Volume 13316

Proceedings of SPIE, 1605-7422, V. 13316

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Diagnostics and Sensing XXV: Toward Point-of-Care Diagnostics*, edited by Gerard L. Coté, Justin S. Baba, Proc. of SPIE 13316, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PULSE OXIMETRY WITH SKIN TONE VARIATIONS

- 13316 02 **Development of a melanin-inclusive reflective pulse oximeter model for equitable performance tested in a large-animal model undergoing hypoxia: pilot study** [13316-11]
- 13316 03 **Improving noninvasive fetal pulse oximetry using N-layer analysis techniques for extraction of deep layer absorption change from silicon-based phantoms** [13316-13]

NEAR INFRARED IMAGING AND SPECTROSCOPY APPLICATIONS

- 13316 04 **Assessing inflammation in the proximal interphalangeal joints of systemic lupus erythematosus patients with a flexible optical imaging system** [13316-15]
- 13316 05 **Noninvasive detection of craniosynostosis using SWIR imaging for real-time evaluation** [13316-16]
- 13316 06 **Machine learning-enhanced wavelength detection for point-of-care optical devices in tissue oxygenation and peripheral arterial disease assessment (Translational Research Award)** [13316-17]
- 13316 07 **Preliminary study to validate the use of dynamic optical spectroscopy to monitor oxygen saturation changes in the carotid artery** [13316-19]
- 13316 08 **Wearable health monitoring system using multispectral sensing with visible and near-infrared light** [13316-20]

RAMAN AND SURFACE ENHANCED RAMAN FOR IN VITRO DIAGNOSTICS AND MONITORING

- 13316 09 **Enhancing safety for infusion treatment in oncology through a data-driven multisensory approach based on optical methods** [13316-21]

NEAR INFRARED AND THERMAL MONITORING FOR BIOMEDICAL APPLICATIONS

- 13316 0A **Development of point of care thermographic imaging assessments of peripheral perfusion in scleroderma subjects** [13316-59]
- 13316 0B **Noninvasive monitoring of diabetic foot ulcers healing process by using optical-thermal imaging techniques** [13316-32]

- 13316 0C **Curvature correction in near-infrared spectroscopy for diabetic foot ulcers: a phantom study** [13316-33]
- 13316 0D **Objective assessment of clinical debridement and healing status of diabetic foot ulcers using a smartphone-based NIRS device** [13316-34]
- 13316 0E **Development and validation of a melanin correction factor for a smartphone-based NIRS optical imaging device** [13316-35]

POSTER SESSION

- 13316 0F **Spatially multiplexed glucose, oxygen, and temperature sensing through synthetic tissue phantoms** [13316-36]
- 13316 0G **Tissue curvature correction of irregular surfaces in NIRS imaging using Monte Carlo simulation** [13316-38]
- 13316 0H **Fluorescence-based optical diagnostic of caries: toward a point of care device** [13316-41]
- 13316 0I **Integration of a SPAD on a CMOS nanofluidic platform for fluorescence-labeled single biomolecules detection and imaging** [13316-42]
- 13316 0K **Fluorescence lifetime spectroscopy of hemoglobin** [13316-45]
- 13316 0L **The DermoCytoscope: a breakthrough application specific endocytoscope (ASEC) for affordable and portable skin cancer diagnostics (Translational Research Award)** [13316-60]
- 13316 0M **3D-printed microfluidic platforms integrating bio-orthogonal magneto-plasmonic nanoclusters for analytes separation and SERS-biosensing** [13316-24]
