## **PROCEEDINGS OF SPIE**

# Solid State Lasers XXXIV: Technology and Devices

W. Andrew Clarkson Ramesh K. Shori Editors

26–27 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13341

Proceedings of SPIE 0277-786X, V. 13341

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Solid State Lasers XXXIV: Technology and Devices*, edited by W. Andrew Clarkson, Ramesh K. Shori, Proc. of SPIE 13341, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510684300 ISBN: 9781510684317 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

### Contents

vii Conference Committee

#### **EYE-SAFE AND MID-IR LASERS I**

- 13341 02 Power scaling large-core erbium fibre master-oscillator power amplifiers [13341-1]
- 13341 03 Acousto-optic and passive Q-switched, energetic compact 1.54um laser transmitter design and performance [13341-2]
- 13341 04 Widely tunable, pulsed Tm:YAP laser, based on an active/passive Q switch with YAG etalons [13341-4]

#### EYE-SAFE AND MID-IR LASERS II

- 13341 05 MW-peak-power nanosecond diode-pumped Ho:YAG thin-disk laser [13341-7]
- 13341 06 Single-frequency Ho:YAG nonplanar ring oscillator as a seed laser for next generation gravitational wave detectors [13341-8]
- 13341 07 200W compact 2.1µm CTH YAG laser [13341-9]
- 13341 08 High-power pulsed diffraction limited microsecond 2.94µm Er:YAG laser for diverse applications (Invited Paper) [13341-10]

#### **PULSED LASERS**

- 13341 09 Time-dependent numerical modeling of pulsed alexandrite lasers [13341-11]
- 13341 0A Commissioning a high-energy 10Hz Ti:Sa amplifier for the petawatt laser at the Extreme Photonics Applications Centre [13341-12]
- 13341 0B Simulation of active Q-switched solid-state lasers using Pockels cell [13341-13]
- 13341 OC Demonstration of >1km LiDAR using 1.3µm Nd:YAG/vanadium:YAG passively Q-switched laser [13341-14]
- 13341 0D Numerical modelling of passively cooled and Q-switched Yb:YAG and Nd:YAG lasers: comparison with experimental results and model improvements [13341-16]

#### LASER MATERIALS AND CHARACTERIZATION

13341 OE	Lutetium oxide single-crystal fibers for laser applications [13341-18]
13341 OF	Dynamic response and control of the molten zone in laser heated pedestal growth [13341-19]
13341 0G	Enhancement of Cr:LiSAF thermal properties through room temperature bonding [13341-20]

#### NOVEL LASER CONCEPTS

- 13341 OH Detailed simulation and experimental design of a high small-signal gain, triple-pass Yb:YAG laser amplifier [13341-24]
- 13341 01 Towards direct nonlinear compression of long-pulse lasers to the femtosecond regime [13341-26]
- 13341 0J Cryogenic Nd:YAG and Er:YLF lasers (Invited Paper) [13341-27]
- 13341 OK Improving the gain capability of high-power laser amplifiers by amplified spontaneous emission suppression in circular pump architecture [13341-28]

#### **ULTRAFAST LASERS**

13341 OL A packaged and ultrastable passive GHz comb waveguide laser [13341-29]

#### **UV AND VISIBLE LASERS**

- 13341 0M Highly reliable, 6W average-power, high-repetition-rate, 266-nm picosecond laser source [13341-34]
- 13341 0N All diode-pumped 10Hz 7-joule nanosecond 527nm laser for optical parametric chirped pulse amplifier (OPCPA) pump (Invited Paper) [13341-35]

#### POSTER SESSION

13341 00	Efficient external cavity resonant second harmonic generation of a multi-axial mode source [13341-41]
13341 OP	kW-level infrared microchip lasers for UV and visible light generation [13341-42]
13341 0Q	Er:Yb:glass material limits in case of compact passively Q-switched nanosecond DPSS lasers [13341-44]

- 13341 OR Comparative study of high-power diode-pumped Nd:GdVO<sub>4</sub> and Nd:YVO<sub>4</sub> lasers [13341-46]
- 13341 0S Evaluation of absorption spectra of common neodymium-doped laser crystals for long wavelength pumping [13341-47]
- 13341 OT Novel implementation of KLTN-based modulator in Tm:YLF pulsed laser [13341-48]
- 13341 0U Optimization of seed wavelength of ytterbium-doped thin-disk high-power multi-pass amplifier using ytterbium-doped fiber amplifiers for seed source [13341-51]
- 13341 0V Development of pulse shape controlled DUV solid-state light source for hybrid ArF laser [13341-53]
- 13341 0W Room temperature sub-nanosecond Fe:ZnSe gain-switched laser characterization and modeling [13341-55]
- 13341 0X Megawatt peak power, nanosecond, eye-safe laser [13341-56]
- 13341 OY Broadly tunable continuous-wave Yb:KGW laser pumped by a compact Nd:YAG laser [13341-57]
- 13341 0Z Characterization of optical ZnSe ceramics fabricated by spark plasma sintering [13341-58]
- 13341 10 Novel method for thermal lensing measurement applying in a Tm:Yap crystal [13341-59]
- 13341 11 High-power solid-state thin-disk modules, pump modules and solid-state lasers in SWIR region by CRYTUR [13341-60]
- 13341 12 Compact laser beam combiner [13341-61]
- 13341 13 **Quad flashlamp driver** [13341-62]
- 13341 14 Compensation of thermal lensing in solid-state laser gain media using phantom pulses [13341-63]
- 13341 15 High-power 786nm VCSEL-pumped Tm:YAG laser [13341-64]
- 13341 16 Few-cycle, mJ-level, mid-wave infrared pulses generated via post compression of chirped pulse amplifier [13341-66]
- 13341 17 AFB of zero-order compound waveplate with high accuracy and precision retardation values [13341-67]

#### **DIGITAL POSTER SESSION**

13341 18 High throughput and energy density fiber beam delivery system for ns high-energy pulses [13341-15]
