PROCEEDINGS OF SPIE

Laser Applications in Microelectronic and Optoelectronic Manufacturing (LAMOM) XXX

Jan Kleinert Godai Miyaji Gwenn Pallier Editors

27–29 January 2025 San Francisco, California, United States

Sponsored by SPIE

Cosponsored by Okamoto Optics, Inc. (Japan) Plymouth Grating Laboratory, Inc. (United States)

Published by SPIE

Volume 13350

Proceedings of SPIE 0277-786X, V. 13350

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Laser Applications in Microelectronic and Optoelectronic Manufacturing (LAMOM) XXX, edited by Jan Kleinert, Godai Miyaji, Gwenn Pallier, Proc. of SPIE 13350, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510684485 ISBN: 9781510684492 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

GLASS DRILLING: JOINT SESSION WITH 13350 AND 13351

- 13350 02 Pump-probe shadography of glass drilling in different femtosecond burst regimes (Invited Paper) [13350-1]
- 13350 03 Single-step fabrication of high-aspect-ratio through-glass vias using ultrafast fiber laser [13350-2]

GLASS AND OPTICS MACHINING

13350 04 Revolutionizing optical data storage: high-speed, long-term solution with physically laser ablated matrices on ceramic-on-glass sheets (Invited Paper) [13350-3]

LASE PLENARY AND HOT TOPICS

13350 05 Data-driven laser processing: What does the fusion of laser processing and data science bring? (Plenary Paper) [13350-601]

ADDITIVE

13350 06 Powder-bed-fusion-inspired additive manufacturing of freeform graphene aerogels via laser upcycling of biowaste hemoglobin protein (3D Printing Best Paper Award in LASE) [13350-12]

UV/DUV PROCESSING: JOINT SESSION WITH 13350 AND 13351

13350 07 Current state of laser drilling of µVias in PCB production (Invited Paper) [13350-13]

DIRECT WRITE

13350 08 Ultrashort pulsed laser direct-write technology for rapid prototyping of MEMS devices [13350-17]

SENSING AND CMOS

- 13350 09 Optical coherence tomography for in situ weld seam monitoring in absorber-free laser transmission welding [13350-20]
- 13350 0A Chemical influence on photoluminescence intensity in digitally and sustainably photocorroding GaAs/Al_{0.35}Ga_{0.65}As nanoheterostructures [13350-21]
- 13350 OB Lightwave and millimeter wave optoelectronic computing with the sub-1nm microwave photonic CMOS technology circuit design considerations suitable for nano wireless ultralarge-scale integration [13350-22]

30 YEAR ANNIVERSARY SESSION

13350 0C Simulation-based laser process development for industrial laser micromachining applications (Invited Paper) [13350-26]

ANNEALING AND SOLAR PROCESSES

13350 0D Laser annealing for scalable frequency control on multiqubit quantum processors (Invited Paper) [13350-27]

POSTER SESSION

- 13350 OE Integrated ultra-high-speed vertical NAND FLASH VCSEL and high-power CMOS VCSEL for advanced silicon photonics applications [13350-31]
- 13350 OF Experimental study on blue diode laser induced powder bed fusion of Ti-6AI-4V for improvement of energy efficiency [13350-37]
- 13350 0G Effect of beam shaping on spatter suppression in keyhole welding using 16kW disk laser [13350-38]
- 13350 OH Controlling six beam interference pattern shape of variable wavelength laser using spatial light modulator [13350-41]
