## **Neural Imaging and Sensing 2025**

**Qingming Luo** Jun Ding Ling Fu Editors

27–29 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13303

Proceedings of SPIE, 1605-7422, V. 13303

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Neural Imaging and Sensing 2025*, edited by Qingming Luo, Jun Ding, Ling Fu, Proc. of SPIE 13303, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510683549 ISBN: 9781510683556 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## Contents

v Conference Committee

## **BRAIN ACTIVITIES I**

- 13303 02 Cyto- and myeloarchitectonics characterization of human cortex and brainstem with light sheet fluorescence microscopy (Invited Paper) [13303-9]
  13303 03 LPS-induced systemic inflammation reduced sensory stimulation-evoked astrocyte Ca<sup>2+</sup> without altering the vascular response in the APP/PS1dE9 mouse model [13303-10]
  13303 04 Constructing equivalent Hodgkin-Huxley neuron spice model of the subthalamic nucleus verified by swine deep brain stimulation [13303-11]
  BRAIN ACTIVITIES II
  13303 05 Establishing the neuron SPICE model of basal ganglia in Parkinson's disease based on the
- Hodgkin-Huxley conductance-based theory [13303-21]

## POSTER SESSION

- 13303 06 Digital scanning lightsheet microscopy (DSLM) for Drosophila whole brain functional imaging [13303-24]
- 13303 07 Simultaneous optical wireless communication and sensing for brain implants [13303-28]
