**Volume 13361**

Proceedings of SPIE 0277-786X, V. 13361

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Physics, Simulation, and Photonic Engineering of Photovoltaic Devices XIV*, edited by Alexandre Freundlich, Karin Hinzer, Ian R. Sellers, Henning Helmers, Proc. of SPIE 13361, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## PEROVSKITES: MATERIALS AND CHARACTERIZATION OF PHOTOVOLTAICS

---

- 13361 02 **Unraveling carrier transfer and interfacial recombination at perovskite/transport layer interfaces via carrier dynamic simulations and ultrafast spectroscopy** [13361-6]
- 13361 03 **Study and Interpretation of short-term temporary reverse-bias degradation in wide-bandgap FAPbBr<sub>3</sub> perovskite solar cells** [13361-9]
- 13361 04 **Enhancement of hot carrier effects in core-shell InGaAs nanowires by auger heating** [13361-27]

---

## PHOTONIC POWER: JOINT SESSION WITH 13359 AND 13361

---

- 13361 05 **High-performance laser power converters for simultaneous wireless information and power transfer** [13361-11]

---

## MATERIAL GROWTH, DEVICE DESIGN, AND CHARACTERIZATION

---

- 13361 06 **Metamorphic epitaxy solutions for thermophotovoltaic and laser power conversion applications (Invited Paper)** [13361-12]
- 13361 07 **Graphene assisted III-V epitaxy towards substrate recycling** [13361-13]
- 13361 08 **Development of middle-contact three-terminal perovskite/silicon tandems** [13361-14]
- 13361 09 **ZnTe-based solar cells using high-quality P-doped ZnTe layer grown by MBE using a cracked Zn<sub>3</sub>P<sub>2</sub> dopant source** [13361-15]
- 13361 0A **Tip enhanced Raman spectroscopy vs. micro-Raman spectroscopy of InP/InGaP axially heterostructured nanowires for tandem solar cells** [13361-16]

---

## LIGHT MANAGEMENT

---

- 13361 0B **Path to 50% silicon single junction solar cells (Invited Paper)** [13361-24]

---

**RADIATIVE COOLING, VALLEY PHOTOVOLTAICS, AND CARRIER DYNAMICS I**

---

- 13361 0C **Bridging the energy gap: converting radiative heat to power with passive cooling (Invited Paper, Sustainability Best Paper Award in OPTO) [13361-25]**
- 13361 0D **Impact of radiative cooling on the thermal behavior of multi junction solar cells [13361-26]**

---

**POSTER SESSION**

---

- 13361 0E **Comparison of thermal behaviors of silicon and perovskite solar cells through coupled optical-electrical-thermal 3D modeling using COMSOL [13361-30]**
