

PROCEEDINGS OF SPIE

Components and Packaging for Laser Systems XI

**Alexei L. Glebov
Ruth Houbertz
Stefan W. Heinemann**
Editors

**27–29 January 2025
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 13344

Proceedings of SPIE 0277-786X, V. 13344

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Components and Packaging for Laser Systems XI*, edited by Alexei L. Glebov, Ruth Houbertz, Stefan W. Heinemann, Proc. of SPIE 13344, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PIC COMPONENTS AND PACKAGING FOR QUANTUM

13344 02 **Integrated photonic devices for quantum systems (Invited Paper)** [13344-2]

OPTICS ASSEMBLY AND RELIABILITY

13344 03 **Laser soldering of large lenses for applications in high-power laser systems** [13344-9]

13344 04 **Bonding of laser components with low outgassing adhesives** [13344-11]

13344 05 **High performance EEL line beam module based on GS packaging for LiDAR applications**
[13344-36]

HIGH POWER/ENERGY LASER COMPONENTS I

13344 06 **A cladding light stripper with ultra-low backscattering (Invited Paper)** [13344-14]

13344 07 **Advancements in deep UV fiber bundle technology** [13344-15]

13344 08 **Large mode area 8+1 to 1 backward pump-signal combiner** [13344-16]

13344 09 **Sequential splicing of high-power suitable fiber arrays** [13344-17]

HIGH POWER/ENERGY LASER COMPONENTS II

13344 0A **A novel high-gain, ASE-suppressed, and highly efficient fiber amplifier (Invited Paper)**
[13344-19]

13344 0B **Enhancing stability and radiation resilience of phase-shifted fiber Bragg gratings for high-power and space applications** [13344-20]

13344 0C **Faraday isolators for high-power lasers using magneto-optical glass** [13344-21]

- 13344 0D **New results on the temperature coefficient of the refractive index for various optical materials** [13344-22]
- 13344 0E **Faraday rotator design for 266nm, 343nm and 355nm lasers** [13344-23]

LASER DIODE PACKAGING I

- 13344 0F **High power diode laser development using advanced bonding technology and innovative structure design** [13344-25]
- 13344 0G **Automated assembly and alignment of NIR and MIR external cavity diode laser systems** [13344-26]

LASER DIODE PACKAGING II

- 13344 0H **High-power InP diode lasers operating under long-pulse condition with high reliability** [13344-28]

POSTER SESSION

- 13344 0I **Miniaturized wavelength stabilized laser module emitting at 619nm** [13344-32]
