SPIE

Volume 13340

Proceedings of SPIE, 1605-7422, V. 13340

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Effects and Measurement Techniques in Biology and Biophotonics II*, edited by Clarice Aiello, Sergey V. Polyakov, Paige Derr, Proc. of SPIE 13340, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

NOVEL TRENDS IN QUANTUM BIOLOGY

- 13340 03 **Quantum mechanisms in the brain: from conjectures and theories to experimental evidence (Invited Paper)** [13340-2]

MAGNETIC QUANTUM EFFECTS IN BIOLOGY

- 13340 05 **Characterizing the magnetoreception in cryptochrome using a synthetic two-component system (Invited Paper)** [13340-6]
- 13340 06 **Quantitative differences in cellular effects between isolated sweep field and radiofrequency application in therapeutic nuclear magnetic resonance (Invited Paper)** [13340-8]

QUANTUM SYSTEMS FOR BIOSENSING

- 13340 07 **Magnetomyography with optically pumped magnetometers (Invited Paper)** [13340-9]

QUANTUM MEASUREMENTS IN BIOLOGY

- 13340 08 **Practical femtosecond time-resolved spectroscopy using paired single photons (Invited Paper)** [13340-12]

NANOTECHNOLOGIES IN BIOLOGY

- 13340 09 **Self-aligned nanoring doublet as a single particle nanocavity for strong coupling interaction with biomolecules (Invited Paper)** [13340-17]
- 13340 0A **Multiresonant plasmonic nano-optoelectrodes: towards nonlinear and nonclassical sensing of biological and interfacial processes (Invited Paper)** [13340-18]
- 13340 0B **Quantum sensing with an off-the-shelf super resolution microscope (Invited Paper)** [13340-33]

QUANTUM IMAGING FOR BIOLOGY AND BEYOND: JOINT SESSION WITH 13340 AND 13391

13340 0C **Nonlinear quantum bioimaging with bright squeezed light (Invited Paper)** [13340-22]

13340 0D **Metasurface-based super-resolution image scanning microscopy (Invited Paper)**
[13340-25]

POSTER SESSION

13340 0E **Understanding therapeutic nuclear magnetic resonance (tNMR): splitting of components indicates its unique efficacy** [13340-32]
