**Volume 13326**

Proceedings of SPIE 0277-786X, V. 13326

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Single Molecule Spectroscopy and Superresolution Imaging XVIII*, edited by Rainer Erdmann, Mike Heilemann, Felix Koberling, Proc. of SPIE 13326, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## FLIM AND FRET

---

13326 08 **Nonlinear organic small molecule imaging agents (Invited Paper)** [13326-11]

---

## NANO II

---

13326 0J **PIC-based optical beam formers for STED microscopy** [13326-22]

---

## BIOLOGICAL APPLICATION

---

13326 0N **Fast and long-term super-resolution STED microscopy of nanostructural cellular dynamics using a neural network** [13326-26]
