Volume 13355

Proceedings of SPIE 0277-786X, V. 13355

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Free-Space Laser Communications XXXVII*, edited by Hamid Hemmati, Bryan S. Robinson, Proc. of SPIE 13355, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510684584

ISBN: 9781510684591 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

SPACE DEMONSTRATIONS/OPERATIONS/MEASUREMENTS I

- 13355 02 **Results of SDA-standard-compatible optical inter-satellite link testing between Kepler Communications LEO satellites (Invited Paper)** [13355-1]
- 13355 03 **Recent results in optical satellite link research at DLR** [13355-2]
- 13355 04 **Status on laser communication activities at Tesat-Spacecom** [13355-3]

SPACE DEMONSTRATIONS/OPERATIONS/MEASUREMENTS II

- 13355 06 **Experimental results from integrated LCRD low-earth orbit user modem and amplifier terminal (ILLUMA-T) program (Invited Paper)** [13355-5]
- 13355 07 **On-orbit measurements of solar exclusion angle for modular agile scalable optical terminal (MAScOT) on the ILLUMA-T mission** [13355-6]
- 13355 08 **In-orbit test results of a free space optical satellite link between a CubeSat-compatible laser communication terminal and MeO ground station** [13355-7]

SPACE DEMONSTRATIONS/OPERATIONS/MEASUREMENTS III

- 13355 09 **CubeSat optical crosslink** [13355-8]
- 13355 0A **Operational status of JAXA's new optical data relay system LUCAS** [13355-9]

COMPONENT/SUBSYSTEM/TRANSCIVER TECHNOLOGY I

- 13355 0B **Optical phased arrays for space-to-space communications** [13355-10]
- 13355 0C **Phase noise compensation with highly-stabilized laser for long-distance free-space optical coherence communication (Best Student Presentation Award)** [13355-11]
- 13355 0D **From high throughput optical network to quantum information network: overview of European Space Agency networks** [13355-99]

13355 OE **Small satellite lunar optical communications for NASA Science and Artemis** [13355-14]

COMPONENT/SUBSYSTEM/TRANSCIVER TECHNOLOGY II

13355 OG **Comparative analysis of Bessel-Gaussian and Ince-Gaussian beams for free-space optical communication** [13355-17]

13355 OI **Operation of the NRL-SDA optical communication terminal testbed** [13355-20]

DEEP SPACE LINKS I

13355 OJ **Overview of the deep space optical communications (DSOC) technology demonstration (Invited Paper)** [13355-21]

13355 OK **Operational results from the deep space optical communications project ground laser transmitter** [13355-22]

13355 OL **Downlink and uplink laser transmitters operational performance for the Deep Space Optical Communications project on the Psyche mission** [13355-23]

13355 OM **The deep space optical communications (DSOC) flight terminal** [13355-24]

13355 ON **Ground laser receivers for the deep space optical communications demonstration: performance and lessons learned from first year of operations** [13355-25]

DEEP SPACE LINKS II

13355 OO **Flight system acquisition, tracking, and pointing results from the deep space optical communications technology demonstration** [13355-26]

13355 OP **The RF/ optical hybrid antenna for deep space communications** [13355-27]

13355 OQ **Telescope arrays for deep space optical communications** [13355-28]

SYSTEMS AND CONCEPTS

13355 OS **The European satellite-based QKD system EAGLE-1** [13355-30]

MODULATION AND CODING

13355 OT **Capacity-based analysis of physical-layer and link-layer techniques for reliable communication over free-space optical fading channels** [13355-32]

- 13355 0U **High extinction ratio waveform generation using a directly modulated laser and transmissive fiber Bragg grating filter** [13355-33]
- 13355 0V **Interleaving to mitigate burst errors due to dynamic pointing and tracking losses** [13355-34]
- 13355 0W **Space development agency burst mode on-off keyed waveform for long range intersatellite optical communications** [13355-35]

BEAM CONTROL

- 13355 0X **On-orbit pointing performance of the modular agile scalable optical terminal (MAScOT) for the ILLUMA-T mission** [13355-36]
- 13355 0Y **In-orbit optical calibration for acquisition and tracking on OSIRIS4CubeSat** [13355-37]
- 13355 0Z **Automated pointing, acquisition, and tracking control loop handoff and fade recovery demonstrated across a mobile-to-static 7.5 km terrestrial link** [13355-38]
- 13355 10 **Few-mode tracking for free-space optical (FSO) communications** [13355-39]
- 13355 11 **Lasercom acquisition in the presence of jitter** [13355-40]

