PROCEEDINGS OF SPIE

High-Power Diode Laser Technology XXIII

Mark S. Zediker Erik P. Zucker Jenna Campbell Editors

26–28 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13345

Proceedings of SPIE 0277-786X, V. 13345

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *High-Power Diode Laser Technology XXIII*, edited by Mark S. Zediker, Erik P. Zucker, Jenna Campbell, Proc. of SPIE 13345, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510684386 ISBN: 9781510684393 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

WAVELENGTH-LOCKED LASER DIODE SOURCES

13345 02	High-power diode laser modules for DPAL pumping [13345-1]
13345 03	High-power narrow-linewidth 969nm diode laser pump source for kW class disk laser [13345-2]
13345 04	Narrow-linewidth external cavity laser diodes for laser cooling and atomic clock transitions [13345-3]
13345 05	High-power semiconductor laser systems at 720nm: tailored laser light delivery for quantum technologies [13345-4]
13345 06	Demonstrating FBG capabilities in wavelength locking multimode laser diodes [13345-5]
13345 07	Monolithic DBR broad-area diode lasers with high conversion efficiency in the 87x–88x nm wavelength range [13345-6]
	BLUE LASER DIODE TECHNOLOGY AND PACKAGING
13345 08	BLUE LASER DIODE TECHNOLOGY AND PACKAGING 800W-class high-power blue laser diode module with GaN-based laser diodes [13345-7]
13345 08 13345 09	BLUE LASER DIODE TECHNOLOGY AND PACKAGING 800W-class high-power blue laser diode module with GaN-based laser diodes [13345-7] 5-kW high power blue laser with near-infrared fiber laser for high-speed copper welding [13345-8]
13345 08 13345 09 13345 0A	BLUE LASER DIODE TECHNOLOGY AND PACKAGING 800W-class high-power blue laser diode module with GaN-based laser diodes [13345-7] 5-kW high power blue laser with near-infrared fiber laser for high-speed copper welding [13345-8] High power (over 3W) 376nm III-nitride laser diode with unintentionally doped GaN waveguide [13345-9]
13345 08 13345 09 13345 0A 13345 0B	BLUE LASER DIODE TECHNOLOGY AND PACKAGING 800W-class high-power blue laser diode module with GaN-based laser diodes [13345-7] 5-kW high power blue laser with near-infrared fiber laser for high-speed copper welding [13345-8] High power (over 3W) 376nm III-nitride laser diode with unintentionally doped GaN waveguide [13345-9] High-reliability spatial output blue laser based on COS package [13345-10]
13345 08 13345 09 13345 0A 13345 0B 13345 0C	BLUE LASER DIODE TECHNOLOGY AND PACKAGING 800W-class high-power blue laser diode module with GaN-based laser diodes [13345-7] 5-kW high power blue laser with near-infrared fiber laser for high-speed copper welding [13345-8] High power (over 3W) 376nm III-nitride laser diode with unintentionally doped GaN waveguide [13345-9] High-reliability spatial output blue laser based on COS package [13345-10] High-brightness 500W blue laser source for DED processes [13345-11]

LASER DIODE PACKAGES AND MODULES I

- 13345 0D Next-generation high-power laser diode pump modules [13345-12]
- 13345 OE Advancing power and efficiency with 793nm and 976nm semiconductor laser modules [13345-13]

13345 OF	Next-generation 80x-nm high-power diode lasers based on single- and multi-bar packages [13345-14]
13345 0G	High-efficiency, high-reliability semiconductor laser diode chips and modules for fiber laser pumping [13345-15]

LASER DIODE PACKAGES AND MODULES II

13345 OH	Multi-10kW diode laser systems with wall-plug efficiency greater than 50% [13345-16]
13345 01	2800W high-brightness diode laser module targeting next generation fiber laser pump [13345-17]
13345 OJ	Ultra-low SWaP fiber-coupled pumps enabled by double-junction diode chips [13345-18]
13345 OK	1.3W fiber-output of highly reliable 14xx-dual-port Raman pump using asymmetric- waveguide laser by GalnAsP/InP electric-field-control-layer [13345-20]
	LASER DIODE SOURCES FOR LIDAR
13345 OL	High-brightness semiconductor laser diodes for LIDAR application (Invited Paper) [13345-21]
13345 OM	Advancements in 1550nm high-brightness tapered diode laser amplifiers [13345-22]
13345 ON	Coherent lidar for ride-hailing autonomous vehicles [13345-23]
13345 00	Lasing mode design and characterization of 1550nm triple junction laser diode for time-of-flight LiDAR and LRF [13345-24]
13345 OP	Design and characterisation of 1550nm broad-area pulsed laser diodes with outstanding electro-optical performance [13345-25]
13345 0Q	Reliable 940nm laser diode pump for automotive applications [13345-26]
13345 OR	Designing high-power, low-linewidth, PIC based external cavity lasers with extended FMCW chirp [13345-27]

NOVEL APPLICATIONS OF LASER DIODES

13345 OS	Direct diode laser solutions for drying applications [13345-28]
13345 OT	Recent advancements of VCSEL array modules for battery drying applications [13345-29]

-

13345 0U Compact 1kW diode laser module emitting at 780nm for the efficient direct additive manufacturing of aluminum [13345-30]

LASER DIODE DEVICE TECHNOLOGY I

13345 OV	Multi-kW high-efficiency high-filling-factor 870nm and 940nm QCW semiconductor diode laser bar for inertial fusion energy applications [13345-31]
13345 OW	High-brightness high-power semiconductor laser diode with longitudinally distributed current injection [13345-32]
13345 OX	Power scaling of broad-area laser diodes from 755 to 1064nm [13345-33]
13345 OY	Body temperature reduction in high-power laser diodes using distributed waveguide design [13345-34]
13345 OZ	1.06µm DFB laser with 1W optical power output [13345-35]

LASER DIODE DEVICE TECHNOLOGY II

- 13345 10 Advancements in GaN DFBs with embedded gratings and a path to higher power [13345-46]
- 13345 11 Advances in high-power InAlGaAs/InP-based semiconductor lasers [13345-36]
- 13345 12 Current development status of red high-power laser diodes for display applications at Nichia [13345-37]
- 13345 14 Application of 6XXnm MF2 in photodynamic physiotherapy [13345-39]

LASER DIODE RELIABILITY

- 13345 16 Highly reliable, multi-watt continuous wave GaSb-based broad area diode lasers emitting around 2µm [13345-41]
- 13345 17 Micro- and macroscopic analysis of degradation in high-power broad-area QW and QD lasers [13345-43]

- 13345 18 High-power multicolor diode laser stack with four effective wavelengths for medical aesthetic application [13345-45]
- 13345 19 High performance of 640nm red laser diodes and modules for pumping source [13345-47]
