**Volume 13339**

Proceedings of SPIE, 1605-7422, V. 13339

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Reporters, Contrast Agents, and Molecular Probes for Biomedical Applications XVI*, edited by Mikhail Y. Berezin, Ramesh Raghavachari, Proc. of SPIE 13339, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## FLUORESCENCE LIFETIME IMAGING

- 13339 02 **Fluorescence and fluorescent life imaging probes for biomedical applications (Keynote Paper)** [13339-1]
- 13339 03 **Fluorescence-lifetime-modulating probes for neural activity sensing** [13339-4]

---

## NANOPROBES AND DYES I

- 13339 04 **Developments of Raman probes for advanced stimulated Raman imaging (Invited Paper)** [13339-9]

---

## EMERGING TECHNOLOGIES IN IMAGING

- 13339 06 **Infrared laser imaging for tissues and cells** [13339-18]

---

## FLUORESCENCE IMAGING

- 13339 07 **Comparative analysis of fluorophore-MALDI matrix interactions in solid and liquid phases to investigate fluorescence enhancement effects in FluoMALDI imaging** [13339-20]
- 13339 08 **A simplified fluorescence assay to estimate binding on- and off-rates for molecular targeted imaging agents** [13339-23]

---

## BEYOND FLUORESCENCE

- 13339 09 **Local protein detection with a lateral flow assay read through tissue using x-ray excited luminescence chemical imaging (XELCI) (Invited Paper)** [13339-29]

---

## POSTER SESSION

- 13339 0A **Chatbots can guide measurement of absorption spectra with improved quality** [13339-25]

- 13339 0B **On the healing process of Wistar rat burnt scars implementing micro-encapsulation of reactive oxygen** [13339-26]
- 13339 0C **Radiolytically molecularly imprinted polymer@Au nanocomposites for morphine sensing** [13339-35]
