**Volume 13357**

Proceedings of SPIE 0277-786X, V. 13357

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Technologies in Plant and Agricultural Science II*, edited by Dag Heinemann, Gerrit Polder, Proc. of SPIE 13357, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510684621

ISBN: 9781510684638 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## RAMAN SPECTROSCOPY FOR AGRICULTURE AND FOOD SAFETY

---

- 13357 02 **Deep ultraviolet resonant Raman (DUVRR) spectroscopy for spectroscopic evaluation and disinfection of food and agricultural samples [13357-1]**
- 13357 03 **Investigating adaptive changes to abiotic stress in plant cell walls using Brillouin microscopy [13357-3]**
- 13357 04 **Shifted excitation Raman difference spectroscopy for the analysis of milk and dairy products [13357-5]**

---

## SPECTROSCOPIC AND IMAGING TECHNIQUES FOR FOOD QUALITY AND AGRICULTURE I

---

- 13357 05 **Dual-ratio measurements of the absolute optical properties of apples [13357-7]**
- 13357 06 **Diffuse reflection collection optics for analysing chicory content in coffee [13357-8]**
- 13357 07 **First-principles methodology for developing robust NIR spectroscopic solutions for real-world applications [13357-9]**
- 13357 08 **Mapping vineyard quality using remote and proximal sensing [13357-27]**

---

## SPECTROSCOPIC AND IMAGING TECHNIQUES FOR FOOD QUALITY AND AGRICULTURE II

---

- 13357 09 **Multi-spectral analyses in the VIS-NIR-SWIR for detection of ideal harvesting time and degree of ripeness [13357-10]**
- 13357 0A **Purity analysis of food raw materials using deep learning with anomaly detection algorithms [13357-11]**
- 13357 0B **Optimization of the purity analysis of rapeseed by using hyperspectral imaging in the spectral range from 400 to 1600 nm [13357-12]**
- 13357 0C **Mueller matrix spectral and polarimetric imaging for high throughput plant phenotyping [13357-13]**

---

#### LASER PROCESSING IN PLANT SCIENCE AND AGRICULTURE

---

- 13357 OD **Deep drilling of structural timber using quasi-continuous-wave lasers for straight guiding holes** [13357-14]
- 13357 OE **Generation of laser-induced microcracks in apple fruit cuticles** [13357-16]

---

#### IMAGE PROCESSING AND MACHINE LEARNING TECHNIQUES IN PLANT SCIENCE AND AGRICULTURE

---

- 13357 OF **Handheld snapshot hyperspectral video spectroscopy for precision viticulture** [13357-20]
- 13357 OG **Quantifying the algae and toxic nanoparticle interactions using optical coherence tomography** [13357-21]

---

#### POSTER SESSION

---

- 13357 OH **A real-time optical monitoring technology for sustainable hydroponic crop management** [13357-23]
- 13357 OI **Lethality of shortwave visible spectrum light on *drosophila hydei*** [13357-24]
- 13357 OJ **Raman spectral analysis and quality classify: aided by artificial intelligence** [13357-25]
- 13357 OK **Development of an optoelectronic device with control of luminous intensity via open loop for colorimetric analysis of coffee beans** [13357-26]
