Volume 13349

Proceedings of SPIE 0277-786X, V. 13349

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Laser Resonators, Microresonators, and Beam Control XXVII, edited by Vladimir S. Ilchenko, Andrea M. Armani, Julia V. Sheldakova, Alexis V. Kudryashov, Andrey B. Matsko, Proc. of SPIE 13349, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510684461 ISBN: 9781510684478 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

NOVEL MICRODEVICES I

- 13349 02 Frequency-swept feedback interferometry ranging method based on resonant-cavity enhancement [13349-1]
- 13349 03 Advanced green cavity design for generating high-energy partially-coherent x-rays [13349-3]

MICROCOMBS I

13349 04	Fast synergetic simulation of soliton molecules in microresonators in the presence of noise [13349-9]
13349 05	Impact of the frequency drift of a laser cooler on the phase noise of the microcomb repetition frequency [13349-11]
13349 06	Enhancing tunability and conversion efficiency of Kerr soliton microcombs in crystalline microresonators (Invited Paper) [13349-13]
13349 07	Exploring octave-spanning solitons in photonic-crystal resonators [13349-16]
13349 08	Soliton self-injection locking to a fiber Fabry-Perot resonator with sub-100 mW pump power [13349-17]
	MICROWAVE PHOTONICS I
13349 09	Chip-scale high-performance photonic microwave oscillator [13349-25]

MICROWAVE PHOTONICS II

13349 0A Electro-optic parametric circuits as low-noise millimiter-wave receivers (Invited Paper) [13349-27]

BEAM CONTROL

- 13349 OB Spatial beam self-cleaning: from non-equilibrium to thermalization of nonlinear multimode fiber modes [13349-31]
- 13349 OC Broaden optical phased array beamsteering range with complementary grating emitters [13349-33]

POSTER SESSION

- 13349 0D Four-channel single-sensor Shack-Hartmann metrology device for high-power laser beams [13349-35]
- 13349 OE **Design of the stacked-actuator deformable mirror with high thermostabilizing efficiency** [13349-39]
