SPIE

**Volume 13343**

Proceedings of SPIE 0277-786X, V. 13343

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High Power Lasers for Fusion Research VIII*, edited by Abdul A. Awwal, Constantin L. Häfner, Proc. of SPIE 13343, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

## STATUS UPDATES

---

- 13343 02 **Advances in laser technology for direct drive inertial fusion energy** [13343-3]
- 13343 03 **Progress on fusion target gain using 2.2MJ of laser energy at the National Ignition Facility (Invited Paper)** [13343-25]

## ENGINEERING CHALLENGES

---

- 13343 04 **Virtual Beamline++: full-chain optical modeling for modern laser design and operation** [13343-8]
- 13343 05 **Capability enhancements to integrated opto-mechanical birefringence modeling code for high-power laser systems** [13343-11]
- 13343 06 **Beam-based programmable spatial shaper for reducing optics exchange in the National Ignition Facility** [13343-13]
- 13343 07 **Current status of the LD-pumped Yb:YAG ceramics laser toward 250J at 10Hz operation** [13343-14]

## OPERATIONS/SUBSYSTEMS

---

- 13343 08 **LMJ front-end performance status and underway improvements to push back E/P limitations** [13343-16]
- 13343 09 **NIF computing systems for ignition, high neutron yields, and future high-energy-density (HED) science** [13343-17]
- 13343 0A **Maintaining optimum performance for beam alignment at the National Ignition Facility** [13343-19]

## FUTURE SYSTEMS

---

- 13343 0B **Closed-loop pulse shaping with <1ps resolution over >2ns records using STILETTO combined with three phase spectral interferometry (3PSI)** [13343-20]
- 13343 0C **Performance scaling of high-power diode laser pumps for fusion application** [13343-21]
