Volume 13323

Proceedings of SPIE 0277-786X, V. 13323

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Imaging, Manipulation, and Analysis of Biomolecules, Cells, and Tissues XXIII*, edited by Attila Tarnok, Jessica P. Houston, Xuantao Su, Proc. of SPIE 13323, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

CYTOMICS

13323 02 **Deep learning-based cancer cell classification using morphological and topological organelle features** [13323-3]

OPTICAL DEVICES AND ANALYSIS TECHNIQUES

13323 03 **Probing deep histological segmentation models to identify specific performance boundaries** [13323-14]

LABEL-FREE TECHNIQUES

13323 04 **Real-time label-free dynamic imaging of extracellular vesicles in live tissues (Invited Paper)** [13323-18]

13323 05 **AutoMitoNetwork: software for quantitative mitochondrial network analysis using label-free autofluorescence images for cell classification** [13323-20]

13323 06 **Comparative analysis of autofluorescence enhancement and MALDI imaging in the FluoMALDI pipeline using different matrix application methods: sublimation versus spraying** [13323-21]

APPLICATIONS OF OCT

13323 07 **In vivo macrophage tracking of newts during lens regeneration with OCT and confocal laser scanning microscopy multimodal imaging system** [13323-24]

13323 08 **OCTA of newts during tissue regeneration** [13323-26]

SPECTRAL APPROACHES

13323 09 **A naturally brighter approach to colorectal cancer detection** [13323-27]

13323 0A **Design of multiplexed, live cell imaging experiments using excitation scan-based hyperspectral imaging microscopy** [13323-28]

13323 0B **Power scalable speckle-free multiwavelength light engine for super-resolution microscopy** [13323-31]

MANIPULATION AND ANALYSES

13323 0C **Simultaneous trapping and optical spectroscopy of single samples using optoelectronic tweezers** [13323-35]

LIGHT-SHEET APPLICATIONS

13323 0D **Development of lensless light-sheet sources and their application for compact selective plane illumination microscopy (SPIM) (Invited Paper)** [13323-36]

13323 0E **Optical system design of a high-resolution light-sheet fluorescence microscope for cleared samples** [13323-37]

13323 0F **Multiple wavelength sMx-SPIM: an effective microscopy technique for investigating light absorption and photosynthetic efficiency in plants** [13323-39]

POSTER SESSION

13323 0G **Sensing biofilm development with optical tweezers** [13323-42]

13323 0H **Automated 3D quantitative cyto- and myeloarchitectural analysis of human brain fluorescence microscopy reconstructions** [13323-43]

13323 0I **Beyond the lens: transforming light sheet fluorescence microscopy through stochastic elegance and iterative image refinement** [13323-44]
