Volume 13334

Proceedings of SPIE, 1605-7422, V. 13334

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Endoscopic Microscopy XX*, edited by Guillermo J. Tearney, Thomas D. Wang, Melissa J. Suter, Proc. of SPIE 13334, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ADVANCES IN IMAGE ANALYSIS AND SYSTEM DESIGN

- 13334 02 **Supervision generation methods for learning-based NURD correction in endoscopic OCT**
[13334-3]
- 13334 03 **Depth-of-focus extension in endoscopic OCT via computer-generated holography**
[13334-4]
- 13334 04 **Proximal-scanning BM-mode endoscopic OCT elastography** [13334-6]

NOVEL CATHETER LENS FABRICATION AND DESIGN

- 13334 05 **High-performance submillimeter 3D-glass-printed OCT endoscopy at 800nm** [13334-10]
- 13334 06 **Design and evaluation of a 0.5mm 3D-printed optical system for multiphoton microendoscopy** [13334-11]

ENDOSCOPIC SYSTEM AND CATHETER DESIGN II

- 13334 07 **Lessons learned in the assembly of submillimeter endoscopes** [13334-24]
- 13334 08 **The next frontier in optical biopsy: miniaturized disposable endocytoscope and technologies behind** [13334-26]
