# Optical Elastography and Tissue Biomechanics XII

Kirill V. Larin Giuliano Scarcelli Editors

25–27 January 2025 San Francisco, California, United States

Sponsored by SPIE

Cosponsored by Thorlabs, Inc. (United States) TOPTICA Photonics, Inc. (United States)

Published by SPIE

Volume 13321

Proceedings of SPIE, 1605-7422, V. 13321

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Optical Elastography and Tissue Biomechanics XII*, edited by Kirill V. Larin, Giuliano Scarcelli, Proc. of SPIE 13321, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v Conference Committee

# OCE: FUNDAMENTALS, MODELING AND COMPUTATIONAL

- 13321 02 Comparison of the elastography resolution between shear wave and reverberant optical coherence elastography [13321-3]
- 13321 03 A mathematical approach to mitigate the impact of compression waves in shear wave elastography [13321-4]

# ACTIVE MICRORHEOLOGY

13321 04 Probing neutrophil-bacteria interactions and the behavior of engulfed particles with optical tweezers and microrheology [13321-12]

#### **OCE: TRANSLATIONAL**

- 13321 05 Analysis of the biomechanical properties of brain organoid development affected by dolutegravir using reverberant optical coherence elastography [13321-15]
- 13321 06 Application of machine learning for classification of systemic sclerosis based on optical coherence elastography and angiography data [13321-17]
- 13321 07 Assessing the stiffness of intact bone marrow with noncontact optical coherence elastography [13321-22]

#### **OCULAR BIOMECHANICS**

- 13321 08 Longitudinal biomechanical analysis of the postnatal mouse cornea [13321-26]
- 13321 09 **3D** heartbeat optical coherence elastography to map the elasticity of the cornea after customized crosslinking [13321-28]

# **BRILLOUIN ELASTOGRAPHY I**

13321 0A Full-field Brillouin microscopy based on an imaging Fourier transform spectrometer [13321-30]

# **NOVEL METHODS**

13321 OB Developing a wireless stereoscopic optical palpation probe towards cost effective intraoperative breast cancer detection (Invited Paper) [13321-33]

# **BRILLOUIN ELASTOGRAPHY II**

- 13321 OC Brillouin spectroscopy for complete elastic stiffnesses of marine sea sponge spicules (Invited Paper) [13321-38]
- 13321 0D Assessment of changes in zebrafish embryo biomechanical properties due to cold treatment using high-resolution Brillouin microscopy [13321-43]

#### POSTER SESSION

13321 OE Versatile Brillouin microscope for fast mechanical mapping: from cells to calcified tissues [13321-47]
13321 OF Noncontact reverberant optical coherence elastography using air-coupled ultrasonic transducers [13321-52]
13321 OG The impact of temperature, pH, and numerical aperture on the Brillouin frequency shift [13321-53]
13321 OH Noninvasive remote assessment of tissue fibrogenesis using Brillouin microscopy [13321-72]
