**Volume 13314**

Proceedings of SPIE, 1605-7422, V. 13314

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Tomography and Spectroscopy of Tissue XVI*, edited by Sergio Fantini, Paola Taroni, Proc. of SPIE 13314, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422

ISSN: 2410-9045 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## THEORY, MONTE CARLO, MACHINE LEARNING, AND PHANTOMS

---

- 13314 02 **Open-source 2D multispectral forward and inverse solver of the radiative transfer equation** [13314-1]
- 13314 03 **Simple and versatile analytical model for continuous-wave fluorescence in multilayered turbid media under the diffusion approximation** [13314-2]
- 13314 04 **Extending application limits of scaling relations for time-resolved Monte Carlo simulations in diffuse optics (Invited Paper)** [13314-3]
- 13314 05 **Direct application of deep learning for diffuse optical tomography** [13314-4]
- 13314 07 **Absorption properties of common chromophores for tissue-mimicking phantoms in Intralipid and glass microspheres** [13314-6]

---

## SPECTROSCOPY AND IMAGING OF TISSUE

---

- 13314 09 **Comparison of frequency domain optical tomography with ultrasound imaging in the classification of joints of systemic lupus erythematosus patients** [13314-8]
- 13314 0B **Simple forward model of noncontact diffuse reflectance spectroscopy in a center-illuminated-area-detection geometry for measuring myoglobin forms in retail beef** [13314-10]

---

## OXIMETRY AND SPECTROSCOPY OF MUSCLE

---

- 13314 0D **Impact of adipose and bone tissues in diffuse optical measurements of skeletal muscle: in vivo data and theoretical simulations** [13314-12]
- 13314 0E **Effects of epidermal pigmentation on the accuracy of hyperspectral versus commercial near-infrared spectroscopy tissue oximeters** [13314-13]
- 13314 0F **Noncontact assessment of oxymyoglobin changes in beef during retail display using diffuse reflectance spectroscopy in a new configuration** [13314-16]
- 13314 0G **Preliminary investigation of partial optical path-lengths in pulse oximetry** [13314-14]

---

#### SFDI AND DIFFUSE REFLECTANCE

---

- 13314 0J **Structured light imaging mesoscopy for detection of embedded morphological changes in superficial tissues** [13314-20]
- 13314 0K **Computational defocus correction in spatial frequency domain imaging** [13314-18]
- 13314 0L **Speckle noise reduction in coherent spatial frequency domain imaging** [13314-19]

---

#### TIME-DOMAIN METHODS AND APPLICATIONS

---

- 13314 0N **Spatial resolution of parameterized temporal data in  $l_0$ -norm-based time-domain diffuse optical tomography (TD-DOT)** [13314-22]
- 13314 0O **Multiplying the number of effective channels in time-domain single-photon counting applications** [13314-23]
- 13314 0P **Compressive illumination architecture for hyperspectral time-resolved near-infrared tissue spectroscopy** [13314-24]
- 13314 0Q **Large source-detector distance time-resolved measurements to probe adult lungs non-invasively** [13314-25]
- 13314 0R **Measurement of placental depth during time domain NIRS using deep learning** [13314-26]
- 13314 0S **Modeling of time domain diffuse Raman spectroscopy in a two-layer medium** [13314-27]

---

#### BREAST IMAGING

---

- 13314 0U **Prospective study of quantitative broadband diffuse optical spectroscopy for differential diagnosis of suspicious breast lesions** [13314-29]
- 13314 0X **Errors induced by partial pathlength variations due to mammographic compression in dynamic diffuse optical breast imaging** [13314-32]
- 13314 0Y **Improving the quality of diffuse optical tomography reconstruction with APU-Net: an attention-based physical U-Net model** [13314-33]

---

#### BRAIN I

---

- 13314 0Z **Optical biomarkers for sepsis-related microcirculatory impairment (Invited Paper)** [13314-34]
- 13314 10 **Reproducibility of a hybrid time-resolved NIRS/DCS system: towards daily cerebral metabolism monitoring in the ICU** [13314-35]

- 13314 11 **Monte Carlo simulations of time-of-flight resolved blood flow index: times-of-flight beyond 1ns permit selective measurement of pulsatile cerebral blood flow** [13314-36]
- 13314 12 **Dual-slope near-infrared spectroscopy for selective sensitivity to cerebral hemodynamics** [13314-37]

---

#### **BRAIN II**

---

- 13314 13 **NeuroDOT: a Matlab and Python toolbox for diffuse optical tomographic brain mapping (Invited Paper)** [13314-38]
- 13314 14 **High framerate FD-fNIRS for auditory-inspired speech hemodynamic response function** [13314-39]
- 13314 15 **Experimental evidence for anisotropic diffusion of light in white matter tissue** [13314-40]

---

#### **POSTER SESSION**

---

- 13314 18 **Imaging dynamic targets through scattering media with chip-scale ultra-high density diffuse optical tomography** [13314-58]
