# Nonlinear Frequency Generation and Conversion: Materials and Devices XXIV

Jeffrey Moses Editors

28–31 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13347

Proceedings of SPIE 0277-786X, V. 13347

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Nonlinear Frequency Generation and Conversion: Materials and Devices XXIV, edited by Jeffrey Moses, Proc. of SPIE 13347, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510684423 ISBN: 9781510684430 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

### Contents

vii Conference Committee

## FREQUENCY CONVERSION IN CRYSTALLINE NONLINEAR MATERIALS: WAVEGUIDES AND NOVEL METHODS

- 13347 02 Laser-written depressed cladding waveguides in the z-cut of birefringent nonlinear optical crystals for efficient frequency conversion [13347-1]
- 13347 03 Laser-written β-BBO depressed cladding waveguides for TM and TE polarizations [13347-2]
- 13347 04 Optimization of third harmonic generation in one PPLN ridge waveguide using dual temperature control technique [13347-3]

#### FREQUENCY CONVERSION IN METASURFACES AND NANOSTRUCTURED MATERIALS

- 13347 05 Collective excitations in nonlinear metasurfaces: challenges and possibilities (Invited Paper) [13347-6]
- 13347 06 Broadband enhancement of harmonic generation and upconverted photoluminescence from symmetry-broken plasmonic nanocavities [13347-8]

#### FREQUENCY CONVERSION FOR QUANTUM LIGHT APPLICATIONS

- 13347 07 Non-interferometric measurement of Pancharatnam-Berry phase using stimulated second harmonic generation [13347-11]
- 13347 08 Non-reciprocal frequency conversion in a multimode nonlinear cavity [13347-12]

#### NONLINEAR NANOPHOTONICS IN LITHIUM NIOBATE

- 13347 09 Multi-scale second harmonic generation microscopy of ferroelectric domains in x-cut thinfilm lithium niobate [13347-16]
- 13347 0A **RF sputtering deposition of thin-film lithium niobate for photonic integrated circuit** applications [13347-17]
- 13347 OB Making waveguide frequency converters in lithium niobate robust for handling high-light powers by tailoring the electrical conductivity: theoretical considerations [13347-56]

#### **OPTICAL PARAMETRIC OSCILLATORS**

- 13347 0C Phase-matching properties of ZnSiAs<sub>2</sub> in the mid-IR [13347-20]
- 13347 0D High-power nanosecond-pulsed mid-IR CSP and ZGP OPO sources pumped at 2.06µm [13347-22]

#### **OPTICAL PARAMETRIC AMPLIFICATION**

- 13347 OE Octave-spanning, field-resolved, Kerr-amplification in liquid thin film [13347-26]
- 13347 OF Extreme nonlinear optics: higher order nonlinear frequency conversion processes in Ge, ZnSe, and ZnS [13347-27]

#### ULTRAVIOLET AND HIGH HARMONIC GENERATION

13347 0G XUV generation with MPC and OPCPA drivers [13347-28]

#### SUPERCONTINUUM GENERATION AND HYPERSPECTRAL ARCHITECTURES

- 13347 0H Multi-octave bandwidth supercontinuum generation in crystalline aluminum nitride-onsapphire waveguides [13347-34]
- 13347 01 Ultrashort pulse laser supercontinuum deflection in fused silica: measurement and modeling [13347-36]
- 13347 0J Tunable, high-power deep UV to NIR source of femtosecond pulses utilizing various Ybdoped pump-laser architectures [13347-37]

#### MATERIALS FOR MID-INFRARED AND THZ GENERATION

- 13347 0K Nonlinear properties of bulk optical materials for high-peak-power long-wave-infrared lasers [13347-40]
- 13347 OL Photodarkening in BGSe and BGGSe [13347-41]

#### FREQUENCY COMBS: SPANNING THE RAINBOW

13347 0M Characterization of optically rectified THz frequency comb in lithium niobate waveguides [13347-49]

#### NOVEL CUBIC-ORDER NONLINEAR DEVICES

- 13347 ON Enhanced four-wave mixing in the normal dispersion regime of a Yb-doped photonic crystal fiber [13347-52]
- 13347 00 Transient absorption in silicon-thin-films-based characterization of ultrashort pulses with photon energy above 1.12eV [13347-53]

#### NOVEL CONCEPTS FOR FREQUENCY GENERATION AND CONVERSION

- 13347 OP Brillouin de-interleaved, optical frequency comb sources at 1µm as seed sources for spectral beam combining [13347-54]
- 13347 0Q Non-collinear SHG with wavefront control [13347-55]
- 13347 OR Effective phase matching strategies in high index contrast double-clad optical fibers for second and third harmonic generation of ultrashort pulses [13347-57]

#### POSTER SESSION

- 13347 0S Phase-matching properties of AgGa(Se1-xTex)2 for SHG of a CO2 laser [13347-60]
- 13347 0T Passively Q-switched Raman fiber laser source widely tunable in near infrared and visible window [13347-62]
- 13347 0U Material mechanics of GaAs<sub>1-x</sub>P<sub>x</sub> alloy epilayers for optical frequency conversion in the mid-infrared [13347-63]
- 13347 OW Guided space-time wavepacket generation through stimulated Brillouin scattering in waveguide system [13347-66]
- 13347 0X Mode-division multiplexing of signals and Raman pumps in low differential mode group delay multimode optical fiber [13347-67]
- 13347 OY Tunable VUV and XUV light generation based on nonlinear resonantly enhanced four-wave mixing in gaseous media [13347-71]
