Volume 13332

Proceedings of SPIE, 1605-7422, V. 13332

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Advanced Chemical Microscopy for Life Science and Translational Medicine 2025*, edited by Ji-Xin Cheng, Wei Min, Garth J. Simpson, Proc. of SPIE 13332, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

CLINICAL TRANSLATION AND COMMERCIALIZATION I

13332 02 **Tracking climate change with FL-PTIR of Arctic sea ice diatoms (Invited Paper)** [13332-17]

13332 03 **Machine learning assisted mid-infrared spectrochemical fibrillar collagen imaging in clinical tissues** [13332-19]

COHERENT RAMAN MICROSCOPY INNOVATIONS I

13332 04 **Waveguide-based optical parametric oscillator for coherent Raman scattering spectroscopy and microscopy** [13332-23]

13332 05 **High-bandwidth noise-reduced loss-corrected autobalanced detection for stimulated Raman scattering microscopy** [13332-24]

13332 06 **Chirp modulation stimulated Raman scattering microscopy** [13332-25]

13332 07 **Label-free super-resolution stimulated Raman scattering using 4Pi-SRS** [13332-26]

VIBRATIONAL PHOTOTHERMAL MICROSCOPY INNOVATIONS II

13332 08 **Optical photothermal infrared imaging using metabolic probes in live biological systems (Invited Paper)** [13332-34]

LIFE SCIENCE AND BIOMEDICAL APPLICATIONS II

13332 09 **Lipid profiling at submicron resolution by hyperspectral stimulated Raman imaging (Invited Paper)** [13332-39]

NOVEL CHEMICAL IMAGING MODALITIES II

13332 0A **Multimodal field-resolved spectroscopy at near-petahertz frequencies** [13332-57]

13332 0B **Label-free QCL-based mid-IR reflection microspectroscopy for molecular imaging of biofilms** [13332-60]

DATA SCIENCE

13332 0C **Nonresonant background removal in broadband CARS microspectroscopy using deep learning algorithms** [13332-64]

13332 0D **Light waves, hidden clues: how spectroscopy and A.I. can detect pathogens faster** [13332-66]

POSTER SESSION

13332 0E **Label-free organelle image prediction using deep learning and largescale hyperspectral stimulated Raman imaging** [13332-70]

13332 0F **A signal processing and machine learning pipeline for the analysis of spectral fluorescence data from stained brain tissue samples in Alzheimer's disease and normal aging** [13332-72]
