SPIE

Volume 13307

Proceedings of SPIE, 1605-7422, V. 13307

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optics and Biophotonics in Low-Resource Settings XI*, edited by David Levitz, Aydogan Ozcan, Proc. of SPIE 13307, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NEW TECHNOLOGIES I

- 13307 02 **Light-assisted drying (LAD) for the thermal stabilization of inactivated poliovirus vaccine**
[13307-1]
- 13307 03 **M-sequence-based photoacoustic signal amplification with low-power light sources**
[13307-3]

NEW APPROACHES FOR LOW COST OPTICAL POC ASSAYS

- 13307 04 **A 3D printed microfluidic device and miniaturized fluorimeter towards low-resource environments** [13307-8]

LOW COST OXIMETRY METHODS

- 13307 05 **Tissue optics-informed blood hemoglobin assessment for advancing sickle cell care**
[13307-9]
- 13307 06 **Illuminate-OxyView: a handheld point-of-care device for imaging tissue oxygen saturation in diabetic foot ulcers using a skin-tone-specific machine learning approach** [13307-11]

OCT FOR LOW RESOURCE SETTINGS

- 13307 07 **Single board computer and adapted 3D-printed case-based low cost and compact optical coherence tomography** [13307-13]

OPTICAL DIAGNOSTIC AND THERAPEUTIC METHODS FOR CERVICAL CANCER

- 13307 0A **Development of image preprocessing toolbox to boost cervical cancer detection**
[13307-22]

INNOVATIVE SPECTRAL METHODS FOR LOW RESOURCE SETTINGS

- 13307 0B **Performance evaluation of a miniature 14-channel spectrometer for low-cost qPCR**
[13307-24]

- 13307 0C **Hyperspectral learning of colors for mHealth applications** [13307-25]
- 13307 0D **Sharpness-aware minimization (SAM) improves classification accuracy of bacterial Raman spectral data enabling portable diagnostics** [13307-27]

POSTER SESSION

- 13307 0E **Domain adaptive deep learning for advanced otoscope** [13307-29]
- 13307 0F **Cost-effective spectral quantification of skin tone for improved medical optical instrumentation** [13307-32]
- 13307 0G **Spectral recovery in photographs using a hyperspectral color chart** [13307-33]
