**Volume 13313**

Proceedings of SPIE, 1605-7422, V. 13313

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biophotonics in Exercise Science, Sports Medicine, Health Monitoring Technologies, and Wearables VI*, edited by Babak Shadgan, Amir H. Gandjbakhche, Proc. of SPIE 13313, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## OPTICS IN EXERCISE SCIENCE

---

- 13313 02 **Cerebral responses to resistance training under different loads assessed with functional near-infrared spectroscopy** [13313-1]
- 13313 03 **Cricket bowling action sensor based on multimode-single mode-multimode fiber interferometer** [13313-3]

---

## OPTICAL DIAGNOSIS

---

- 13313 04 **Utilizing near-infrared spectroscopy to monitor and assess muscle spasticity in children with cerebral palsy undergoing Botox treatment: a feasibility study (Best Paper Award - 1st Place)** [13313-6]

---

## OPTICAL SIGNALS AT BEDSIDE

---

- 13313 05 **High-quality photoplethysmography signals using a new non-contact method** [13313-8]
- 13313 06 **A TBP DICOM format for total-body scanner-independent lesion evolution detection** [13313-10]

---

## EXPERIMENTAL BIOPHOTONICS

---

- 13313 07 **Thigh cuff release-induced repeated acute hypotension and cerebral oxygenation recovery** [13313-12]
- 13313 08 **Development of an optical technology-based sensor and deep learning models to estimate user-interaction forces in smart walkers** [13313-13]

---

## CLINICAL BIOPHOTONICS

---

- 13313 0A **Stress biomarker test for athletes with portable optical detector and functionalized quantum dots** [13313-18]

---

#### OPTICS FOR VITAL SIGN MONITORING

---

- 13313 0B **Three methods for extracting respiratory rate from speckle plethysmography** [13313-19]
- 13313 0C **Quantifying consistency in tissue oxygenation across anatomical landmarks in healthy individuals through near-infrared spectroscopy** [13313-20]
- 13313 0D **Phasor-based hyperspectral thermal imaging for contactless vital sign detection** [13313-22]
- 13313 0E **Development of deep learning models for motion artifact mitigation in wearable PPG devices** [13313-23]

---

#### POSTER SESSION

---

- 13313 0F **Flacara: future of dermoscopy** [13313-24]
- 13313 0G **Action research on the integration of panoramic VR interactive teaching materials into emergency nursing for vocational school students** [13313-26]
