Clinical and Translational Neurophotonics 2025

Jana M. Kainerstorfer Erin M. Buckley Vivek J. Srinivasan Editors

25–27 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13302

Proceedings of SPIE, 1605-7422, V. 13302

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Clinical and Translational Neurophotonics 2025*, edited by Jana M. Kainerstorfer, Erin M. Buckley, Vivek J. Srinivasan, Proc. of SPIE 13302, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510683525 ISBN: 9781510683532 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

NOVEL NEURO TECHNOLOGY

- 13302 02 Characterizing neural and systemic responses during acute psychosocial stress using functional near infrared spectroscopy [13302-1]
- 13302 03 HyperProbe consortium: transforming tumour neurosurgery with innovative hyperspectral imaging [13302-4]

NEUROMONITORING: ANIMAL MODELS

- 13302 04 Real-time monitoring of cerebral blood flow in dogs during surgery assisted by continuouswave functional near infrared spectroscopy [13302-5]
- 13302 05 Anesthetic effects on functional connectivity fingerprinting in mice [13302-7]

CEREBRAL BLOOD FLOW I

13302 06 Monitoring optical and physiologic properties of brain in response to anesthetic drugs using hybrid optical imaging system [13302-13]

CEREBRAL BLOOD FLOW II

13302 07 CoMind R1: a multichannel interferometric optical system for real-time blood flow measurements at late times-of-flight [13302-17]

CEREBRAL BLOOD FLOW III

- 13302 08 Early brain monitoring of infants with prenatal opioid exposure using quantitative diffuse optical spectroscopy [13302-23]
- 13302 09 Measuring cerebral blood flow at late times-of-flight with CoMind R1: a multichannel interferometric optical neuromonitoring system [13302-25]

TRANSLATIONAL NIRS

- 13302 0A Depth-enhanced time-resolved NIRS monitoring of deep brain regions at risk of injury in preterm infants [13302-27]
- 13302 0B Feasibility of broadband absorption spectroscopy to assess cerebral water content in adults [13302-28]
- 13302 0C Comparative analysis of resting-state functional connectivity networks across different age groups using fNIRS [13302-29]

INDUSTRY SESSION

13302 0D Assessment of cerebral oxygenation in children with pneumonia via TD-NIRS oximetry (Invited Paper) [13302-30]

POSTER SESSION

13302 OE Direct non-invasive measurement of blood flow changes in the anterior cerebral artery using diffuse correlation spectroscopy [13302-48]
