Volume 13328

Proceedings of SPIE 0277-786X, V. 13328

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Adaptive Optics and Wavefront Control for Biological Systems XI*, edited by Thomas G. Bifano, Na Ji, Lei Tian, Proc. of SPIE 13328, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

WAVEFRONT SHAPING

- 13328 02 **Optimization of deformable mirror actuator geometry using machine learning methods**
[13328-6]

FOCUSING LIGHT THROUGH SCATTERING TISSUES

- 13328 03 **Wavefront corrections over large fields of view via beam cone tomography** [13328-14]
- 13328 04 **Structured light-assisted wavefront shaping for enhanced and precise sensing** [13328-15]
- 13328 05 **Light focusing against tissue dynamics with real-valued intensity transmission matrix**
[13328-18]
- 13328 06 **Understanding multiconjugate wavefront-shaping corrections** [13328-19]

COMPUTATIONAL OPTICAL IMAGING TECHNIQUES

- 13328 07 **Wavefront sensing based on aperture masking for microscopy adaptive optics** [13328-22]
- 13328 08 **Rapid wavefront shaping using an optical gradient acquisition** [13328-23]
