**Volume 13318**

Proceedings of SPIE, 1605-7422, V. 13318

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Dynamics and Fluctuations in Biomedical Photonics XXII*, edited by Valery V. Tuchin, Martin J. Leahy, Ruikang K. Wang, Proc. of SPIE 13318, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## CELL, TISSUE, AND ORGAN DYNAMICS I

- 13318 02 **The diffuse spectral response of skin in vivo to deformation based on hyperspectral imaging** [13318-31]

---

## CELL, TISSUE, AND ORGAN DYNAMICS II

- 13318 03 **4D monitoring of bacterial biofilm growth at the air-liquid interface with optical coherence interference** [13318-7]

---

## DYNAMIC AND ANGIOGRAPHIC OCT/OCTA II

- 13318 05 **Machine learning-based optimization of photodynamic therapy for human skin affected by malignant melanoma: a Monte Carlo study and 3D renderings** [13318-18]

---

## DYNAMIC AND ANGIOGRAPHIC OCT/OCTA III

- 13318 06 **Investigation of developmental defects of zebrafish embryos caused by alcohol consumption using optical coherence microscopy (Invited Paper)** [13318-22]
- 13318 07 **Assessing the effects of prenatal cannabinoid consumption on fetal brain vasculature utilizing optical coherence angiography** [13318-23]
- 13318 08 **Enhancing retinal image clarity: denoising fundus and OCT images using advanced U-Net deep learning** [13318-34]

---

## POSTER SESSION

- 13318 09 **Modeling the spatiotemporal statistics of laser speckles using stochastic differential equations** [13318-35]
- 13318 0A **High-resolution infrared thermography reveals real-time axillary sweat gland activity for advanced physiological insights** [13318-5]
