PROGRESS IN BIOMEDICAL OPTICS AND IMAGING Vol. 26 No. 45

Colloidal Nanoparticles for Biomedical Applications XX

Marek Osiński Antonios G. Kanaras Editors

25–27 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13336

Proceedings of SPIE, 1605-7422, V. 13336

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Colloidal Nanoparticles for Biomedical Applications XX*, edited by Marek Osiński, Antonios G. Kanaras, Proc. of SPIE 13336, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 1605-7422 ISSN: 2410-9045 (electronic)

ISBN: 9781510684201 ISBN: 9781510684218 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

NANOPARTICLES IN BIOIMAGING I

13336 02 Biostable lead sulfide quantum dots for longitudinal SWIR imaging (Invited Paper) [13336-4]

NANOPARTICLES IN BIOIMAGING II

13336 03 Colloidal Y, Yb co-doped BaClF nanoparticles for NIR bioimaging [13336-8]

NANOPARTICLES FOR BIOMEDICAL APPLICATIONS II

13336 04 Assessment of functionalized superparamagnetic iron oxide nanoparticles on in vivo multispecies biofilm disease models [13336-34]

NANOPARTICLES FOR BIOMEDICAL APPLICATIONS III

13336 05 Bimetallic photonanozyme catalysts for fluorometric analysis of total antioxidant capacity in human saliva (Young Investigator Award) [13336-19]

BIOSENSING

13336 07 Biocompatible pH sensor based on chitosan IPNs and polystyrene colloidal photonic crystal films (Invited Paper) [13336-25]

NANOPARTICLES

- 13336 09 Investigating the silica growth mechanism and I-LSPR shift in dumbbell-shaped silicacoated gold nanorods [13336-31]
- 13336 0A Enhancing stability and functionality of dumbbell-shaped silica-coated gold nanorods through optimized synthesis and purification [13336-32]

POSTER SESSION

13336 OB Gold nanoparticles functionalized with antibodies: a colorimetric analysis for implementation in PoC devices [13336-26]
