Optical Interactions with Tissue and Cells XXXVI

Norbert Linz Joel N. Bixler Alex J. Walsh Editors

25–27 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13317

Proceedings of SPIE, 1605-7422, V. 13317

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Optical Interactions with Tissue and Cells XXXVI*, edited by Norbert Linz, Joel N. Bixler, Alex J. Walsh, Proc. of SPIE 13317, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510683822 ISBN: 9781510683839 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

ADVANCED NUMERICAL METHODS FOR MODELING LIGHT TISSUE INTERACTION

- 13317 02 Rapidly accelerated numerical solvers using operator networks for performing laser-tissue optothermal simulations (Best Paper Award 2nd Place) [13317-8]
- 13317 03 Laser speckles simulation for laser speckle contrast imaging [13317-10]

NUMERICAL APPROACHES SIMULATING LASER-TISSUE INTERACTIONS AND RESPONSE

13317 04 A unified computational and experimental approach to determine laser safety of liver tissue [13317-13]

MECHANISMS OF PULSED LASER ABLATION

- 13317 05 Imaging the mechanisms and thermal effects of tissue ablation using annular beam for microbiopsy [13317-16]
- 13317 06 Preliminary results for calibration-free laser-induced breakdown spectroscopy (CF-LIBS) for the elemental analysis of biological samples [13317-18]

OPTICAL PROPERTIES OF TISSUES AND CELLS

- 13317 07 Resting state photon emissions from the pupil of the human eye [13317-55]
- 13317 08 Rapid measurement of scattering coefficient and anisotropy from tissue using an image sensor [13317-19]
- 13317 09 Establishing a causal link between the physiologic range of skin chromophore concentrations and physiologically relevant regions of CIELAB color space (Best Paper Award - 1st Place) [13317-20]

NOVEL APPLICATIONS OF LASERS AND LIGHT IN BIOMEDICINE I

- 13317 0A Laser coagulation of blood vessels at 454nm wavelength for neurosurgical interventions: occlusion rates, process dynamics, and thermal damage [13317-25]
- 13317 OB Supervised IR-laser-based bone surgery for stenosis decompression [13317-26]

NOVEL APPLICATIONS OF LASERS AND LIGHT IN BIOMEDICINE II

- 13317 0C Application of nanosecond mid-infrared lasers in mass spectrometry imaging of intact proteins [13317-30]
- 13317 0D Whispering gallery mode laser: towards the deep and turbid tissue optical sensing [13317-31]
- 13317 OE In vitro analysis on the interaction between cell culture medium and blue LED light [13317-32]

ULTRAFAST LASER PHENOMENA IN CELLS AND TISSUE

13317 OF Nonlinear dynamics of femtosecond laser interaction with the central nervous system in zebrafish (Invited Paper) [13317-33]

POSTER SESSION

- 13317 0G Polarization-driven dynamic laser speckle analysis for characterizing breast cancer cells [13317-38]
- 13317 0J Differentiable rendering for 3-dimensional reconstruction of laser-induced tissue ablation [13317-44]
- 13317 0K Unraveling the complex nature of optical nonlinearity in water-for biophotonics applications [13317-56]