GROUND STATION TECHNOLOGIES/MEASUREMENTS

- 13355 12 **Initial results from NASA's low-cost optical terminal (LCOT) at Goddard Space Flight Center** [13355-42]
- 13355 13 **Design and performance of a 40W uplink laser transmitter for NASA's O2O laser communications mission** [13355-43]
- 13355 14 **100W C-band amplifiers for Tbit/s satellite links: EPOS project** [13355-44]
- 13355 15 **Development of optical ground stations in Japan and application as testbeds (Invited Paper)** [13355-45]

ATMOSPHERIC BEAM PROPAGATION

- 13355 16 **Up- and down- link atmospheric compensation experiment with Alphasat: design and initial results** [13355-47]
- 13355 17 **Hybrid validation of an adaptive optics system for geo downlink** [13355-48]
- 13355 19 **LEO-to-ground low elevation optical communication: optimization of an adaptive optics design robust to scintillation** [13355-50]

- 13355 1A **Approximation of wave optics calculation of scintillation in horizontal and slant path free space optical links** [13355-51]

POSTER SESSION

- 13355 1B **Effect of satellite slew rate in bit error rate model under atmospheric turbulence** [13355-53]
- 13355 1D **Evaluation of a semiconductor optical amplifier for free space optical communication applications** [13355-55]
- 13355 1E **Prototype development and evaluation of space-grade WDM-based HPA/LNA modules for small LEO satellite constellations** [13355-56]
- 13355 1F **On campus low-cost FSO communication link analysis for backhaul connectivity in B5G communications** [13355-57]
- 13355 1G **Long-term intensity modulated optical communication over a 1.3km free-space atmospheric link using optimized PAT system and AM noise suppression** [13355-58]
- 13355 1H **Performance and applications of optical pin beams in turbulent long-range free space optical communications** [13355-59]
- 13355 1J **Orbit determination using passive optical communication observations** [13355-61]
- 13355 1K **Panoramic steering modules for optical wireless communications on small UAS** [13355-62]
- 13355 1L **Ultra-low optical input power 1 μ m-laser amplifier for WDM satellite communication** [13355-63]
- 13355 1M **Advanced control of BERTIN ALPAO DMs leads to significant AO performance improvements** [13355-64]
- 13355 1N **Miniaturized, radiation resistant, booster EDFA for compact CubeSat lasercom terminals** [13355-65]
- 13355 1O **Robust optical communications using the coherence-rank of partially coherent light** [13355-66]
- 13355 1U **Coherent beam combination for deep space optical communications** [13355-76]
- 13355 1V **A wide bandwidth source of weak coherent pulses using feedback from superconducting nanowire single photon detectors** [13355-78]
- 13355 1W **Multi-Gbps fiber-optic wavefront sensing coherent optical receiver** [13355-79]
- 13355 1X **In situ 100 MeV proton and gamma radiation testing of 25 Gbaud balanced photoreceivers** [13355-80]

- 13355 1Y **Active silicon photonic Van-Atta retroreflector platform for free-space optical communication** [13355-82]
- 13355 22 **System model of a miniaturized laser communication terminal** [13355-86]
- 13355 24 **Characterization of an APD-based OEO receiver architecture with the NRL SDA OCT reference modem** [13355-89]
- 13355 25 **2.5G large area avalanche photodiodes for free space optical communication** [13355-90]
- 13355 26 **Power spectral density characteristics through turbulent atmosphere** [13355-91]
- 13355 28 **Using numerical weather prediction to forecast optical turbulence** [13355-93]
- 13355 29 **Wavelength-dependent performance of OAM-based optical communication in foggy conditions** [13355-94]
- 13355 2A **Determining Bessel-Gauss beams orbital angular momentum using diffraction patterns from various apertures** [13355-95]
- 13355 2B **Testing a small, deployable, optical ground terminal for LEO to ground laser communications** [13355-96]
- 13355 2C **Lasercomm transmitter alignment using clouds** [13355-97]
- 13355 2D **Adaptive LDPC coding in L-band outperforming adaptive optics in C-/L-bands in free-space optical communication under strong turbulence regime** [13355-98]
- 13355 2E **400-Gb/s mode division multiplexing-based bidirectional free space optical communication in real-time with commercial transponders** [13355-100]

DIGITAL POSTER SESSION

- 13355 2F **Development of a compact laser communication terminal for LEO satellite constellations** [13355-12]
