Optical Coherence Tomography and Coherence Domain Optical Methods in Biomedicine XXIX

Rainer A. Leitgeb Yoshiaki Yasuno Editors

27–30 January 2025 San Francisco, California, United States

Sponsored by SPIE

Cosponsored by Carl Zeiss Meditec AG (Germany)

Published by SPIE

Volume 13305

Proceedings of SPIE, 1605-7422, V. 13305

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Optical Coherence Tomography and Coherence Domain Optical Methods in Biomedicine XXIX, edited by Rainer A. Leitgeb, Yoshiaki Yasuno, Proc. of SPIE 13305, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510683587 ISBN: 9781510683594 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

DYNAMIC CONTRAST OCT

13305 02	Large-area dynamic contrast MHz optical coherence tomography for label-free imaging of porcine tissue (Best Paper Award Finalist) [13305-1]
13305 03	Fusion of multiple dynamics-OCT contrasts for assessment of intratissue dynamics and visualization of dynamics-domain structures (Best Paper) [13305-2]
13305 04	Neural network-based high-speed amplitude spectral dynamic optical coherence tomography [13305-3]
13305 05	Quantified speckle variance optical coherence tomography algorithm for high-contrast imaging in vitro and in vivo [13305-5]
13305 06	Speckle decorrelation rate for visualizing therapeutic thermal field with OCT [13305-6]
	OPHTHALMIC OCT: INSTRUMENTATION AND METHODS
13305 07	Non-mydriatic ultra-widefield optical coherence tomography retinal imaging with custom optics [13305-9]
13305 08	Zero-shot OCT segmentation for volumetric and live-streaming data [13305-12]
	FUNCTIONAL AND ADVANCED RETINAL IMAGING
13305 09	Artificial intelligence assisted intraocular inflammatory cell differentiation with ultrahigh- resolution OCT [13305-15]
13305 0A	Optophysiology using dynamic full-field optical coherence tomography (D-FF-OCT) (Best Paper Award Finalist) [13305-16]
	PRECLINICAL IMAGING
13305 OB	Assessing the biomechanical properties of murine mouse embryo inside the yolk sac using multifocal acoustic radiation force-based reverberant optical coherence elastography [13305-31]

- 13305 0C Miniaturized head-mount Doppler optical coherence tomography scope for freely moving mouse [13305-33]
- 13305 0D Automated 3D segmentation of hydrogel-treated mice wounds using optical coherence tomography and deep learning [13305-36]

IMAGING CANCER AND TISSUE PATHOLOGY

13305 0E Deep learning classification of colon polyps for colorectal cancer detection (CRC) using feature-enhanced ex vivo optical coherence tomography (OCT) images [13305-48]

FULL-FIELD OCT TECHNOLOGY

13305 0F Influence of spatial coherence on lateral resolution and SNR in full-field OCT [13305-54]

NEW OCT TECHNOLOGY

13305 0G Impact of the biphotons' spectral correlation type on the performance of Fourier-domain quantum optical coherence tomography [13305-63]

NOVEL LIGHT SOURCES AND COMPONENTS

- 13305 0H High-performance chip-scale OCT at 1310 and 1060nm with module-level integration [13305-70]
- 13305 01 Swept-source optical coherence tomography at green wavelengths using broadband frequency doubling of NIR MEMS-VCSELs [13305-71]
- 13305 0J Visible light swept source for optical coherence tomography [13305-73]
- 13305 0K Towards ultrahigh resolution MHz retinal SS-OCT: 187nm section-wise tuning of a FDML laser at 1050nm [13305-76]
- 13305 0L Reducing cost but not quality with digital scanner interfaces for optical coherence tomography [13305-77]

POSTER SESSION

	13305 OM	Fast OCT	deconvolution	using a li	ght-weight	CNN	[13305-7	8]
--	----------	----------	---------------	------------	------------	-----	----------	----

13305 0N Deep learning for robotic-assisted OCT [13305-79]

- 13305 00 Coherence-property evaluation of tunable VCSELs for SS-OCT by interferometric method with a 3×3 coupler [13305-80]
- 13305 OP Intracellular activity-type and parameter estimation from dynamic optical coherence tomography signals (Best Poster Award Finalist) [13305-81]
- 13305 0Q In vivo multi-contrast zebrafish imaging using Jones-matrix optical coherence tomography [13305-82]
- 13305 OR Computational augmentation of spatially coherent full-field optical coherence microscope for cellular-resolution and millimeter-depth imaging [13305-83]
- 13305 0S Speckle-modulated formulation and speckle-free imaging in full-field swept-source optical coherence tomography based on dispersed scatterer model [13305-87]
- 13305 0T Deep learning classification of en face multi-spectral optical coherence tomography images [13305-88]
- 13305 0U Advanced classification of Keratoconus using machine learning and polarization-sensitive OCT [13305-89]
- 13305 0V Semantic segmentation and classification of OCT colorectal polyp images [13305-91]
- 13305 0W Osteosarcoma chemosensitivity signatures from BETi with holographic dynamic-contrast OCT [13305-92]
- 13305 0X A novel approach to depolarization analysis in PS-OCT: complex inner product versus DOPU [13305-94]
- 13305 0Y Optimization of sensitivity, resolution, and phase-retardance stability in all-fiber Jones matrix optical coherence tomography system [13305-95]
- 13305 0Z OCT angiography model eye by use of the Brownian motion without flowing liquids [13305-96]
- 13305 10 Generalized representation of OCT signals and its applications to de-speckling and spatial-differential imaging [13305-97]
- 13305 11 Dynamic OCT simulator based on mathematical models of intratissue dynamics, image formation, and measurement noise [13305-98]
- 13305 12 Switchable lateral resolution real-time MHz-OCT rectoscopy for enhanced colorectal disease diagnosis (Best Poster Award) [13305-100]
- 13305 13 Multi-view imaging and optical path reconstruction for dental optical coherence tomography [13305-105]
- 13305 14 Effect of polarization on the point spread function in optical coherence tomography [13305-111]
