-channel optical tomography system for quantification of PPIX delayed fluorescence imaging for assessment of tissue hypoxia [13301-44]
