Volume 13324

Proceedings of SPIE 0277-786X, V. 13324

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multiphoton Microscopy in the Biomedical Sciences XXV*, edited by Ammasi Periasamy, Peter T. So, Karsten König, Proc. of SPIE 13324, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

FCS, FLIM, FRET, AND METABOLISM I

- 13324 02 **Optical metabolic imaging of humans using two-photon FLIM (Invited Paper)** [13324-8]

FCS, FLIM, FRET, AND METABOLISM II

- 13324 03 **Probing cellular metabolism and embryo development by fluorescence lifetime microscopy of endogenous biomarkers (Invited Paper)** [13324-12]

FCS, FLIM, FRET, AND METABOLISM IV

- 13324 04 **Leveraging the synergies between multiphoton and fluorescence lifetime imaging microscopy on the Leica STELLARIS platform (Invited Paper)** [13324-21]

FCS, FLIM, FRET, AND METABOLISM V

- 13324 05 **Interleaved gate acquisition: a low-frequency noise-immune approach to wide field FLIM with time-gated SPAD cameras** [13324-26]
- 13324 06 **Experimental investigation of noise characterization in real-time, multiphoton fluorescence lifetime imaging microscopy** [13324-27]

SHG/THG MICROSCOPY

- 13324 07 **Quantitative second harmonic generation imaging for differentiating between normal and cancerous thyroid tissue** [13324-35]
- 13324 08 **Beyond the microscope: targeting metabolic regions through FLIM algorithms and phasor pattern segmentation** [13324-38]

TECHNOLOGY DEVELOPMENT II

- 13324 09 **Visualizing *Drosophila* connectome with multiview light-sheet macrophotography and iterative expansion microscopy (Invited Paper)** [13324-40]

- 13324 0A **Label-free multimodal femtosecond fiber laser microscopy of engineered heart tissue with acousto-optic deflectors (Invited Paper)** [13324-42]

FCS, FLIM, FRET AND METABOLISM VI

- 13324 0B **Effect of surface coating and acidification on the interaction of microplastics with algae *Chlorella sp.* by confocal microscopy and time-resolved imaging (Invited Paper)** [13324-45]

TECHNOLOGY DEVELOPMENT III

- 13324 0C **Two-photon imaging of the live mouse brain in the SWIR using an array of SNSPDs** [13324-53]

TECHNOLOGY DEVELOPMENT IV

- 13324 0D **Investigation of the statistical distribution of noise in fluorescence lifetime imaging microscopy (FLIM) measurements** [13324-57]

POSTER SESSION

- 13324 0E **Enhanced resolution imaging of autophagosome generation in LC3 mice using two-photon microscopy** [13324-54]
- 13324 0F **Multiphoton and confocal imaging of advanced glycation end product saturation in tissues** [13324-55]
- 13324 0G **Label-free detection and characterization of metabolism in fresh and cryopreserved macrophages** [13324-62]
- 13324 0H **Metabolic analysis of LDHB inhibition in breast cancer using fluorescence lifetime imaging microscopy (Best Poster Award)** [13324-63]
- 13324 0I **Two-photon fluorescence lifetime imaging microscopy of autofluorescence under cellular differentiation (Best Poster Award)** [13324-71]
- 13324 0J **3D fluorescence lifetime imaging microscopy of *Drosophila* imaginal wing discs for studying membrane tension** [13324-72]
- 13324 0K **Experimental examination of long lifetime distributions as a factor of FLIM variability (Best Poster Award)** [13324-73]
- 13324 0L **Thyroid cancer assessment with machine learning-assisted wide-field second harmonic generation microscopy** [13324-74]
