Volume 13309

Proceedings of SPIE, 1605-7422, V. 13309

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multimodal Biomedical Imaging XX*, edited by Xavier Intes, Marien Ochoa, Mohammad A. Yaseen, Proc. of SPIE 13309, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MULTIMODAL MICROSCOPY

- 13309 02 **Mesosopic light-sheet imaging set-up for 3D SWIR fluorescence intensity and NIR fluorescence lifetime imaging** [13309-3]
- 13309 03 **Programmable multimodality microscope for automated cell culture monitoring in cell therapy** [13309-4]

OCT-BASED MULTIMODAL IMAGING

- 13309 04 **Multimodal optical imaging of the effect of alcohol exposure on zebrafish embryonic development** [13309-6]
- 13309 05 **Using artificial intelligence to screen for retinal tears in patients with acute, symptomatic posterior vitreous detachments** [13309-8]
- 13309 06 **Multimodal OCT with confocal laser scanning microscopy (CLSM) tandem enables cellular identification and in vivo real-time tracking for zebrafish imaging** [13309-11]
- 13309 07 **A multimodal monitoring platform for animal physiology and behavior during intravital brain imaging** [13309-32]

MULTIMODAL IMAGING IN RADIATION THERAPY

- 13309 08 **Understanding the impact of patient-specific geometries on Cherenkov emission-to-dose relationship during external beam radiation therapy (EBRT)** [13309-12]
- 13309 09 **Real-time dosimetry using scintillator technology in external beam radiation therapy (EBRT)** [13309-14]

MULTIMODAL SPECTROSCOPY AND IMAGING ACROSS TISSUES

- 13309 0A **MRI-guided near-infrared spectroscopic tomographic imaging system for breast cancer imaging: system validation and artifacts reduction** [13309-15]
- 13309 0B **Quantitative diffuse optical spectroscopy and T1 mapping of gadolinium-incorporated porphyrane nanoparticles for guided theranostics of oral cancer in mice** [13309-19]

- 13309 0C **Deep learning-based virtual multimodal fluorescence staining of fresh thick tissue using 3D epi-mode quantitative phase imaging** [13309-21]
- 13309 0D **Comprehensive characterization and multimodal image processing with the Polaroid P31 intraoral camera** [13309-23]

POSTER SESSION

- 13309 0E **Semiautomated mapping of tumor annotations from H&E to fluorescence images of human breast surgical tissues** [13309-24]
- 13309 0F **Depth detection limits of diffuse fluorescence tomography for system combination with US imaging guidance** [13309-27]
- 13309 0G **Implementation of an optical-thermal imaging mobile scanner for diabetic foot ulcers monitoring** [13309-31]
- 13309 0H **Progress and validation of integrated optical coherence and confocal fluorescence microscopy for diagnosing ocular surface diseases and tear film disorders** [13309-33]
- 13309 0I **Optimization of carbon-14 radioisotope microscope via étendue analysis** [13309-36]
- 13309 0K **Real-time monitoring of melanoma tumor by utilizing high-frequency ultrasounds combined with infrared spectroscopy** [13309-39]
- 13309 0L **Fluorescence lifetime imaging and signal reconvolution for characterizing laser-induced melanosome degradation** [13309-40]
- 13309 0M **Development and integration of OCT/OCTA with snapshot multispectral imaging for advanced tissue analysis for diagnostic applications** [13309-10]
