Volume 13362

Proceedings of SPIE 0277-786X, V. 13362

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Components and Materials XXII*, edited by Shibin Jiang, Michel J. Digonnet, Proc. of SPIE 13362, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510684720

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

RARE-EARTH-DOPED MATERIALS

- 13362 04 **Nd-doped lanthanum titanate glass laser** [13362-3]
- 13362 05 **Numerical investigation of emission properties of a quadruply-doped germanate glass**
[13362-4]
- 13362 07 **Optical thermometry using temperature-dependent absorption in rare earth-doped
crystals** [13362-6]

PHOTONICS INTEGRATED CIRCUITS

- 13362 08 **Femtosecond written waveguides for evanescent excitation of resonant optical sensing
devices (Invited Paper)** [13362-7]
- 13362 09 **Full angular control over photoinduced anisotropy in highly birefringent thin films
(Invited Paper)** [13362-8]
- 13362 0A **Ultra-low-loss large-scale photonic integrated circuits on thin film lithium niobate
(Invited Paper)** [13362-9]

GRATINGS

- 13362 0B **Azimuthally and radially polarized beams generated in a helical fiber grating** [13362-10]
- 13362 0C **Monolithic diffractive linear-polarization beam splitter-monitor** [13362-11]
- 13362 0E **3D-spatial distribution diffractive composite beamsplitters** [13362-13]
- 13362 0F **Dual-band microwave photonic filter utilizing equivalent chirped four-phase-shifted
sampled Bragg grating for 52.1GHz–439.5GHz range** [13362-14]

PHOTORECEIVERS

- 13362 0H **Lanthanide-doped nanoparticles for sensitive photodetectors of short-wave radiation**
[13362-16]

- 13362 0I **Fabrication of Mg_2Si linear photodiode arrays for SWIR imaging** [13362-17]
- 13362 0J **Room temperature GeSn nanowire array SWIR photodetectors on Si** [13362-18]
- 13362 0K **Pseudo-planar Ge-on-Si avalanche photodiode with >100 gain and low excess noise**
[13362-19]
- 13362 0M **Novel electrode-free and highly sensitive infrared photodetector based on graphene nanoplatelets-integrated fiber Bragg grating device** [13362-21]

FIBER LASERS AND AMPLIFIERS

- 13362 0N **2121nm 2W PM fiber amplifier for molecular hydrogen detection** [13362-22]
- 13362 0O **Design and performance of a high-power PM ytterbium-doped fiber amplifier for use between 1107nm and 1112nm** [13362-23]
- 13362 0R **Mid-infrared hollow core fibers made by additive manufacturing of chalcogenide glasses**
[13362-26]

SUB-WAVELENGTH OPTICAL ELEMENTS

- 13362 0S **Electrically controlled III-V metasurfaces for active beam control** [13362-27]
- 13362 0T **Wide angle-of-incidence reflectivity suppression in the NIR by pseudo-randomly distributed binary phase nanostructures** [13362-28]
- 13362 0U **Effect of topological inclusions on properties of resonant optical lattices** [13362-29]

OPTICAL COMPONENTS

- 13362 0X **PFAS-free materials for next-generation optical devices with high transmission** [13362-33]
- 13362 0Y **Excess noise in $\text{Al}_x\text{Ga}_{1-x}\text{As}_{0.56}\text{Sb}_{0.44}$ lattice matched to InP at room temperature**
[13362-34]

POSTER SESSION

- 13362 0Z **Extraction of main effect process parameters affecting transmittance of hot isostatic pressing ZnS by design of experiments method** [13362-35]
- 13362 10 **High-power tapered diode lasers utilizing monolithic gratings** [13362-37]

- 13362 1I **Exploring heterogeneous integration of thick microlens array for pluggable photonics packaging** [13362-39]
- 13362 1J **Polarization-maintaining tellurite oval core optical fiber for mid-infrared supercontinuum generation** [13362-40]
- 13362 1K **Comparative study of europium-doped phosphor materials for white light generation** [13362-41]
- 13362 1L **Effect of metallic silver particles on the luminescence spectrum of Sm^{3+} -doped oxide glass** [13362-42]
- 13362 1M **Programmable non-volatile spectral shaping in PCM-enhanced grating-assisted couplers** [13362-48]
- 13362 1N **Novel high-refractive glass materials based on TeO_2 for infrared lens applications** [13362-50]
- 13362 1O **Dark current noise characterization of InGaAs/GaAsSb T2SL photodetectors** [13362-51]
- 13362 1P **Photoluminescence and resonance Raman study of tetrahedral Mn^{5+} and Mn^{6+} in high-optical basicity glasses** [13362-52]
- 13362 1Q **Partial chromatic dispersion compensation of 12.5 gbps transmission with optimised chirped FBG design for access networks** [13362-54]
- 13362 1R **Fiber-compatible LiNbO_3 thin film membrane for broadband second harmonic generation** [13362-55]
